

Contents

Author	iv
1 Introduction	1
1.1 Electron microscopy and spectroscopy	1
1.2 Nanophotonics	3
1.3 Marriage of electrons and photons	4
2 Electron spectroscopy	7
2.1 Vibrational electron energy-loss spectroscopy	7
2.1.1 Molecular vibrations	7
2.1.2 Phonon polaritons	8
2.1.3 Infrared plasmon polaritons	9
2.1.4 Coupled plasmon-phonon polaritons	10
2.2 Electron spectroscopy in the visible spectral range	10
2.2.1 Excitons	11
2.2.2 Localized surface plasmons and plasmon polaritons	11
2.2.3 Nonlinear plasmonic response	12
3 Generation and applications of shaped electron beams	13
3.1 Generation of shaped electron beams with light	13
3.2 Applications of shaped electron beams	14
4 Conclusion and outlook	16
4.1 Improvements in instrumentation	16
4.2 New applications and methodology in electron microscopy and spectroscopy	17
5 References	20
Abstract	27
