

E. Auustyn, A. Derela, D. Ziemianski: Calibration of piezoelectric foil for long-term monitoring dynamic machine behavior	7
V. Bula, L. Pešek, C.S. Prasad: Development of rotating disk test rig with PIN friction contact for research of internal resonances and stability	9
M. Byrtus, L. Smolík: Transitions to chaos of kinematically excited bistable magnetic pendulum	13
S. Chindada, L. Pešek: 3D FE numerical modeling on pin-on-disk systems to study the origin of instabilities due to dry-friction contact	19
M. Hajžman, P. Polach, J. Hyrát, L. Smolík: Parameter identification and optimization in dynamics of large turbine rotors	27
G. Chwalik-Pilszyk, A. Krowiak, M.S. Kozień: Analytical analysis of random vibrations of a person using a wheelchair kinematically excited by road surface unevenness	31
D. Maturkanič, P. Procházka, R. Hodboď, E. Voronova, M.L. Mekhalfia: Modification of cooling system for laboratory measurement of rotor blade vibration	35
S. Mazahir, L. Pešek: State of the art manufacturing process: additive manufacturing of electrical machines and vibrations problems	39
M.L. Mekhalfia, P. Procházka, D. Maturkanič, E. Voronova, R. Hodboď,: Computational and experimental assessment of natural frequencies in a bladed disk system	47
L. Pešek, C.S. Prasad, P. Šnábl, S. Chindada: Numerical simulations of instabilities due to dry-friction dynamic contact of two subsystems	51
C.S. Prasad, P. Procházka, V. Skála, P. Šnábl: Experimental investigation of aeroacoustics of complex propeller system	61
V. Radolf, J. Horáček, J. Košina, P. Šnábl, A.-M. Laukkanen: Influence of vocal folds stiffness on vocal tract acoustic characteristics	65

K. Sowa, D. Ziemianski: Comparative analysis of vibration damping by SACHS and LEMFÖRDER suspension struts in VAG group vehicles	69
P. Šnábl, C.S. Prasad, L. Pešek, P. Procházka: Experimental blade cascade for aeroelastic studies in the presence of 3D flow structures: initial design idea	71
P. Šulc, S. Taborovec, V. Bula, P. Šnábl: Dynamic tensile experiments of hard rubber on Instron test machine under finite deformations	75
E. Voronova, P. Procházka, D. Maturkanič, M.L. Mekhalfia, R. Hodbod': Verification of the dynamic properties of a new model turbine wheel with free blades	79
J. Zapoměl, P. Ferfecki, M. Molčan, B. Drvárová, J. Kozánek: Modelling of rotating machines by a jeffcott-like rotor	85
Author index	89
