

CONTENTS

Spatial versus spatiotemporal Bayesian hierarchical models in disease mapping	
<i>Juan Jose Abellan, Sylvia Richardson, Nicky Best</i>	1
Multivariate prediction of hourly non-methane level for State of Kuwait.	
<i>Fahima Al-Awadhi</i>	2
Advanced Statistical Techniques Applied for the Air Pollution Data for Kuwait	
<i>Shafiqah Al-Awadhi</i>	3
The Environmental Knowledge and Attitude of the People of the Northern Batinah Region, Sultanate of Oman	
<i>Ahmed Mohamed Al-Saidi</i>	4
Scheff'e-type Confidence Bands for Low-Dose Risk Estimation	
<i>Obaid Al-Saidy</i>	5
Monthly Average Temperature Modelling for Valle del Cauca (Colombia)	
<i>Mercedes Andrade Bejarano</i>	6
Entropy-based thresholding for filtering and prediction	
<i>Jose M. Angulo, Ana E. Madrid, Maria D. Ruiz-Medina</i>	7
Monitoring atmospheric radiation: Modelling vertical radioactivity profiles	
<i>Jaromír Antoch, Daniel Hlubinka</i>	8
Bayesian Inference for Spatial Extreme Rainfall	
<i>Jonathan Atyeo, David Walshaw</i>	9

Passive air sampling for assessment of ecological and human health risk potential	
<i>Tomas Bartos, Zuzana Flegrova, Pavel Cupr, Jana Klanova, Ivan Holoubek</i>	10
Characterisation of extreme rainfall events via a hidden Markov model.	
<i>Bruno Betrò, Antonella Bodini, Quirico A. Cossu</i>	11
Statistical Approaches to Environmental Spatial Surveillance	
<i>Annibale Biggeri, Dolores Catelan</i>	12
Global Change and Natural Variability	
<i>Peter Bloomfield</i>	13
State-space model for multi-compartmental indoor Radon concentration monitoring	
<i>Marek Brabec, Karel Jilek</i>	14
Probabilistic risk modeling at the wildland-urban interface: the 2003 Cedar Fire	
<i>David R. Brillinger</i>	15
A spatio-temporal model for data generated by heterogeneous spatial processes	
<i>Francesca Bruno, Daniela Cocchi</i>	16
Notes on the use of the Goldfeld-Quandt test against heteroscedasticity in environmental research	
<i>Anna Budka, Maria Kozłowska</i>	17
Comparing of methods for calculating confidence limits in dose-response modeling	
<i>Petr Bureš</i>	18
Extreme value analysis of output from complex environmental models	
<i>Adam Butler</i>	19
A Hierarchical Bayesian Space-Time Model to Analyse the Spatio-Temporal Distribution of the Precipitation in the Italian Area	
<i>Barbara Cafarelli, Massimiliano Copetti</i>	20

Application of multivariate geostatistics to describe soil pollution by heavy metals in Northwestern Croatia	
<i>Annamaria Castrignano, Marija Romić</i>	21
Comprehensive data analyses with SPSS	
<i>Lubomíra Červová</i>	22
Semiparametric Estimation of Nonstationary Spatial Covariance	
<i>Ya-Mei Chang, Nan-Jung Hsu, Hsin-Cheng Huang</i>	23
Latent Health Factor Modeling for Monitoring Ecosystem Health	
<i>Grace Chiu, Peter Guttorp, Anton Westveld</i>	24
Bayesian Approaches for Pollution Source Location Identification and Apportionment	
<i>William F. Christensen, Basil Williams, C. Shane Reese</i>	25
Testing for trend changes in environmental compliance on river monitoring network data	
<i>Lieven Clement, Olivier Thas</i>	26
Branched Broomrape: The challenge of sampling for detection and the development of a risk model	
<i>Ray Correll, Philip Warren, Nick Secomb</i>	27
Health risk assessment of past indoor and outdoor DDT uses in the Sultanate of Oman	
<i>Pavel Cupr, Tomas Bartos, Said Ali Al-Zedjali, Jiri Kohoutek, Katarina Magulova, Jana Klanova, Ivan Holoubek</i>	28
A Hierarchical Model for Ensemble Weather Forecasting	
<i>Antonio Di Narzo, Daniela Cocchi</i>	29
Operational Marine Ecological Prediction using Sequential Monte Carlo Methods	
<i>Michael Dowd</i>	30
A new concept for modelling the number of cancer patients potentially treated in the Czech Republic	
<i>Ladislav Dušek, Tomáš Pavlík, Eva Gelnarová, Jan Mužík, Jana Koptíková, Jitka Abrahámová, Rostislav Vyzula, Jiří Vorlíček</i>	31

Sources contributing to persistent organic pollutants in air at European rural stations

Alice Dvorska, Gerhard Lammel, Radim Klapka, Hana Skokanova, Jiri Jarkovsky, Jana Klanova, Ivan Holoubek 32

Ensemble Filtering in Air Quality Models

Kryštof Eben, Jaroslav Resler, Pavel Juruš, Michal Belda, Emil Pelikán 33

Environmental Problems and Statistical Thinking

Abdel H. El-Shaarawi 34

Classification of fire weather and fire danger zones

Sylvia Esterby 35

Finding optimal set of genes for effective diagnostics and prognosis of cardiovascular diseases

Václav Faltus, Jana Adášková, Jana Zvárová 36

Computer intensive procedures for mapping and modelling a spatio-temporal process and its uncertainty.

Alessandro Fassò, Michela Cameletti 37

Improved Estimation for Temporally Clustered Extremes

Lee Fawcett, David Walshaw 38

Insensitivity regions in multivariate statistical models

Eva Fišerová, Lubomír Kubáček 39

A Comparison of Linear, Quadratic and Kernel Discriminant Rules for ECD Distributions Via ROC Analysis

Marie Forbelska 40

Some new operators for efficient probability propagation in modelling atmospheric dispersion of toxic gases

Ali Gargoum 41

Alternatives to include the temporal dimension in disease mapping: an empirical approach

T. Goicoa, B. Ibáñez, M. D. Ugarte, A.F. Militino 42

Trend Analysis of Water Quality Data using Linear Models

Arminda Manuela Gonçalves, Teresa Alpuim 43

Hybrid geostatistical modeling of soil carbon, nitrogen and phosphorus within a large Florida watershed	
<i>Sabine Grunwald, Gustavo M. Vasques, Greg L. Bruland, Christine M. Bliss, Nicholas B. Comerford, Donald A. Graetz, James O. Sickman</i>	44
Covariance-matching constrained kriging versus conditional simulation for local predictions with change of support	
<i>Christoph Hofer, Andreas Papritz, Hannes Flühler</i>	45
Spatial and temporal trends of persistent organic pollutants on the global, regional and local scale	
<i>Ivan Holoubek, Jana Klanova, Pavel Cupr</i>	46
Assessment of the Central European trends in the background levels of persistent organic pollutants based on the results of the long-term integrated monitoring in Kosetice observatory, Czech Republic, 1988–2005	
<i>Ivan Holoubek, Jana Klanova, Jiri Jarkovsky</i>	47
Bayesian spatial modeling of gridded air pollution data	
<i>Joanna Horabik, Zbigniew Nahorski</i>	48
Smooth Estimates of Distribution Functions with Application in Environmental Studies	
<i>Ivana Horová, Jan Koláček, Jiří Zelinka, Abdel H. El-Shaarawi</i>	49
Computational Biology and Solving Data Quality	
<i>Jiří Hřebíček, Michal Hejč</i>	50
Uncertainty Analysis in Waste Monitoring and Management	
<i>Jiří Hřebíček, Michal Hejč</i>	51
Outlier detection for compositional data and applications to envirometrics	
<i>Karel Hron, Peter Filzmoser</i>	52
Geostatistical Model Selection Using Data Perturbation	
<i>Hsin-Cheng Huang, Chun-Shu Chen</i>	53
Multivariate change-point analysis of river flows in the northern Québec Labrador region	
<i>Venkata K. Jandhyala</i>	54

Existence Of The Environmental Kuznets Curve (EKC) In Cameroon <i>Metangmo Janvier</i>	55
Model Of The Evaluation Of Ecological State Of Surface Waters In The Czech Republic: The Arrow Project For The Implementation Of The WFD EU <i>Jiri Jarkovsky, Klara Kubosova, Radim Klapka, Danka Némethová, Vratislav Kubík, Jaroslav Ráček, Ladislav Dušek, Jan Hodovský</i>	56
Modelling multivariate extremes of northern Moravia precipitation series. <i>Daniela Jarušková</i>	57
Change detection in appearance of unusually hot or cold days <i>Daniela Jarušková, Monika Rencová</i>	58
Modelling Extremal Dependence in Environmental Processes <i>Jill Suzanne Johnson, David Walshaw, Lee Fawcett</i>	59
Spatial analysis of PM10 concentrations with seasonal adjustment <i>Giovanna Jona Lasinio, Alessio Pollice</i>	60
Study of interaction in bioindication research on tobacco plant injuries caused by ground level ozone <i>Dariusz Kayzer, Anna Budka, Klaudia Borowiak</i>	61
Ecological Detriorations of Managroves Forest in Indus Delta: Changing Ecology of Indus Delta Management, Measures and Future Prospect <i>Durdana Ahmed Ali Khan</i>	62
BayesX: Analysing Geoadditive Regression Data <i>Thomas Kneib, Andreas Brezger, Stefan Lang</i>	63
Markov model in the evaluation of breast cancer screening program in the Czech Republic <i>Lucie Komolíková, Eva Gelnarová</i>	64
Hyetograph simulation of high-intense rainfall events <i>Franz Konecny</i>	65
Origin Of Uncertainty And Scales Of Environmental Objects <i>Sergey Koptsik</i>	66

Multivariate Imaging Of Heavy Metals In Plants And Soils: Spatial Variation And Impacts On Plant Diversity	
<i>Galina Koptsik, Sergey Koptsik, Dan Aamlid</i>	67
Long term meteorological monitoring on Wet Meadows in relationship with global warming	
<i>Milena Kovářová, Jan Pokorný</i>	68
Multivariate statistical models; solvability of basic problems	
<i>Lubomír Kubáček</i>	69
System for monitoring and analysis of the environmental data	
<i>Vratislav Kubík, Miroslav Petráš, Jaroslav Ráček</i>	70
Selection of Indicative Species for Evaluation of Ecological State: Case Study on Benthic Macroinvertebrates Focused on Random Forest Method	
<i>Klara Kubosova, Jiri Jarkovsky, Svetlana Zahradkova, Karel Brabec</i>	71
PLS-R bilinear modelling of organic pollutants bioreporter luminiscence stimulation	
<i>Karel Kupka, Josef Trögl</i>	72
Effects of hot summer periods on human mortality in the Czech Republic	
<i>Jan Kyselý, Bohumír Kříž</i>	73
Planning of factor experiments in a block design with nested rows and columns	
<i>Agnieszka Lacka, Maria Kozłowska</i>	74
Estimation of erythemally effective UVB radiation at two Antarctic stations	
<i>Kamil Láska, Pavel Prošek, Ladislav Budík, Marie Budíková, Gennadi Milinevsky</i>	75
Exposure estimation and spatial misalignment in air pollution and mortality studies	
<i>Duncan Lee, Gavin Shaddick</i>	76
Longitudinal Analysis of Influence of Psychotic Drugs on Weight of Hospitalized Patients	
<i>Jiří Létal, Martin Hýža, Vlasta Hanusková, Svatopluk Sedláček</i>	77

Biregressional modelling heavy metal electroremediation of fly ash from different wastes	
<i>A. T. Lima, M. Fonseca, P.C. Rodrigues, J.T. Mexia, A.B. Ribeiro, L.M. Ottosen</i>	78
Spatio-temporal modelling of multivariate discrete environmental data	
<i>Renjun Ma, Edward Hughes</i>	79
Application of kriging to air quality mapping at different time and spatial scales	
<i>Laure Malherbe</i>	80
Application of the Spatial Poisson Process in the environment	
<i>Patrice Marek, Martina Neumanová, Kateřina Vokáčová</i>	81
Effects of spatially redundant presence/absence vegetation data on the accuracy of predictive distribution models for 29 tree species in Japan	
<i>Tetsuya Matsui, Katsuhiko Nakao, Tsutomu Yagihashi, Tomoki Nakaya, Nobuyuki Tanaka, Mifuyu Ogawa, Ikutaro Tsuyama, Yuko Ogawa</i>	82
Linear calibration of identical objects	
<i>Ivo Moll</i>	83
Spatial and Temporal Variability of pH and Eh over a Rice Field as Related to Lime Addition	
<i>Luis A. Morales, Eva Vidal Vázquez, Antonio Paz González</i>	84
GenStat a tool for analysis of environmental data	
<i>Darren Murray</i>	85
Disease association mapping based on geographically varying parameter modelling: geographically weighed Poisson regression and its variants for spatial epidemiology	
<i>Tomoki Nakaya</i>	86
Support of cancer analysis by the time and space modeling in the Czech Republic	
<i>Jakub Odehnal, Jaroslav Michálek, Todor Ivanov, Edvard Geryk</i>	87
Inferences for max-stable processes	
<i>Simone Padoan, Stuart Coles, Scott Sisson</i>	88

On Time Series of Overdispersed Counts: Modelling, Inference and Prediction	
<i>Harry Pavlopoulos, Dimitris Karlis</i>	89
Mathematical Model for Decontamination Strategy of Hazardous Waste	
<i>Jan Pavlovič, Jiří Hřebíček</i>	90
Groundwater levels in the catchment area of a midfield pond in average and wet hydrological years	
<i>Katarzyna Pawłowska</i>	91
Small scale spatial variability of soil properties and nutrients of a Ferralsol under grassland	
<i>Jorge Paz-Ferreiro, Vicente Pereira de Almeida, Marlene C. Alves, Eva Vidal Vázquez</i>	92
Statistical and Geostatistical analysis of soil surface microrelief	
<i>Jorge Paz-Ferreiro, Ildegardis Bertol, Eva Vidal Vázquez</i>	93
Space-Time Prediction In Agricultural Data	
<i>Alessandra Petrucci, Emanuela Dreassi, Emilia Rocco</i>	94
Robust version of L-moment-based estimation methods in the frequency analysis of meteorological extremes	
<i>Jan Picek</i>	95
Modelisation of electricity demand in Cameroon: a mean to understand and secure the satisfaction of the electricity demand in developing countries.	
<i>Eric Pokem</i>	96
Challenging space-time complexity: a composite likelihood approach.	
<i>Emilio Porcu, Moreno Bevilacqua, Jorge Mateu, Carlo Gaetan</i>	97
Testing separability for some classes of covariance functions	
<i>Emilio Porcu, Alessandro Zini, Jorge Mateu</i>	98
Estimation of parameters for a predator-prey community	
<i>Zdeněk Pospíšil</i>	99
Trends in flow patterns in the River Dee, Scotland	
<i>Jacqueline Potts</i>	100

Statistical analysis of a spatio-temporal model with location dependent parameters

Suhasini Rao 101

Bootstrap based methods for variable selection in additive models: application to SO_2 pollution data.

Javier Roca Pardiñas 102

Analytical ecological epidemiology: exposure-response relations in spatially stratified time series

Hagen Scherb, Kristina Voigt 103

Generalized Additive Models in Environmental Sciences

Michael G. Schimek 104

Generalized Score Tests For Excess Risk In The Vicinity Of Point Sources

Peter Schlattmann 105

Using a probabilistic model (pCNEM) to estimate personal exposure to air pollution in a study of the short term effect of PM10 on mortality

Gavin Shaddick, Duncan Lee, Jim Zidek 106

A Max-Stable Process Model for Spatial Extremes

Elizabeth Louise Smith, Alec Stephenson 107

Short-term Fourier analysis of hydrological discharge data – the performance of robust methods

Bernhard Spangl, Gregor Laaha 108

Prediction of daily mean PM10 concentrations in Graz, Austria

Ernst Stadlober, Siegfried Hörmann, Brigitte Pfeiler 109

D optimal designs for correlated processes

Milan Stehlik 110

CUSUM charts for detecting onset and cessation of xylem formation based on automated dendrometer data

Mika Sulkava, Harri Mäkinen, Pekka Nöjd, Jaakko Hollmén 111

Logratio approach to grain-size normalization of sediment and soil

Robert Szava-Kovats 112

A Methodology in Predicting the Influence of Climatic Variables on Crop Yield	
<i>Herminia Tanguilig</i>	113
Visualisation of Missing Values in Environmental Surveys	
<i>Matthias Templ</i>	114
Comparing sampling patterns for kriging the spatial mean temporal trend	
<i>Cajo ter Braak, Dick Brus, Edzer Pebesma</i>	115
Robust Statistic for the One-Way MANOVA	
<i>Valentin Todorov, Peter Filzmoser</i>	116
Statistical analyses of spatial-time distribution of cancer mortality in Japan	
<i>Tetsuji Tonda, Kenichi Satoh, Hiromi Kawasaki, Takeshi Shimamoto, Teruyuki Nakayama, Kota Katanoda, Tomotaka Sobue, Megu Ohtaki</i>	117
Analysis of PM₁₀ air pollution in Brno based on a GLM with strongly rank-deficient design matrix	
<i>Vítězslav Veselý, Zuzana Hrdličková, Jaromír Tonner, Jaroslav Michálek, Miroslav Kolář</i>	118
Spatial Modified Birth-and-Death Processes	
<i>Kateřina Vokáčová, Martina Neumanová, Patrice Marek</i>	119
Estimating functions for inhomogeneous spatial point processes with incomplete covariate data	
<i>Rasmus Waagepetersen</i>	120
Digitalized measurements	
<i>Gejza Wimmer, Viktor Witkovský</i>	121
Monitoring the regeneration growth of <i>Shorea curtisii</i> after selective logging at the Semangkok hill forest, Malaysia.	
<i>Tsutomu Yagihashi, Tatsuya Ohtani, Abdul Rahman Kassim, Hiroyuki Tanouchi</i>	122
On Spatial Interpolation When Observations are Counts	
<i>Hao Zhang</i>	123

Estimation and prediction of a new class of convolution-based spatial nonstationary models*Zhengyuan Zhu, Yichao Wu* 124**Machine-Learning Approach to Clustering and Classification of Environmental Data***Jan Zizka* 125**Statistics and biomedical informatics in forensic sciences***Jana Zvárová* 126
