An Introduction to Exercise and Sport Physiology xviii

Focus of Exercise and Sport Physiology	2
Historical Events	3
Acute and Chronic Responses to Exercise	13
Research: The Foundation for Understanding	13

Part I Exercising Muscle 23

CHAPTER 1 Structure and Function of Exercising Muscle 24

Functional Anatomy of Skeletal Muscle	26
Skeletal Muscle and Exercise	35

CHAPTER 2 Fuel for Exercising Muscle: Metabolism and Hormonal Control 46

Metabolism and Bioenergetics	48
Hormonal Control	59

CHAPTER 3 Neural Control of Exercising Muscle 78

Overview of the Nervous System	80
Structure and Function of the Nervous System	80
Central Nervous System	87
Peripheral Nervous System	89
Sensory-Motor Integration	91
Motor Response	96

CHAPTER 4 Energy Expenditure and Fatigue 98

Measuring Energy Expenditure	100
Energy Expenditure at Rest and During Exercise	105
Fatigue and Its Causes	113

Part II Cardiovascular and Respiratory Function ····· 121

CHAPTER 5 The Cardiovascular System and Its Control ····· 122

- Heart 124
- Vascular System 133
- Blood 139

CHAPTER 6 The Respiratory System and Its Regulation ····· 142

- Pulmonary Ventilation 144
- Pulmonary Volumes 146
- Pulmonary Diffusion 147
- Transport of Oxygen and Carbon Dioxide in the Blood 151
- Gas Exchange at the Muscles 154
- Regulation of Pulmonary Ventilation 156

CHAPTER 7 Cardiorespiratory Responses to Acute Exercise ····· 160

- Cardiovascular Responses to Acute Exercise 162
- Respiratory Responses to Acute Exercise 176

Part III Exercise Training ····· 185

CHAPTER 8 Principles of Exercise Training ····· 186

- Terminology 188
- General Principles of Training 190
- Resistance Training Programs 192
- Anaerobic and Aerobic Power Training Programs 197

CHAPTER 9 Adaptations to Resistance Training ····· 202

- Resistance Training and Gains in Muscular Fitness 204
- Mechanisms of Gains in Muscle Strength 205
- Muscle Soreness 213
- Resistance Training for Special Populations 217

CHAPTER 10 Adaptations to Aerobic and Anaerobic Training ····· 220

- Adaptations to Aerobic Training 222
- Adaptations to Anaerobic Training 245
- Specificity of Training and Cross-Training 247

Part IV Environmental Influences on Performance 251

CHAPTER 11 Exercise in Hot and Cold Environments: Thermoregulation 252

- Body Temperature Regulation 254
- Physiological Responses to Exercise in the Heat 261
- Health Risks During Exercise in the Heat 264
- Acclimation to Exercise in the Heat 268
- Exercise in the Cold 270
- Physiological Responses to Exercise in the Cold 273
- Health Risks During Exercise in the Cold 274
- Adaptation to Exercise in the Cold 276

CHAPTER 12 Exercise at Altitude 278

- Hypobaric Environments: Conditions at Altitude 280
- Physiological Responses to Acute Altitude Exposure 282
- Exercise and Sport Performance at Altitude 285
- Acclimatization: Prolonged Exposure to Altitude 287
- Altitude: Optimizing Training and Performance 289
- Health Risks of Acute Exposure to Altitude 292

Part V Optimizing Performance in Sport 295

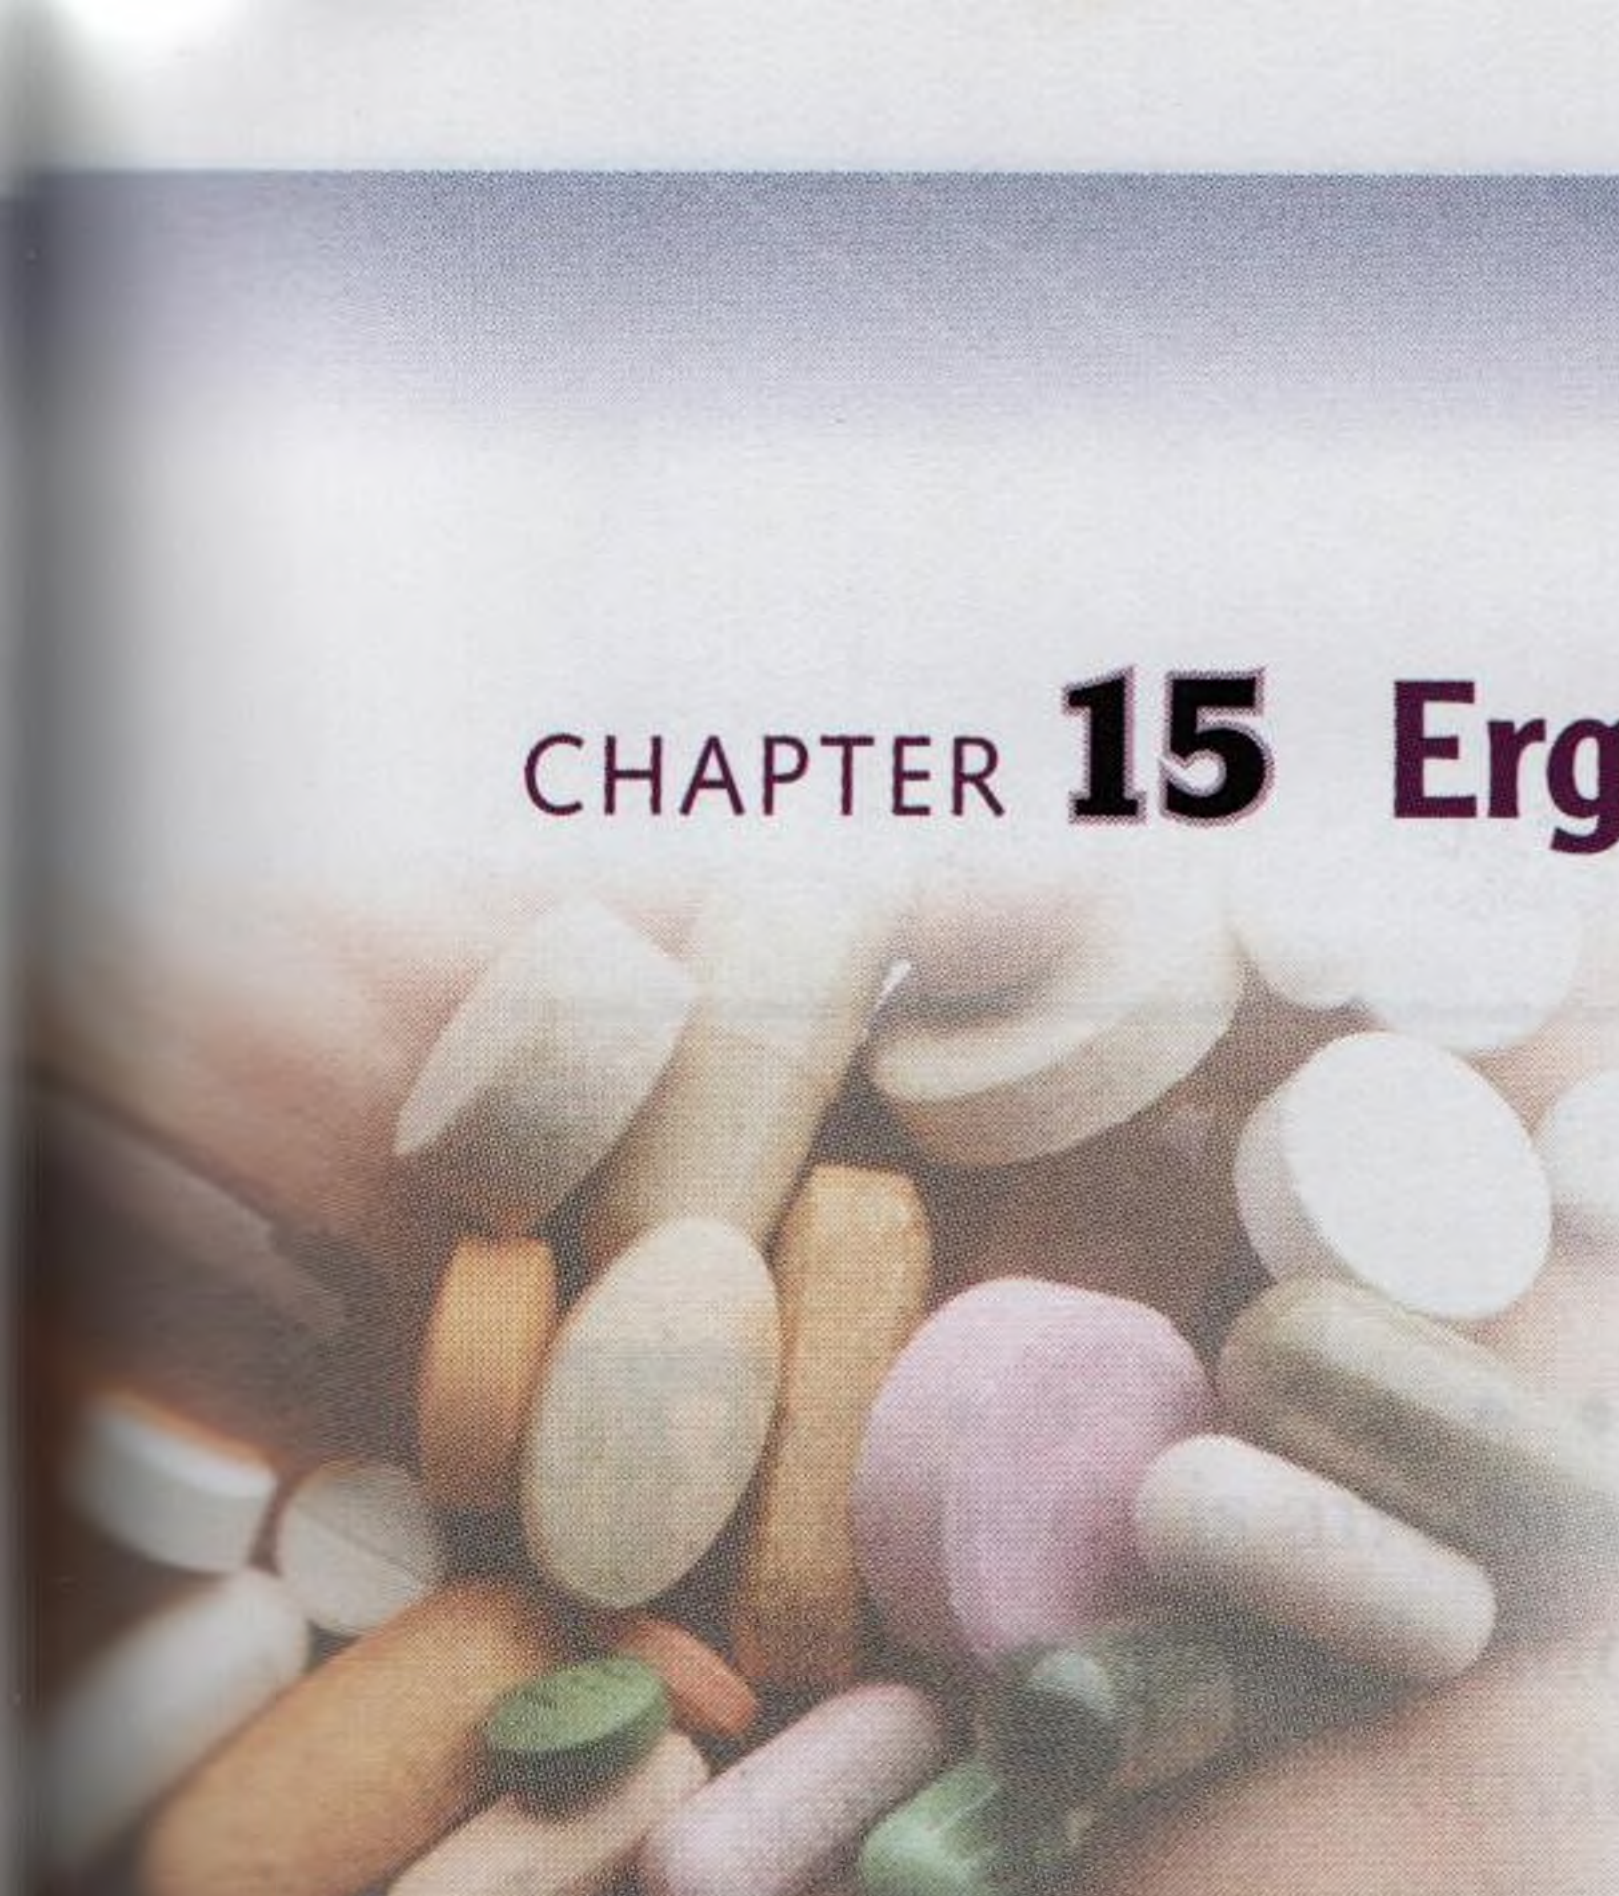

CHAPTER 13 Training for Sport 296

- Optimizing Training: A Model 298
- Excessive Training 299
- Overreaching 301
- Overtraining 301
- Tapering for Peak Performance 309
- Detraining 310

CHAPTER 14 Body Composition and Nutrition for Sport 316

- Body Composition in Sport 318
- Nutrition and Sport 328

CHAPTER 15 Ergogenic Aids and Sport 354

Researching Ergogenic Aids 356

Pharmacological Agents 359

Hormonal Agents 363

Physiological Agents 369

Nutritional Agents 376

Part VI Age and Sex Considerations in Sport and Exercise · 381

CHAPTER 16 Children and Adolescents in Sport and Exercise 382

Growth, Development, and Maturation 384

Body Composition: Growth and Development of Tissues 384

Physiological Responses to Acute Exercise 387

Physiological Adaptations to Exercise Training 394

Motor Ability and Sport Performance 396

Special Issues 399

CHAPTER 17 Aging in Sport and Exercise 402

Height, Weight, and Body Composition 404

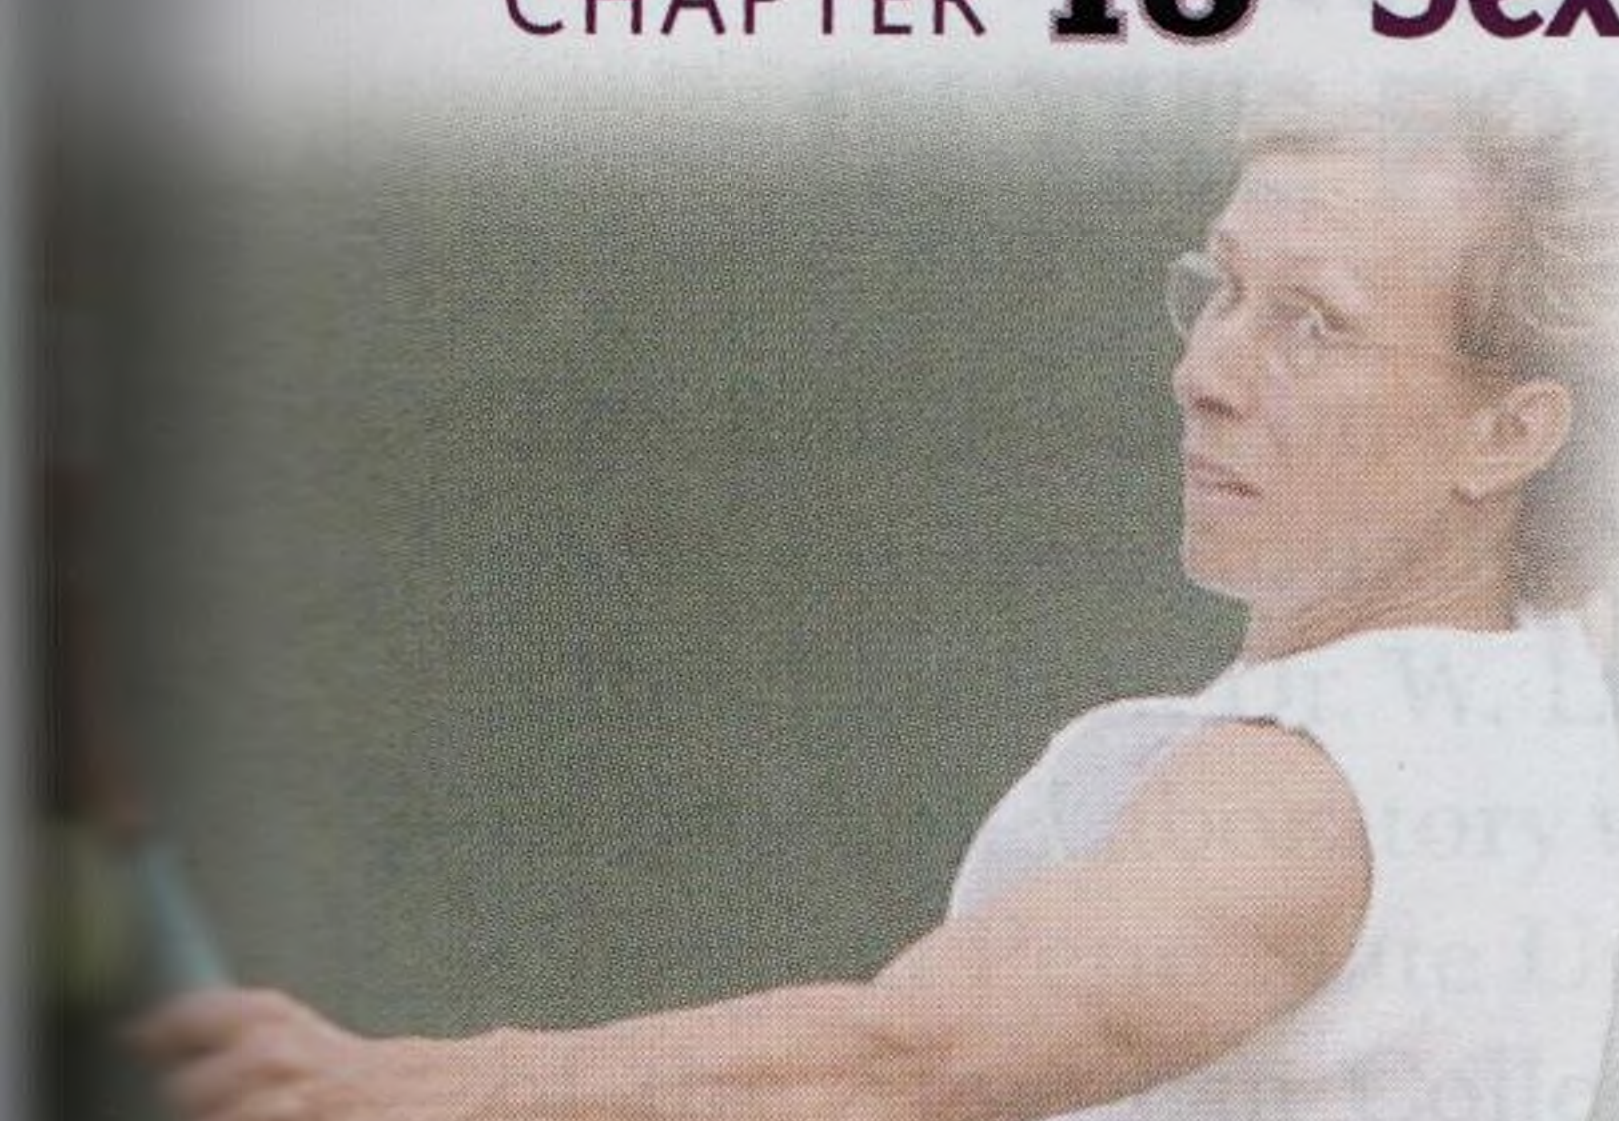

Physiological Responses to Acute Exercise 407

Physiological Adaptations to Exercise Training 415

Sport Performance 417

Special Issues 418

CHAPTER 18 Sex Differences in Sport and Exercise 422

Body Size and Composition 424

Physiological Responses to Acute Exercise 426

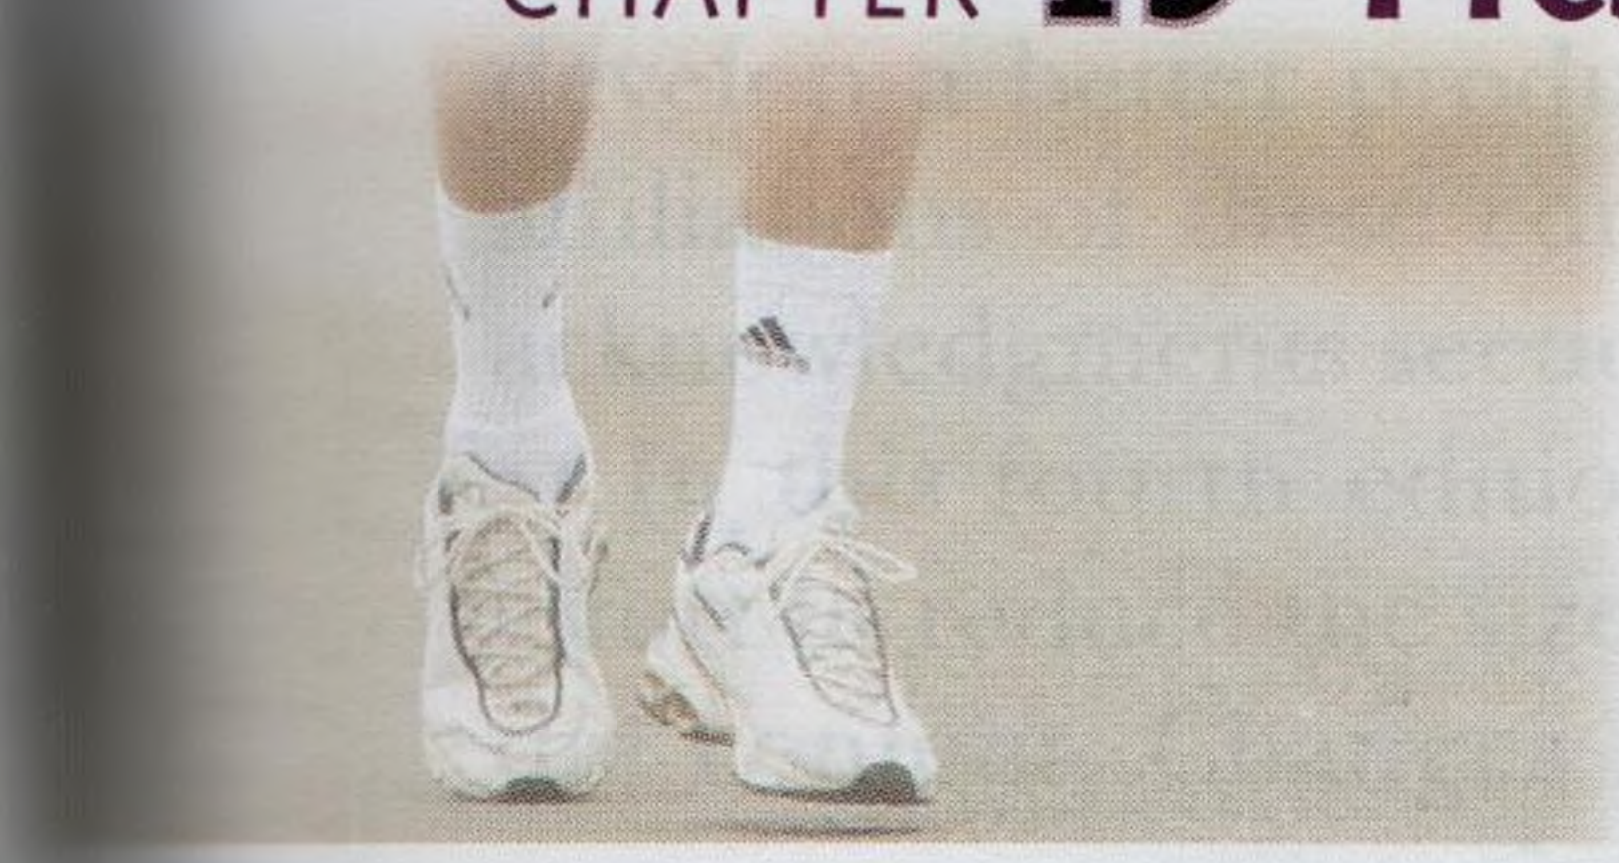

Physiological Adaptations to Exercise Training 431

Sport Performance 433

Special Issues 433

Part VII Physical Activity for Health and Fitness 447

CHAPTER 19 Prescription of Exercise for Health and Fitness 448

Health Benefits of Exercise: The Great Awakening 450

Medical Clearance 452

Exercise Prescription 456

Monitoring Exercise Intensity 459

Exercise Program 464

Exercise and Rehabilitation of People With Diseases 468

CHAPTER 20 Cardiovascular Disease and Physical Activity 470

Forms of Cardiovascular Disease 472

Understanding the Disease Process 476

Determining Individual Risk 479

Reducing Risk Through Physical Activity 483

Risk of Heart Attack and Death During Exercise 489

CHAPTER 21 Obesity, Diabetes, and Physical Activity 492

Obesity 494

Diabetes 511

Glossary 517

References and Suggested Readings 535

Index 559

About the Authors 573
