

Obsah	Str.
<i>Simona Baluchová, Michaela Pejzlová, Anna Eremina, Blanka Horká, Andrew Taylor, Jan Fischer, Jan Krůšek, and Karolina Schwarzová-Pecková</i> Oxidation of Neurotransmitters on Boron-Doped Diamond Electrode in Physiological Media	9
<i>Simona Baluchová, Michal Zelenský, Andrew Taylor, Ladislav Fekete, Jan Fischer, Luděk Míka, Soumen Mandal, Oliver Williams, and Karolina Schwarzová-Pecková</i> Electrochemical Properties of Flat Boron-Doped Diamond Surfaces	14
<i>Martin Baroch, Šárka Sládková, and Hana Dejmková</i> Determination of Pesticide Chlortoluron by HPLC-ED with Carbon Felt Working Electrode	18
<i>Kateřina Bártová, Ishak Kovač, and Jana Jaklová Dytrtová</i> Gas Phase Oxidation of Terconazole	21
<i>Michaela Benkőová, Ján Híveš, and Emília Mališová</i> Measuring of the Electromotive Force of Al+TiB ₂ and Al-Al Cell	26
<i>Mariola Brycht, Andrzej Leniart, and Sławomira Skrzypek</i> Voltammetric Determination of Forchlorfenuron at Carbon-based Electrodes	31
<i>Andrea Červenková, Emília Mališová, and Ján Híveš</i> Electrical Conductivity of Low-Temperature Cryolite Electrolytes for Inovation Process in Aluminium Production	36
<i>Martina Čierna, Lucia Birošová, Ján Krahulec, and Miroslav Gál</i> Electrochemical Research of Disruption of E.coli Membranes	41
<i>Olivia Dakošová, Eva Melníková, and Miroslav Gál</i> Design and Utilization of 3D Printed Electrochemical Flow Cell	44
<i>Aleš Daňhel and Miroslav Fojta</i> Electrochemical Behaviour of Oligonucleotides Adsorbed on Pyrolytic Graphite Electrode	47
<i>Hana Dejmková and Dominika Giampaglia</i> Application of Pulsed Techniques in Order to Decrease the Passivation in Amperometric Detection	51
<i>Juraj Dian, Jana Hodačová, and Ivan Jelínek</i> Electrophoretic Study of Mono- and Bis-Triazamacrocyclic Derivatives	54
<i>Daniel Dobrovodský, Aleš Daňhel, and Miroslav Fojta</i> Use of Electrochemical Probes in DNA Structure Recognition in Adsorbed State at Hanging Mercury Drop Electrode	58
<i>Jan Fischer, Šárka Sládková, Hana Dejmková, Andrew Taylor, and Karolina Schwarzová-Pecková</i> Effect of Boron-Doping Level on Electrochemical Properties of Boron-Doped Diamond Electrodes	63
<i>Lukáš Fojt, Luděk Havran, and Bohumír Grüner</i> Electrochemistry of Boron Cluster Compounds Containing Bridging Ligands in Phosphate Buffers	66
<i>Miroslav Fojta, Aleš Daňhel, Daniel Dobrovodský, Vlastimil Dorčák, Stanislav Hasoň, Luděk Havran, Monika Hermanová, Martina Outlá, Veronika Ostatná, Hana Pivoňková, Zuzana Soldánová, and Jan Špaček</i> Recent Findings Indicate Paradigm Shift in Nucleic Acids Electrochemistry	71
<i>Luděk Havran, Bohumír Grüner, and Lukáš Fojt</i> Redox Active Labelling of DNA by Boron Cluster Compounds	74

<u>Monika Hermanová, Zuzana Bábková, Luděk Havran, Hana Pivoňková, and Miroslav Fojta</u> Influence of Flanking Sequences and Secondary DNA Structure on Electrochemical (In)Activity of Guanine in dG _n Blocs	77
<u>Vojtěch Hrdlička, and Tomáš Navrátil</u> The use of Boron Doped Diamond Electrode for Determination of 5-hydroxyindoleacetic Acid	81
<u>Lucia Hojová, Erika Mordačiková, Martin Vrška, Marian Vojs, Marian Marton, and Andrea Vojs Staňová</u> Electrochemical Oxidation of Sartans with Boron Doped Diamond Electrodes	85
<u>Marta Choinška, Vojtěch Hrdlička, and Tomáš Navrátil</u> Determination of Selected Drugs using 3D Printed Electrodes	89
<u>Jaromíra Chýlková, Alona Usenko, Renáta Šelešovská, Jiří Váňa, Miloš Sedlák, and Jan Bartáček</u> Simultaneous Determination of the Plant Growth Regulator Daminozide and its Degradation Product 1,1-Dimethylhydrazine	94
<u>Granit Jashari, Milan Sýs, Tomáš Mikysek, Radovan Metelka, and Ivan Švancara</u> Electrochemical Behaviour of β -Carotene at Different Working Electrodes	98
<u>Kristýna Jelšíková, Jan Klouda, and Karolina Schwarzová-Pecková</u> The Development of Electroanalytical Methods for Detection of Bile Acids Possessing 7 α Hydroxyl Group	102
<u>Leon Jenner, Dzmitry Pruchkouski, and Eva Sýkorová</u> Protein Interactors of Arabidopsis thaliana Telomerase RNA	105
<u>Radek Jerga, Petr Barták, and Jana Skopalová</u> Voltammetric Determination of Fentanyl and its Analogues	108
<u>Eliška Jiroušková, Radomír Čabala, and Romana Sokolová</u> Electrochemistry of 3-fluorophenmetrazine and 4-methylpentedrone	112
<u>Bohdan Josypčuk, Jan Langmaier and Sofiia Tvorynska</u> Preparation, Testing and Application of Amalgam Screen-Printed Electrodes	117
<u>Gylxhane Kastrati, Granit Jashari, Milan Sýs, Blanka Švecová, Tahir Arbneshi, Radovan Metelka, Zuzana Bílková, and Lucie Korecká</u> Simultaneous Adsorptive Stripping Square-Wave Voltammetric Determination of Vitamin E and Vitamin K in Food Supplements	122
<u>Lucie Koláčná, Alan Liška, and Jiří Ludvík</u> Electrochemistry of Phospholes	126
<u>Lucie Koláčná, Peter Polák, Jiří Klíma, Tomáš Tobrman, and Jiří Ludvík</u> EPR-Electrochemical Study of Reduction Mechanism of Pyrene-Cyclobutene Conjugates	130
<u>Roman Košťúr and Matilda Zemanová</u> EIS for Protective Layers on Iron Characterization and Development over Time	135
<u>Zuzana Kramplová, Andrea Purdešová, and Jozef Sokol</u> Use of Bare Boron Doped Diamond Electrode for Electrochemical Analysis of Pesticides in Water Samples as an Alternative or Complement to Conventional Methods	139
<u>Jan Langmaier and Zdeněk Samec</u> Ion Transfer Voltammetry across the Polarized Ionic Liquid/Water Interface: Base for Electrochemical Sensors	143
<u>Alan Liška, Philipp Frühwirth, Michael Haas, Jiří Ludvík, and Georg Gescheidt-Demner</u> Differences in Electrochemical Reduction of Mono- and Polynuclear Acylgermanes	147

<i>Karol Lušpai, Peter Rapta, Michal Zalibera, Denisa Darvasiová, and Vladimír Lukeš</i> EPR/UV-VIS-NIR Spectroelectrochemical Examination of The Association Properties of Thienoacene-Bridged Tetrathiafulvalenes Supported by DFT Calculations	151
<i>Barbora Martinková, Gylxhane Kastrati, Iveta Brožková, Tomáš Mikysek, Zuzana Bílková, and Lucie Korecká</i> Square-wave Voltammetric Detection of Ergosterol as an Indicator of Fungal Contamination of Foodstuff	155
<i>Oleksandr Matvieiev, Renáta Šelešovská, Marian Vojs, Marián Marton, and Jaromíra Chýlková</i> The First Study of the Electrochemical Behavior of Mephenoxalone and its Determination using Screen-Printed Sensors with Chemically Deposited Boron Doped Diamond Electrode	159
<i>Eva Melníková, Tatiana Galicová, Miroslav Gál, and Veronika Ostatná</i> Changes in Catalytical Response of Histones at Mercury Surface	164
<i>Radovan Metelka and Nela Halašková</i> Electrochemical Detection of Arsenic Using Screen-Printed Carbon Electrodes Modified with Gold	167
<i>Pavol Michniak, Marián Marton, Michal Hatala, Vlastimil Řeháček, Martin Vrška, Miroslav Behúl, and Marian Vojs</i> Boron Doped Diamond Electrodes Modified with Gold Nanoparticles for Melatonin Detection	171
<i>Tomáš Mikysek, Milan Sýs, and Miroslav Novák</i> Selected Copper (II) Complexes and their Catalytic Activity	176
<i>Erika Mordačíková, Marian Vojs, Marián Marton, Pavol Michniak, Adam Bořík, Roman Grabic, and Andrea Vojs Staňová</i> BDD Electrodes for Electrochemical Degradation of Iodinated Contrast Media	179
<i>Tomáš Navrátil, Marta Choiňská, Ivana Šestáková, and Vojtěch Hrdlička</i> Voltammetric Determination of Heavy Metals in Honeybee Venom using Hanging Mercury Drop Electrode and Carbon Conductive Filaments for 3D Printer	183
<i>Štěpánka Nováková Lachmanová, František Vavrek, Táňa Sebechlebská, Jakub Šebera, Viliam Kolivoška, Jan Lukášek, Nico Balzer, Michal Valášek, Marcel Mayor, and Magdaléna Hromadová</i> Electrochemical Characterization of Molecular Conductors Containing Redox Switching Element	188
<i>Anna Ondráčková, Monika Hermanová, Hana Pivoňková, and Miroslav Fojta</i> Voltammetric Detection of Selected Unnatural Bases in DNA Oligonucleotides	193
<i>František Opekar and Petr Tůma</i> Dialysis in Microliter Sample Volume Connected via Flow-gating Interface with Rapid Capillary Electrophoresis	196
<i>Eva Pospíšilová and Tatiana V. Shishkanova</i> Electrochemical Detection of 2-aminoindane	201
<i>Francesca Sabatini, Romana Sokolova, and Ilaria Degano</i> Looking into the Photo-stability of Eosin by Electrochemical Methods	206
<i>Jana Skopalová, Radek Jerga, Dana Štolbová, Monika Zajacová Cechová, Petr Cankar, and Petr Barták</i> Electrochemical Oxidation of Fentanyl and its Analogues	210

<i>Romana Sokolova, Michaela Oblukova, Milan Sys, Tomas Mikysek, Jakub Wantulok, Jacek Nycz, and Ilaria Degano</i> UV-Vis and IR Spectroelectrochemistry of Copper Complexes and Bioactive Compounds	214
<i>Vít Skoták, Božena Hosnedlová, Marta Kepinska, Milan Jakubek, Tomáš Parák, and Rene Kizek</i> The Brdička Reaction for the Study of Thermostable Proteins, especially Metallothionein in Urine	218
<i>Milan Sýs, Tomáš Mikysek, and Miroslav Novák</i> Catalytic Oxidation of Dopamine: Mushroom Tyrosinase vs. Dinuclear Copper(II) Complex	221
<i>Renáta Šelešovská, Oleksandr Matvieiev, Marian Vojs, Martin Vrška, and Jaromíra Chýlková</i> New Screen-Printed Sensors with Chemically Deposited Boron Doped Diamond Electrode – Electrochemical Properties and Application	225
<i>Ivana Šestáková, Daniela Křivská, and Tomáš Navrátil</i> Metallothioneins as Biomarker of Environmental Pollution	230
<i>Ludmila Šimková, David Dunlop, Alan Liška, and Jiří Ludvík</i> Electrochemical Study of Titanocen Difluoride and Difluoride Derivatives	234
<i>Libuše Trnková, Iveta Trísková, Alan Liška, and Jiří Ludvík</i> Oxidation Processes of N-methylguanines	239
<i>Petr Tůma and Dušan Koval</i> Monitoring of Ketamine Metabolism using Capillary Electrophoresis in PAMAPTAC Coated Capillaries	243
<i>Sofiia Tvorynska, Jiří Barek, and Bohdan Josypčuk</i> Comparison of the Covalent Laccase Immobilization at Amino- and Carboxyl-functionalized Mesoporous Silica, Glassy Carbon, and Graphite Powders Using Different Coupling Agents for Optimal Biosensor Preparation	248
<i>Alona Usenko, Jaromíra Chýlková, Jiří Váňa, Lenka Janíková, and Renáta Šelešovská</i> Application of Boron Doped Diamond Electrode for Voltammetric Monitoring of Quality of Phytostimulation Preparations	253
<i>Eva Vaněčková, Milan Bouša, Violetta Shestivska, Jiří Kubišta, Jiří Rathouský, Táňa Sebechlebská, and Viliam Kolivoška</i> Electroplating of 3D Printed Electrodes for Selective Electrochemical Reduction of CO ₂	257
<i>František Vavrek, Jakub Šebera, Olena Butsyk, Viliam Kolivoška, Gábor Mészáros, and Magdaléna Hromadová</i> Theoretical Interpretation of Single Molecule Conductance and Thermopower of Selected Model Molecules	262
<i>Marian Vojs, Pavol Michniak, Michal Hatala, Vlastimil Řeháček, Miroslav Behúl, Martin Vrška, and Marián Marton</i> Boron Doped Diamond Electrodes on Alumina Substrates	267
<i>Jana Záchenská and Matilda Zemanová</i> Electrochemical Preparation and Characterization of Polymetallic Catalysts for Hydrogen Economy	272
Rejstřík autorů	277
