

CONTENTS

- 1 Behavior of predried mature concrete beams subject to partial wetting and drying cycles
Lenka Dohnalová, Petr Havlásek, Vít Šmilauer
- 6 Thermal Properties of Mineral Wool Insulation Recovered from construction and demolition waste
Mária Domonkos, Ondřej Zobal, Zdeněk Prošek, Jan Trejbal
- 11 Influence of oxygen and argon plasma treatment on wettability and surface morphology of polypropylene microfibers
Jakub Ďureje, Zdeněk Prošek, Jan Trejbal, Štěpán Potocký, Pavel Tesárek
- 15 A Modular Extension of a Finite Element Contact Implementation
Ondřej Faltus, Martin Horák
- 20 Heat transfer model verification for thermal monitoring system of integral bridges
Martin Jonáš, Jan Zatloukal
- 26 Benchmark VERCORS 2022: mechanical response of the prestressed concrete containment wall to ambient conditions
Štěpán Krátký, Petr Havlásek
- 32 Microstructure reconstruction via Artificial Neural Networks: A combination of causal and non-causal approach
Kryštof Latka, Martin Doškář, Jan Zeman
- 38 The Effect of sampling volume size on the apparent stiffness of jointed rock mass
Martin Lebeda, Petr Kabele
- 43 Comparison of FETI-based domain decomposition methods for topology optimization problems
Tomáš Medřický, Martin Doškář, Ivana Pultarová, Jan Zeman
- 50 Determination of Water Absorption Coefficient of Unfired Earth Materials Different in Used Clay and Ratio of Components
Barbora Mužíková, Tereza Plaček Otcovská, Pavel Padevět
- 56 Microstructure Modification of Cement Pastes using Nanosilica
Daniel Nachaj, Jiří Němeček, Jiří Němeček
- 63 Methylene Blue Test and Adsorption Capacity of Clays
Tereza Plaček Otcovská, Barbora Mužíková, Pavel Padevět
- 69 Environmental perspectives of fine grounded concrete powder: LCA case study of light-weight concrete block
Jan Pešta, Zdeněk Prošek
- 75 Sulphate corrosion of cement pastes with a high content of waste marble powder
Zdeněk Prošek, Pavel Tesárek
- 80 Mesh generation and mechanical tests of basic element cells of porous structures
Luboš Řehounek, Aleš Jíra
- 85 Adhesion test – testing of selected adhesives on fired clay
Kristýna Richterová, Pavel Heinrich, Petr Bílý
- 94 Detection of the presence of microorganisms during production of plasterboard
Hana Sekavová, Zdeněk Prošek, George Karra'a

- 98 Phase-field damage of laminated glass in explicit dynamics
Jaroslav Schmidt, Tomáš Janda
- 105 Finite Element Simulation of Shear and Compact Tension Tests on Timber
Eliška Šmídová, Petr Kabele
- 116 Steel elements with timber fire protection - experiment and numerical analysis
Stanislav Šulc, Jakub Šejna, Vít Šmilauer, František Wald
- 122 New Possibilities for Recycling of Mineral Wool Separated from Thermal Insulation Waste
Jan Trejbal, Ondřej Zobal, Mária Domonkos, Zdeněk Prošek
- 127 Influence of microstructure on rate-dependent response of unidirectional fibrous composites
Soňa Valentová, Michal Šejnoha, Jan Vorel, Zdeněk Prošek
- 133 Automatic Extraction of 3D Building Meshes from LiDAR Data
Jan Voříšek, Bořek Patzák, Daniel Rypl
- 138 Generation of Mesostructure for Lattice Discrete Particle Model
Jan Vozáb, Jan Vorel, Marco Marcon, Jan Podroužek, Roman Wan-Wendner
