<i>About the Authors</i>	xx
PART I PLANNING FOR AND IMPLEMENTING TECHNOLOGY-ENHANCED MATH TASKS	1
What We Mean by Technology-Enhanced Math Tasks	2
What You Can Expect in This Book	5
1 Using Technology to Position Students as Math Explorers	7
Example 1: Tangent Line to a Circle	11
Vignette: Isaiah and Sam Investigate Tangent Lines to a Circle	14
Example 2: Concept of Function	17
Vignette: Luz and Leah Identifying Functions	19
Concluding Thoughts	22
2 Math Specific Technology Tools	24
Types of Math Action Technologies	26
Dynamic Graphing Applications	26
Dynamic Geometry Applications	28
Data Exploration and Analysis Applications	31
Computer Algebra Systems and Dynamic Algebra	
Notation Systems	32
Spreadsheets	36
Virtual Manipulatives	38
Interactive Applets	40
Activity Builders	42
Concluding Thoughts	42
3 Deciding When and What to Use	45
Deciding Whether or Not to Use Technology in a Lesson	46
Will Technology Allow Us to See the Mathematical Concept Differently?	46
An Example: Pig Pen	47

Will Technology Allow Us to Create Representations Quickly and Accurately So We Can Spend Time Analyzing Them and Working to Generalize?	50
<i>An Example: Triangle Midsegments</i>	52
Will Technology Open Us Up to Different Solution Strategies?	53
<i>An Example: The Zip Line Task</i>	54
Will Technology Provide Meaningful and Immediate Feedback?	55
<i>An Example: Intercepts vs. Intersections</i>	55
Deciding Which Technology to Use	58
Using Math Action Technologies within Activity Builders	61
4 Selecting Technology-Enhanced Tasks	64
Characteristics of a Good Technology-Enhanced Math Task	66
<i>An Example: Graphing Stories</i>	67
Principles for Designing Technology Sketches for Exploring Mathematics	69
Technology Must Allow for Exploration	70
<i>An Example: Triangle Buster</i>	72
Draw Attention to Important Tools and Representations	73
Make Sure the Sketch is Mathematically Correct	78
Space is Used Efficiently	79
Prompts to Accompany Technology Sketches for Exploring Mathematics	80
Advice for Selecting Technology-Enhanced Tasks	83
Start Small	83
Don't Reinvent the Wheel	83
Engage with the Task	84
Collaborate with Other Tech-Using Teachers	85
5 Launching Technology-Enhanced Tasks	87
Characteristics of an Effective Launch of a Technology-Enhanced Task	88
Examples of Effective Technology-Enhanced Task Launches	91
Example 1: Pixar vs. DreamWorks	91
<i>Vignette: Kristen Launching the Pixar vs. DreamWorks Task</i>	93
Example 2: Arcs and Intersecting Chords	103
<i>Vignette: Kristen Launching the Arcs and Intersecting Chords Task</i>	105
Looking Across the Examples	108

6 Noticing and Eliciting Student Thinking in Technology-Mediated Environments	111
An Example: Mystery Transformations	111
Vignette: Abby and Addison Working on the Mystery Transformation Task	113
<i>Unpacking Abby's and Addison's Thinking on the Mystery Transformations Task</i>	116
A Framework to Guide Our Noticing of Student Thinking	118
An Example: Making Sense of Box Plots	119
Vignette: Kyle and JP Working on the Making Sense of Box Plots Task	121
An Example: Rational Functions and Vertical Asymptotes	124
Vignette: Eden and McKenzie Working on the Introduction to Vertical Asymptotes Task	125
7 Facilitating Whole-Class Discussions in Technology-Mediated Environments	129
An Example: Discussing Characteristics of Ellipses	129
Norms That Support Collaboration and Discourse	131
Facilitating Whole-Class Discussions in the Context of a Technology-Enhanced Task	133
An Example: Geometric and Algebraic Definitions of an Ellipse	136
Vignette: Kristen's Whole-Class Discussion About Equations and Graphs of Ellipses	136
Using Teacher Dashboards to Support Equitable Participation in Math Discourse	142
An Example: Exploring Measures of Center	143
Vignette: Nina's Whole-Class Discussion About Mean as a Balance Point	146
Strategies for Selecting and Sequencing	154
Selecting and Sequencing Without a Teacher Dashboard	156
PART II PUTTING IT ALL TOGETHER	161
8 Examples of Technology-Enhanced Algebra and Function Tasks	163
Example 1: Distance vs. Time Scenarios and the Graphs That Represent Them	164
Description of the Task	165
Advice for Teachers Wanting to Use This Task	169

Example 2: Introduction to Polar Functions	169
Description of the Task	169
Advice for Teachers Wanting to Use This Task	173
Example 3: Graphing Instantaneous Rates of Change	174
Description of the Task	174
Advice for Teachers Wanting to Use This Task	179
9 Using Technology-Enhanced Tasks to Support Student	
Exploration of Geometry	180
Example 1: Exploring Rigid Transformations	180
Description of the Task	181
Advice for Teachers Wanting to Use This Task	186
Example 2: Introduction to Radians	186
Description of the Task	187
Advice for Teachers Wanting to Use This Task	192
Example 3: Geometric Constructions in GeoGebra	192
Description of the Task	193
Advice for Teachers Wanting to Use This Task	200
10 Using Technology-Enhanced Tasks to Support Student	
Exploration in Statistics and Probability	201
Example 1: Exploring Standard Deviation	202
Description of the Task	202
Advice for Teachers Wanting to Use This Task	207
Example 2: Testing the Reasonableness of Randomness	
Through Simulation	208
Description of the Task	208
Advice for Teachers Who Might Want to Use This Task	214
Example 3: Investigating Sample Statistics for Random and	
Nonrandom Samples	215
Description of the Task	216
Advice for Teachers Wanting to Use This Task	221
