Preface	xiii
----------------	-------------

1	Terminology, Modeling, and Measurement	1
1.1	Terminology.....	1
1.2	Modeling	3
1.3	Feedback	4
1.4	Measurement	6

2	Energy, Heat, Work, and Power of the Body	17
2.1	Conservation of Energy in the Body	18
2.2	Energy Changes in the Body	19

- 2.3 Work and Power 26
- 2.4 Heat Losses from the Body 30
 - 2.4.1 Heat Loss by Radiation 32
 - 2.4.2 Heat Loss by Convection..... 33
 - 2.4.3 Heat Loss by Evaporation 34
 - 2.4.4 Venous Blood Flow Helps Control
our Skin Temperature 35
 - 2.4.5 The Effect of Clothing—the Clo 35

3

Muscle and Forces

37

- 3.1 How Forces Affect the Body 37
 - 3.1.1 Some Effects of Gravity on the Body 38
 - 3.1.2 Electrical Forces in the Body..... 38
- 3.2 Frictional Forces 39
- 3.3 Forces, Muscles, and Joints 41
 - 3.3.1 Muscles and Their Classification 41
 - 3.3.2 Muscle Forces Involving Levers 43
 - 3.3.3 The Spinal Column 51
 - 3.3.4 Stability While Standing 54
 - 3.3.5 Lifting and Squatting 56
 - 3.3.6 Forces on the Hip and Thigh 59
- 3.4 Forces During Collisions 62
 - 3.4.1 Examples of Forces during Collisions..... 63
 - 3.4.2 Surviving Falls from Great Heights 65
 - 3.4.3 Collisions Involving Vehicles..... 65
 - 3.4.4 Effects of Acceleration on Humans..... 67
 - 3.4.5 Oscillatory Motion 68
- 3.5 Physics of Teeth 71
 - 3.5.1 Forces in Normal Teeth 71
 - 3.5.2 Some Simple Cases of the Physics in
Orthodontics 76
 - 3.5.3 Crowns, Bridges, and Implants 78

4 Physics of the Skeleton 85

4.1 The Composition of Bone..... 88

4.2 The Strength of Bones..... 91

4.3 Lubrication of Bone Joints..... 103

4.4 Measurement of Bone Mineral in the Body..... 105

5 Pressure in the Body 111

5.1 Measurement of Pressure in the Body 114

5.2 Pressure Inside the Skull..... 116

5.3 Pressure in the Eye..... 117

5.4 Pressure in the Digestive System..... 118

5.5 Pressure (Stress) in the Skeleton..... 119

5.6 Pressure in the Urinary Bladder..... 121

5.7 Pressure Effects While Diving..... 122

5.8 Hyperbaric Oxygen Therapy (HOT) 126

6 Osmosis and the Kidneys 127
by Russell K. Hobbie

6.1 How Substances Are Transported in Fluids 127

 6.1.1 Solvent Drag 127

 6.1.2 Diffusion 128

 6.1.3 Bulk Flow vs. Diffusion..... 129

6.2 How Substances Are Transported Through
 Membranes 130

 6.2.1 Diffusion and Solvent Drag 130

 6.2.2 Osmotic Pressure 131

 6.2.3 Active Transport—Going the Wrong Way 133

6.3 Regulation of the Interstitial Fluid 133

6.4 The Kidney..... 136

6.5 The Artificial Kidney..... 139

7 Physics of the Lungs and Breathing 143

7.1	The Airways	146
7.2	How the Blood and Lungs Interact	148
7.3	Measurement of Lung Volumes	156
7.4	Pressure-Airflow-Volume Relationships of the Lungs. ...	159
7.5	Physics of the Alveoli.	165
7.6	The Breathing Mechanism.	170
7.7	Airway Resistance.	174
7.8	The Work of Breathing	176
7.9	Physics of Some Common Lung Diseases	178

8 Physics of the Cardiovascular System 181

8.1	Major Components of the Cardiovascular System	182
8.2	O ₂ and CO ₂ Exchange in the Capillary System	188
8.3	Work Done by the Heart	189
8.4	Blood Pressure and Its Measurement	191
8.5	Pressure across the Blood Vessel Wall (Transmural Pressure)	196
8.6	Bernoulli's Principle Applied to the Cardiovascular System.	197
8.7	How Fast Does Your Blood Flow?	199
8.8	Blood Flow—Laminar and Turbulent	203
8.9	Heart Sounds.	206
8.10	The Physics of Some Cardiovascular Diseases	208
8.11	Some Other Functions of Blood	212

9 Electrical Signals from the Body 215

9.1	The Nervous System and the Neuron	217
9.2	Electric Potentials of Nerves	219
9.3	Electrical Signals from Muscles— The Electromyogram	225
9.4	Electrical Signals from the Heart— The Electrocardiogram	233
9.5	Electrical Signals from the Brain— The Electroencephalogram	242

9.6 Electrical Signals from the Eye—
 The Electroretinogram and the Electrooculogram..... 248

9.7 Magnetic Signals from the Heart and Brain—The
 Magnetocardiogram and the Magnetoencephalogram. 251

9.8 Current Research Involving Electricity in the Body..... 255

10

Sound and Speech

257

10.1 General Properties of Sound 258

 10.1.1 Physical Properties of Sound 258

 10.1.2 Sound Intensity Level—The Decibel (dB) 261

 10.1.3 Reflection and Transmission of Sound
 at Barriers 263

10.2 The Body as a Drum (Percussion in Medicine) 266

10.3 The Stethoscope 268

10.4 The Production of Speech (Phonation)..... 271

 10.4.1 Voice Word Power 276

 10.4.2 Looking at the Vocal Cords 277

11

Physics of the Ear and Hearing

279

11.1 The Ear and Hearing 280

11.2 The Outer Ear 282

11.3 The Middle Ear 285

11.4 The Eustachian Tubes 288

11.5 The Inner Ear..... 289

11.6 Hair Cells Play the Dominant Role in the
 Detection of Sound..... 293

11.7 Sensitivity of the Ears 294

11.8 Testing Your Hearing..... 296

 11.8.1 Pure Tone Audiometry 297

 11.8.2 Measuring Immitance of the Middle Ear..... 298

11.9 Deafness and Hearing Aids 301

 11.9.1 Conduction and Nerve Associated
 Hearing Loss 302

 11.9.2 Hearing Aids 303

11.10 The Vestibular Sense System—Our Hidden Sense
 of Balance 305

12 Physics of the Eyes and Vision 307

12.1	Focusing Elements of the Eye.....	311
12.2	Some Other Elements of the Eye.....	313
12.3	The Retina—The Light Detector of the Eye.....	315
12.4	The Threshold of Vision	321
12.5	Diffraction Effects on the Eye	322
12.6	Visual Acuity—How Sharp Are Your Eyes?.....	324
12.7	Optical Illusions and Related Phenomena	329
12.8	Defective Vision and Its Correction	336
12.9	Color Vision and Chromatic Aberration	347
12.10	Instruments Used in Ophthalmology	349

General and Chapter References 359

Appendix A—Standard Man 369

Appendix B—Exponential Behavior and Logarithms 371

Index 377
