<b>Figures and Tables Index</b>	<b>xviii</b>
<b>Introduction</b>	<b>1</b>
Why enzymes? . . . . .	1
What are enzymes? . . . . .	2
Why are enzymes important to us? . . . . .	3
Overview of enzymes in health and disease . . . . .	6
Enzymes as biological response modifiers . . . . .	10
Advances in the understanding of enzymes . . . . .	12
Enzymes for medical diagnosis . . . . .	13
Current uses of enzymes in medicine . . . . .	14
Anti-inflammatory and oncologic uses of enzymes outside the U. S, . . . . .	18
Rationale for oral enzymes as a form of treatment . . . . .	19
Purported mechanism of action . . . . .	22
Legal issues . . . . .	25
Controversies surrounding the use of oral hydrolytic enzymes . . . . .	26
Absorption . . . . .	27
If absorbed, do they remain intact in the blood? Are they inactivated by protease inhibitiors? Are they broken down? . . . . .	34
Do hydrolytic enzymes eliminate immune complexes?. . . . .	36
How safe are oral hydrolytic enzymes? . . . . .	40
Generation of exorphins? . . . . .	41
A rutin effect? . . . . .	42
Promote better digestion and absorption of essential nutrients?. . . . .	43
Action of the pancreas? . . . . .	43

---

Placebo effect? . . . . .	44
Author's comment about this book . . . . .	44
Future of therapeutic enzymes . . . . .	46
<b>Chapter 1: The “Fountain of Life”</b>	47
Do we copy Creation? . . . . .	49
Attaining and applying knowledge. . . . .	51
<b>Chapter 2: History: The “Magic Wand”</b>	52
The gizzard of the hawk . . . . .	53
The discovery of enzymes . . . . .	56
<b>Chapter 3: Biochemistry: The solution to the mystery</b>	58
Presence suffices . . . . .	58
How they are produced, how they function . . . . .	59
Lock and key . . . . .	63
A piece of the jigsaw puzzle is missing . . . . .	66
Best working conditions are mandatory. . . . .	68
Living and dying for the common good . . . . .	70
Keeping on the safe side . . . . .	72
<b>Chapter 4: Nature and technology: The genie from the bottle</b>	76
Enzymes in nature since Adam and Eve . . . . .	76
Technology follows nature . . . . .	79
The tenderizer. . . . .	81
All a matter of cheese . . . . .	82
A clean business – enzymes in detergents . . . . .	83

---

Enzyme production on demand . . . . .	84
Once again: And there was light . . . . .	86
<b>Chapter 5: Medicine: A faithful servant</b>	88
Many tons of insulin . . . . .	91
The desired error. . . . .	92
To know what one has – The art of diagnosis . . . . .	93
Correcting errors. . . . .	94
Genetic enzymatic defects – Poisons and antidotes . . . . .	97
Clearing the pipes . . . . .	98
The kidneys as a source . . . . .	101
Enzymes by mouth? . . . . .	102
<b>Chapter 6: Digestion: A means to live</b>	103
Prepared for absorption . . . . .	106
Eat more enzymes! . . . . .	108
Aid for the digestion . . . . .	110
Help for the entire organism . . . . .	111
<b>Chapter 7: Enzyme therapy: The European experience</b>	114
Why not immediately? . . . . .	115
A quite extraordinary man . . . . .	117
Protein and a blue rose . . . . .	120
What is the <i>normal substance</i> ? . . . . .	121
The Biological Research Institute of New York. . . . .	122
Artists, politicians, billionaires, stars . . . . .	125
The end and a beginning. . . . .	127

---

<b>Chapter 8: Remedies:</b>	<i>...brings no rewarding sympto...</i>	
<b>Efficacious and safe</b>	<i>...avoids haA misga...</i>	<b>129</b>
Correctly combined? . . . . .	<i>...reduces M ...</i>	130
A question of safety . . . . .	<i>...reduces A ...</i>	132
Not for everyone: The contraindications . . . . .	<i>...reduces C ...</i>	133
Interactions and side effects . . . . .	<i>...reduces S ...</i>	134
The point is, what is absorbed? . . . . .	<i>...reduces D ...</i>	137
To the journey's end . . . . .	<i>...reduces G ...</i>	140
<b>Chapter 9: Powers of defense:</b>	<i>...reduces C ...</i>	
<b>The body more than the doctor</b>	<i>...reduces B ...</i>	<b>145</b>
Identify, catch and consume enemies . . . . .	<i>...reduces C ...</i>	146
Immune complexes are not all equal . . . . .	<i>...reduces C ...</i>	152
We destroy ourselves: Autoaggression (autoimmunity) . . . . .	<i>...reduces C ...</i>	154
What can be done? . . . . .	<i>...reduces C ...</i>	157
The natural way to health recovery? . . . . .	<i>...reduces C ...</i>	160
<b>Chapter 10: Multiple sclerosis:</b>	<i>...reduces C ...</i>	
<b>The turning point</b>	<i>...reduces C ...</i>	<b>163</b>
The search for the error . . . . .	<i>...reduces C ...</i>	164
The best verification? . . . . .	<i>...reduces C ...</i>	168
Made-to-order MS treatment . . . . .	<i>...reduces C ...</i>	169
<b>Chapter 11: Arthritis and related disorders:</b>	<i>...reduces C ...</i>	
<b>Rheumatic joints: Patience rewarded</b>	<i>...reduces C ...</i>	<b>173</b>
Many suffer and few are helped . . . . .	<i>...reduces C ...</i>	176
More precious than gold . . . . .	<i>...reduces C ...</i>	179
A happy outcome . . . . .	<i>...reduces C ...</i>	182

---

<b>Chapter 12: Inflammation:</b>	
A beneficial process	185
Alarm at every wound.	185
Get the little devils going	187
The four classical signs	188
Clean-up and renovation	191
Errors, defects, chaos	193
Promotion of inflammation	195
<b>Chapter 13: Injuries:</b>	
Preparation is the key to it all	198
Hickeys and karate blows	198
Only the healthy can win	202
An operation is a deliberate injury	204
<b>Chapter 14: The vessels:</b>	
Everything flows	209
Never too much and never too little	211
Everything flows again with plasmin	215
Thrombi, cholesterol and other dangers	216
Leg ailments, much ado about nothing?	219
Demonstrable improvement	222
<b>Chapter 15: Cancer:</b>	
The enemy we know	227
On the trail	229
Do not lose control	231
A dirty trick	234
Illness protects against cancer	237
The limits and possibilities	241

---

Never forget the follow-up . . . . .	244
When the breast is in danger . . . . .	246
Chapter 16: Viruses: Dead or alive? . . . . .	248
Practically everybody has herpes – forever . . . . .	250
Attacking when our defenses are down . . . . .	251
Papilloma viruses and plant viruses: . . . . .	252
From dairy cow to orchid . . . . .	253
Protection from severe nerve pain . . . . .	255
Zoster and AIDS, the same principle? . . . . .	257
Just don't weaken . . . . .	259
Chapter 17: Age: The best brake . . . . .	263
Death awaits in a chromosome . . . . .	264
Eat little, live long . . . . .	266
Just don't make mistakes. . . . .	271
Not dying, just ceasing to live . . . . .	274
Chapter 18: The future: A world of health? . . . . .	276
Chapter 19: New developments and current status of enzyme therapy . . . . .	281
Once again, from the beginning: . . . . .	282
Overview of current status of oral enzyme therapy . . . . .	282
New drugs, new evidence . . . . .	283
Swollen ankles and muscle pains . . . . .	285
Oh dear, my tooth! . . . . .	288

Alleviation of rheumatic pain . . . . .	290
Help for women . . . . .	294
Pelvic inflammatory disease . . . . .	294
Benign cysts of the breast . . . . .	296
An approach to breast cancer. . . . .	296
When medicine harms us . . . . .	300
Can AIDS be treated? . . . . .	303
New insights into how enzymes work . . . . .	305
 Glossary of Medical Terms	307
 References	311
 Index	324
