Introduction	1
1. The Nature of Inquiry	10
1. The Structure of Inquiry	12
2. The Goals of Inquiry	23
3. Theoretical Understanding	27
2. Philosophical Data	35
1. Four Features of Data	36
2. The Theory-Ladenness of Data	39
3. Three Theories of Data	43
3.1. The sociological theory	44
3.2. The metaphysical theory	46
3.3. The psycho-linguistic theory	47
3. The Epistemic Theory of Data	54
1. The Epistemic Theory	55
2. The Process of Data Collection	62
3. Data Imposters, Data Disablers	70
4. The Question of Method	77
1. Two Data about Method	79
2. A Third Datum	83
2.1. Methodological trends in recent philosophy	83
2.2. The rudiments of a sound method	88
3. Extant Methods	90

4. Room for Improvement	95
4.1. Handling the three data about method	95
4.2. Delivering inquiry's ultimate proper goal	100
4.3. Remedies?	102
5. The Tri-Level Method	107
1. Level One: Handling the Data	109
1.1. The Accommodation Criterion	110
1.2. The Explanation Criterion	111
1.3. On the relation between the first two criteria	113
2. Level Two: Grounding the Theory	114
2.1. The Substantiation Criterion	115
2.2. The Integration Criterion	118
2.3. On the relation between the first two levels	120
3. Level Three: Highlighting the Virtues	121
4. A Brief Illustration	126
5. Answering the Question of Method	133
6. Philosophical Progress	139
1. The How-To and Evaluative Questions	142
1.1. Answering the how-to question	143
1.2. Answering the evaluative question	144
2. The Existential and Comparative Questions	150
2.1. Fundamental vs. foremost questions	150
2.2. Shared frameworks	154
2.3. Forms of noetic progress	156
2.4. Illustrating noetic progress	158
2.5. The role of the Tri-Level Method	162
