

Table of Contents

Preface.....	xiii
1. Installing MySQL.....	1
MySQL Forks	2
MySQL Community Edition	2
Percona Server for MySQL	2
MariaDB Server	2
MySQL Enterprise Edition	2
Installation Choices and Platforms	3
1. Download the Distribution that You Want to Install	4
2. Install the Distribution	4
3. Perform Any Necessary Post-Installation Setup	4
4. Run Benchmarks	4
Installing MySQL on Linux	5
Installing MySQL on CentOS 7	5
Installing MySQL on CentOS 8	12
Installing MySQL on Ubuntu 20.04 LTS (Focal Fossa)	19
Installing MySQL on macOS Big Sur	27
Installing MySQL on Windows 10	33
The Contents of the MySQL Directory	40
MySQL 5.7 Default Files	41
MySQL 8.0 Default Files	44
Using the Command-Line Interface	44
Using Docker	45
Installing Docker	45
Using Sandboxes	50
Installing DBdeployer	51

Using DBdeployer	51
Upgrading MySQL Server	54
2. Modeling and Designing Databases.....	59
How Not to Develop a Database	59
The Database Design Process	62
The Entity Relationship Model	62
Representing Entities	63
Representing Relationships	66
Partial and Total Participation	67
Entity or Attribute?	68
Entity or Relationship?	70
Intermediate Entities	71
Weak and Strong Entities	72
Database Normalization	74
Normalizing an Example Table	76
First Normal Form: No Repeating Groups	76
Second Normal Form: Eliminate Redundant Data	76
Third Normal Form: Eliminate Data Not Dependent on Key	77
Entity Relationship Modeling Examples	77
Using the Entity Relationship Model	83
Mapping Entities and Relationships to Database Tables	83
Creating a Bank Database ER Model	84
Converting the EER to a MySQL Database Using Workbench	85
3. Basic SQL.....	89
Using the sakila Database	90
The SELECT Statement and Basic Querying Techniques	92
Single-Table SELECTs	93
Choosing Columns	94
Selecting Rows with the WHERE Clause	96
The ORDER BY Clause	105
The LIMIT Clause	107
Joining Two Tables	109
The INSERT Statement	111
INSERT Basics	111
Alternative Syntaxes	114
The DELETE Statement	117
DELETE Basics	117
Using WHERE, ORDER BY, and LIMIT	118
Removing All Rows with TRUNCATE	119

120	The UPDATE Statement
120	Examples
121	Using WHERE, ORDER BY, and LIMIT
121	Exploring Databases and Tables with SHOW and mysqlshow
127	4. Working with Database Structures.....
127	Creating and Using Databases
130	Creating Tables
130	Basics
133	Collation and Character Sets
135	Other Features
138	Column Types
161	Keys and Indexes
167	The AUTO_INCREMENT Feature
170	Altering Structures
170	Adding, Removing, and Changing Columns
174	Adding, Removing, and Changing Indexes
176	Renaming Tables and Altering Other Structures
177	Deleting Structures
177	Dropping Databases
178	Removing Tables
179	5. Advanced Querying.....
179	Aliases
180	Column Aliases
182	Table Aliases
185	Aggregating Data
185	The DISTINCT Clause
187	The GROUP BY Clause
195	The HAVING Clause
197	Advanced Joins
197	The Inner Join
200	The Union
206	The Left and Right Joins
211	The Natural Join
212	Constant Expressions in Joins
215	Nested Queries
215	Nested Query Basics
218	The ANY, SOME, ALL, IN, and NOT IN Clauses
225	The EXISTS and NOT EXISTS Clauses
231	Nested Queries in the FROM Clause

Nested Queries in JOINS	233
User Variables	234
6. Transactions and Locking.....	239
Isolation Levels	241
REPEATABLE READ	242
READ COMMITTED	243
READ UNCOMMITTED	244
SERIALIZABLE	245
Locking	248
Metadata Locks	249
Row Locks	254
Deadlocks	257
MySQL Parameters Related to Isolation and Locks	259
7. Doing More with MySQL.....	261
Inserting Data Using Queries	261
Loading Data from Comma-Delimited Files	267
Writing Data into Comma-Delimited Files	274
Creating Tables with Queries	277
Performing Updates and Deletes with Multiple Tables	281
Deletion	281
Updates	286
Replacing Data	288
The EXPLAIN Statement	292
Alternative Storage Engines	297
InnoDB	300
MyISAM and Aria	301
MyRocks and TokuDB	302
Other Table Types	304
8. Managing Users and Privileges.....	307
Understanding Users and Privileges	307
The root User	309
Creating and Using New Users	310
Grant Tables	317
User Management Commands and Logging	319
Modifying and Dropping Users	321
Modifying a User	321
Dropping a User	325
Privileges	328

Static Versus Dynamic Privileges	330
The SUPER Privilege	331
Privilege Management Commands	332
Checking Privileges	335
The GRANT OPTION Privilege	337
Roles	341
Changing root's Password and Insecure Startup	347
Some Ideas for Secure Setup	349
9. Using Option Files.....	351
Structure of the Option File	351
Scope of Options	356
Search Order for Option Files	359
Special Option Files	360
Login Path Configuration File	360
Persistent System Variables Configuration File	362
Determining the Options in Effect	364
10. Backups and Recovery.....	369
Physical and Logical Backups	370
Logical Backups	370
Physical Backups	372
Overview of Logical and Physical Backups	373
Replication as a Backup Tool	374
Infrastructure Failure	375
Deployment Bug	375
The mysqldump Program	376
Bootstrapping Replication with mysqldump	382
Loading Data from a SQL Dump File	382
mysqldump	383
mydumper and myloader	385
Cold Backup and Filesystem Snapshots	387
Percona XtraBackup	388
Backing Up and Recovering	390
Advanced Features	393
Incremental Backups with XtraBackup	394
Other Physical Backup Tools	396
MySQL Enterprise Backup	396
mariabackup	396
Point-in-Time Recovery	397
Technical Background on Binary Logs	398

Preserving Binary Logs	399
Identifying a PITR Target	399
Point-in-Time-Recovery Example: XtraBackup	401
Point-in-Time-Recovery Example: mysqldump	402
Exporting and Importing InnoDB Tablespaces	402
Technical Background	403
Exporting a Tablespace	403
Importing a Tablespace	405
XtraBackup Single-Table Restore	406
Testing and Verifying Your Backups	407
Database Backup Strategy Primer	409
11. Configuring and Tuning the Server.....	411
The MySQL Server Daemon	411
MySQL Server Variables	412
Checking Server Settings	412
Best Practices	413
12. Monitoring MySQL Servers.....	427
Operating System Metrics	428
CPU	428
Disk	436
Memory	441
Network	446
MySQL Server Observability	450
Status Variables	451
Basic Monitoring Recipes	453
The Slow Query Log	467
InnoDB Engine Status Report	471
Investigation Methods	474
The USE Method	474
RED Method	476
MySQL Monitoring Tools	477
Incident/Diagnostic and Manual Data Collection	482
Gathering System Status Variable Values Periodically	483
Using pt-stalk to Collect MySQL and OS Metrics	484
Extended Manual Data Collection	485
13. High Availability.....	489
Asynchronous Replication	490
Basic Parameters to Set on the Source and the Replica	492

Creating a Replica Using PerconaXtraBackup	493
Creating a Replica Using the Clone Plugin	495
Creating a Replica Using mysqldump	498
Creating a Replica Using mydumper and myloader	499
Group Replication	501
Synchronous Replication	507
Galera/PXC Cluster	509
14. MySQL in the Cloud.....	513
Database-as-a-Service (DBaaS)	513
Amazon RDS for MySQL/MariaDB	514
Google Cloud SQL for MySQL	519
Azure SQL	523
Amazon Aurora	526
MySQL Cloud Instances	527
MySQL in Kubernetes	527
Deploying Percona XtraDB Cluster in Kubernetes	529
15. Load Balancing MySQL.....	535
Load Balancing with Application Drivers	535
ProxySQL Load Balancer	536
Installing and Configuring ProxySQL	538
HAProxy Load Balancer	542
Installing and Configuring HAProxy	543
MySQL Router	547
16. Miscellaneous Topics.....	553
MySQL Shell	553
Installing MySQL Shell	553
Installing MySQL Shell on Ubuntu 20.04 Focal Fossa	553
Installing MySQL Shell on CentOS 8	554
Deploying a Sandbox InnoDB Cluster with MySQL Shell	555
MySQL Shell Utilities	559
Flame Graphs	563
Building MySQL from Source	565
Building MySQL for Ubuntu Focal Fossa and ARM Processors	566
Analyzing a MySQL Crash	570
Index.....	577
