

# Table of Contents

## Preface

---

## Section 1: Creating Your Database

### 1

#### Background Concepts

---

Introducing databases	4	The MySQL layers	13
Database architecture	5		
MS Access as a database	6	Storage engines (InnoDB and MyRocks)	16
Database management system	7	ACID compliance	16
RDBMS	8		
Exploring MySQL	9	Data modeling	17
Data types	10	Normalization	19
Exercise 1.01: Organizing data in a relational format	11	Activity 1.01: Creating an optimized table for an employee project	21
Exploring MySQL architecture	12	Summary	22

### 2

#### Creating a Database

---

Developing databases	24	Accessing MySQL through the command-line interface	32
The MySQL Workbench GUI	24	Creating a database	32
Connecting the Workbench GUI to MySQL	27		
Exercise 2.01 – creating a connection with the MySQL Workbench GUI	27	Exercise 2.02 – creating the autoclub database	33

<b>Using Workbench to add a table</b>	<b>34</b>	<b>Reverse engineering a database</b>	<b>58</b>
Importing objects from a SQL script file	40	Exercise 2.06 – creating an EER model from the autoclub database	61
Exercise 2.03 – importing tables from an SQL script file	41	Exercise 2.07 – using the EER diagram and forward engineering to manage the database model	67
<b>MySQL table indexes and foreign keys</b>	<b>45</b>	Exercise 2.08 – committing model changes to the production database with Synchronize Model	77
Indexes	45	<b>Activity 2.01 – modifying the EER diagram, the model, and the database</b>	<b>81</b>
Exercise 2.04 – creating an index	46	<b>Summary</b>	<b>82</b>
Indexes on multiple columns	49		
Foreign keys	51		
Exercise 2.05 – creating a foreign key	53		

### 3

## Using SQL to Work with a Database

<b>An introduction to working with databases using SQL</b>	<b>84</b>	<b>SQL queries to create indexes and foreign keys</b>	<b>99</b>
<b>Working with data</b>	<b>85</b>	Exercise 3.05 – creating tables with indexes and foreign keys	100
Types of SQL statements	85	<b>Activity 3.1 – creating a table with indexes and foreign keys</b>	<b>105</b>
<b>Backing up databases</b>	<b>86</b>	<b>Altering table queries</b>	<b>106</b>
Exercise 3.01 – Backing up the autoclub database	88	Exercise 3.06 – modifying an existing table	107
<b>Restoring databases</b>	<b>89</b>	<b>Adding data to a table</b>	<b>110</b>
Exercise 3.02 – restoring the autoclub database	91	Exercise 3.07 – adding a single record to a members table	110
<b>Working with SQL code to maintain a database</b>	<b>92</b>	<b>Updating data in a record</b>	<b>113</b>
<b>Creating a new database</b>	<b>92</b>	Exercise 3.08 – updating a record	113
Exercise 3.03 – creating a new database	93	<b>Deleting data from tables</b>	<b>116</b>
<b>Creating and modifying tables</b>	<b>95</b>	Drop queries	117
Exercise 3.04 – creating a new table	95		

<b>Blobs, files, and file paths</b>	<b>118</b>	<b>Activity 3.2 – adding image file paths to the database</b>	<b>126</b>
Exercise 3.09 – files and blobs	119	Summary	127
Files and file paths	121		

## 4

### Selecting, Aggregating, and Applying Functions

<b>An introduction to querying data</b>	<b>130</b>	<b>Exercise 4.03 – using functions</b>	<b>144</b>
<b>Querying tables in MySQL</b>	<b>130</b>	<b>Aggregating data</b>	<b>147</b>
Exercise 4.01 – working with simple queries	132	Exercise 4.04 – aggregating data	150
Filtering results	133	Case statements	152
Exercise 4.02 – filtering results	136	Exercise 4.05 – writing case statements	153
Using functions on data	138	Activity 4.01 – collecting information for a travel article	154
Math functions	138	Summary	155
String functions	140		
Date and time functions	142		

## Section 2: Managing Your Database

## 5

### Correlating Data across Tables

<b>Introduction to processing data across tables</b>	<b>160</b>	<b>Exercise 5.03: Using a CTE</b>	<b>178</b>
<b>Joining two tables</b>	<b>160</b>	<b>Analyzing query performance with EXPLAIN</b>	<b>182</b>
Accidental cross joins	163	Exercise 5.04: Using EXPLAIN	189
LEFT JOIN versus INNER JOIN	164	Activity 5.01: The Sakila video store	195
Exercise 5.01: Joining two tables	168	Activity 5.02: Generating a list of years	197
<b>Analyzing subqueries</b>	<b>169</b>	Summary	198
Dependent subqueries	170		
Exercise 5.02: Using a subquery	171		
<b>Common table expressions</b>	<b>173</b>		
Recursive CTE	174		

## 6

### Stored Procedures and Other Objects

<b>Introduction to database objects</b>	<b>200</b>	<b>Exercise 6.04 – stored procedures and parameters</b>	<b>213</b>
<b>Exploring various database objects</b>	<b>200</b>	<b>Working with IN, OUT, and INOUT</b>	<b>215</b>
<b>Working with views</b>	<b>201</b>	<b>Exercise 6.05 – IN and INOUT</b>	<b>216</b>
Exercise 6.01 – creating a mailing list with a view	201	<b>Exploring triggers</b>	<b>221</b>
Updatable views	204	Advantages of triggers	221
<b>Activity 6.01 – updating the data in a view</b>	<b>206</b>	Disadvantages of triggers	222
<b>Working with user-defined functions</b>	<b>207</b>	Restrictions with triggers	222
Exercise 6.02 – creating a function	208	Exercise 6.06 – triggers to enforce business rules	222
<b>Working with stored procedures</b>	<b>211</b>	<b>Using transactions</b>	<b>228</b>
Exercise 6.03 – creating a stored procedure	212	Exercise 6.07 – implementing a transaction	229
		<b>Summary</b>	<b>231</b>

## 7

### Creating Database Clients in Node.js

<b>Introduction to database management with Node.js</b>	<b>234</b>	<b>Recovering from accidental data deletion</b>	<b>240</b>
<b>Best practices for SQL client development</b>	<b>235</b>	<b>Exercise 7.01 – safely deleting records</b>	<b>241</b>
Installing a development MySQL server	235	<b>JavaScript using Node.js</b>	<b>243</b>
Creating a development MySQL server	236	Setting up Node.js	244
Backing up before making changes	237	Getting started with Node.js	248
Restoring a database	239	Basics of Node.js	251
		Exercise 7.02 – basic output in the console	253

Exercise 7.03 – testing outputs in a browser	254	Creating databases in Node.js	270
Writing outputs to files	256	Exercise 7.07 – creating a new database	271
Exercise 7.04 – writing to a disk file	257	Creating tables in Node.js	273
<b>Connecting to MySQL</b>	<b>259</b>	Exercise 7.08 – creating a table in a database	274
Exercise 7.05 – connecting to the MySQL server	261	<b>Activity 7.01 – building a database application with Node.js</b>	<b>276</b>
Troubleshooting connection errors	263	<b>Summary</b>	<b>279</b>
Modularizing the MySQL connection	267		
Exercise 7.06 – modularizing the MySQL connection	268		

## 8

### Working with Data Using Node.js

<b>Interacting with databases</b>	<b>282</b>	<b>ODBC connections</b>	<b>312</b>
<b>Inserting records in Node.js</b>	<b>282</b>	Types of DSNs	313
Exercise 8.01 – inserting a record into a table	284	Determining whether ODBC drivers have been installed	315
Inserting multiple records	288	Local, LAN, and remote ODBC connections	318
Exercise 8.02 – inserting multiple records into a table	288	Exercise 8.06 – creating a LAN or remote DSN/ODBC connection to the world_statistics database	319
Inserting with multiple fields	292	Creating file DSN/ODBC connections	322
Exercise 8.03 – populating records from the existing tables	293	<b>Activity 8.02 – designing a customer database</b>	<b>326</b>
<b>Updating the records of a table</b>	<b>296</b>	<b>Summary</b>	<b>328</b>
Exercise 8.04 – updating a single record	298		
<b>Activity 8.01 – multiple updates</b>	<b>302</b>		
<b>Displaying data in browsers</b>	<b>304</b>		
Exercise 8.05 – formatting data to the web browser	307		

## Section 3: Querying Your Database

### 9

#### Microsoft Access – Part 1

Introduction to MS Access	332	Migrating with wizards	348
MS Access database application configurations	333	Exercise 9.04 – using the Workbench Migration Wizard to upsize the table	349
Upsizing an MS Access database to MySQL	335	Linking to your tables and views	361
Exercise 9.01 – preparing your MySQL database and ODBC	338	Exercise 9.05 – linking a good MySQL table to Access	362
Manually exporting MS Access tables	340	Exercise 9.07 – linking a problematic MySQL table to Access	366
Exercise 9.02 – manually upsizing a table	341	Refreshing linked MySQL tables	368
Adjusting field properties	344	Activity 9.01 – linking the remaining MySQL tables to your MS Access database	369
Exercise 9.03 – manually migrating tables and adjusting their field properties	345	Summary	370

### 10

#### Microsoft Access – Part 2

Introduction to MS Access	372	Activity 10.02 – Creating a function and calling it	380
Migrating an MS Access application to MySQL	372	Calling MySQL stored procedures	382
Passthrough queries	372	Exercise 10.03 – Calling a MySQL stored procedure	382
Exercise 10.01 – Passthrough (simple SQL conversion)	373	Activity 10.03 – Creating MySQL stored procedures and using them in VBA	386
Activity 10.01 – Converting gender and job statistics	377	Using parameters	387
Calling MySQL functions	379	Parameterized stored procedures	388
Exercise 10.02 – Passthrough (calling MySQL functions)	379		

Exercise 10.04 – Parameterized stored procedure (series list)	388	<b>The Bad Bits form</b>	<b>401</b>
<b>Activity 10.04 – Parameterized stored procedure (series list)</b>	<b>390</b>	Exercise 10.07 – Bad Bits demonstration	402
Exercise 10.05 – Multiple parameters stored procedure (country list)	391	Unbound forms	404
<b>Activity 10.05 – Multiple parameters stored procedure (date list)</b>	<b>395</b>	Another way to unbind a form from a linked table	410
Exercise 10.06 – Multiple parameters stored procedure (crosstab queries)	396	Exercise 10.08 – Removing all linked tables	410
		<b>Summary</b>	<b>412</b>

## 11

### MS Excel VBA and MySQL – Part 1

<b>Introduction to Excel</b>	<b>414</b>	Exercise 11.07 – Creating a connection function	435
Exercise 11.01 – Setting up a sample MySQL database	415	<b>Reading data from MySQL using VBA</b>	<b>440</b>
<b>Exploring the ODBC connection</b>	<b>417</b>	Exercise 11.08 – ReadGenreSales	440
The Developer menu	417	Exercise 11.09 – Genre dropdown	447
Exercise 11.02 – Activating the Developer tab and the VBA IDE	417	Auto-running functions when opening a workbook	450
<b>Exploring the Excel VBA structure</b>	<b>421</b>	Exercise 11.10 – Auto-running functions when opening a workbook	451
Preparing your Excel project	421	<b>Populating charts</b>	<b>452</b>
Exercise 11.03 – Creating a code module	422	Populating a chart – Genre sales	452
<b>Learning about VBA libraries</b>	<b>426</b>	Exercise 11.11 – Loading Genre Sales chart data	453
Exercise 11.04 – Referencing a library	426	Running code on changes to a document	456
Exercise 11.05 – Inserting worksheets	429	Exercise 11.12 – Detecting and working with worksheet changes	456
<b>Connecting to the MySQL database using VBA</b>	<b>431</b>	<b>Activity 11.01 – Creating a chart (artist track sales)</b>	<b>461</b>
Setting the scene	431	<b>Summary</b>	<b>464</b>
Exercise 11.06 – The connection variable	432		
Connection functions in VBA	434		

## 12

### Working With Microsoft Excel VBA – Part 2

An introduction to MySQL connections	466	Inserting data using MySQL for Excel	484
Connecting to the MySQL database using ODBC	466	Exercise 12.04 – inserting the top 25 selling artists	484
Exercise 12.01 – creating a DSN connection function	467	Updating data using MySQL for Excel	488
Exploring generic data read functions	475	Exercise 12.05 – updating MySQL data – employees	489
Exercise 12.02 – a generic data reader	476	Pushing data from Excel	494
Creating connections to MySQL in Excel	480	Exercise 12.06 – pushing data from Excel to a new MySQL table	494
Exercise 12.03 – creating a connection to MySQL	480	Pivot tables	498
		Exercise 12.07 – album sales	498
		Activity 12.01 – building a MySQL-based Excel document	511
		Summary	511

## Section 4: Protecting Your Database

## 13

### Getting Data into MySQL

An introduction to data preparation	516	Inserting documents	523
Working with the X DevAPI	516	Exercise 13.02 – inserting documents into a table	525
An example of the X DevAPI	520	Loading data from a SQL file	527
Using MySQL Shell with the X DevAPI	520	Exercise 13.03 – loading data from a SQL file and viewing tables	528
Exercise 13.01 – inserting values with MySQL Shell in JS mode	521	Exercise 13.04 – importing a SQL file using MySQL Workbench	530

<b>Loading data from a CSV file</b>	<b>533</b>	<b>Searching and filtering JSON documents</b>	<b>545</b>
The SELECT...INTO OUTFILE Format	533	Exercise 13.09 – Searching collections and filtering documents	553
The LOAD DATA INFILE...INTO format	534	<b>Using JSON functions and operators to query JSON columns</b>	<b>556</b>
Exercise 13.05 – loading data from a CSV file	534	Exercise 13.10 – querying JSON data with SQL	561
<b>Loading data from a JSON file</b>	<b>536</b>	<b>Using generated columns to query and index JSON data</b>	<b>563</b>
Exercise 13.06 – loading data from a JSON file	537	<b>Activity 13.01 – Exporting report data to CSV for Excel</b>	<b>565</b>
<b>Using the CSV storage engine to export data</b>	<b>539</b>	<b>Summary</b>	<b>566</b>
Exercise 13.07 – utilizing the CSV storage engine to export data	540		
<b>Using the CSV storage engine to import data</b>	<b>542</b>		
Exercise 13.08 – utilizing the CSV storage engine to import data	543		

## 14

### Manipulating User Permissions

<b>Introduction to user permissions</b>	<b>568</b>	<b>Changing permissions</b>	<b>578</b>
<b>Exploring users and accounts</b>	<b>569</b>	Exercise 14.02 – modifying users and revoking permissions	579
How to connect to MySQL with a set of credentials	569	<b>Using roles</b>	<b>581</b>
Creating, modifying, and dropping a user	570	Exercise 14.03 – using roles to manage permissions	582
Granting permissions	571	<b>Troubleshooting access problems</b>	<b>583</b>
Inspecting users	572	Activity 14.01 – creating users for managing the world schema	585
<b>Exercise 14.01 – creating users and granting permissions</b>	<b>575</b>	<b>Summary</b>	<b>585</b>
<b>Changing users</b>	<b>577</b>		
<b>Flush privileges</b>	<b>578</b>
