List of tables	xiv
List of examples	xvii
List of technical notes	xix
Preface	xxi
Acknowledgements	xxiii
Note to the instructor	xxiv
1 Introduction to cost-benefit analysis	1
1.1 Introduction	1
1.2 The Referent Group	6
1.3 The structure of the cost-benefit model	8
1.4 The use of spreadsheets in cost-benefit analysis	11
1.5 The rationale for public projects	14
1.6 The role of the analyst	16
1.7 Further reading	17
Exercises	17
2 Project appraisal: principles	19
2.1 Introduction	19
2.2 Project appraisal from an individual viewpoint	19
2.3 Investment opportunities in the economy as a whole	22
2.4 The algebra of NPV and IRR calculations	25
2.5 Annuities and perpetuities	31
2.6 The Rule of 72	33
2.7 Economic depreciation and the annual cost of capital	34
2.8 Treatment of inflation in project appraisal	35
2.9 Incorporating a risk factor in the discount rate	37
2.10 Further reading	38
Exercises	38
3 Project appraisal: decision-rules	40
3.1 Introduction	40
3.2 Discounted cash flow analysis in practice	40

3.3	Discounting and the time value of money	41
3.4	Using Annuity Tables	44
3.5	Using investment decision-making criteria	45
3.5.1	The Net Present Value (NPV) criterion	45
3.5.2	The Benefit-Cost Ratio decision-rule	48
3.5.3	The Internal Rate of Return (IRR) criterion	48
3.5.4	Problems with the IRR decision criterion	51
3.5.5	Problems with the NPV decision criterion	53
3.6	Using spreadsheets	59
3.7	Further reading	64
	Exercises	64
4	Private cost-benefit analysis: financial appraisal	68
4.1	Introduction	68
4.2	Benefits and costs measured as cash flows	69
4.2.1	Identifying project inputs and outputs	69
4.2.2	Valuing inputs and outputs at market prices	70
4.2.3	Characteristics of cash flows	70
4.3	Inflation and relative prices	72
4.4	Incremental or relative cash flows	74
4.5	Capital costs and the treatment of depreciation	75
4.6	Interest charges, financing flows and cash flow on equity	78
4.7	Taxation and after-tax net cash flows	83
4.8	The discount rate	84
4.9	Summary of the relationship between the Market Analysis and the Private Analysis	84
4.10	Derivation of project private cash flows using spreadsheets	91
4.11	Further reading	91
	Appendix to Chapter 4: case study of International Cloth Products	91
	Exercises	97
5	Cost-benefit analysis and economic efficiency	99
5.1	Introduction	99
5.2	The competitive market	100
5.3	Shadow-pricing project inputs and outputs	103
5.4	Shadow-pricing marketed inputs	104
5.4.1	Materials	105
5.4.2	Labour	109
5.4.3	Capital	116
5.4.4	Land	117
5.4.5	Rules for shadow-pricing marketed inputs	118
5.5	Shadow-pricing marketed outputs	118
5.5.1	Rules for shadow-pricing marketed outputs	123
5.6	The efficiency pricing rules: summary	123
5.7	Corrective taxation: the modified efficiency pricing rules	124
5.8	How to determine which pricing rule to follow	126
5.9	Shadow-pricing public funds	127
5.10	Shadow-pricing foreign exchange	132

5.11	The discount rate	133
5.12	Worked examples	136
5.12.1	Efficiency analysis of the National Fruit Growers (NFG) project	136
5.12.2	Cost-benefit analysis of the 55 mph speed limit	139
5.13	Further reading	141
	Appendix to Chapter 5: Economic Efficiency Analysis of the ICP case study	142
	Exercises	145
6	The distribution of project net benefits	149
6.1	Introduction	149
6.2	How to identify Referent Group net benefits in practice	150
6.3	Some examples of the classification of net benefits	154
6.3.1	Shadow-prices on project inputs	155
6.3.2	Shadow-prices on project outputs	161
6.4	Corrective taxation	162
6.5	Further examples	166
6.6	Lessons from the examples	168
6.7	Worked example: Referent Group Analysis of National Fruit Growers' (NFG) project	169
6.8	Further reading	171
	Appendix 1 to Chapter 6: Referent Group net benefits in the ICP case study	171
	Appendix 2 to Chapter 6: incorporating the public funds cost premium in the ICP case study	177
	Exercises	179
7	Consumer and producer surplus in cost-benefit analysis	182
7.1	Introduction	182
7.2	Real versus pecuniary effects	183
7.3	Consumer surplus	184
7.3.1	Aggregating consumer surplus measures	185
7.3.2	The significance of income distribution	186
7.4	Producer surplus	186
7.5	Accounting for output price changes	186
7.5.1	Benefits of urban transport projects	187
7.5.2	Benefits of worker training	193
7.5.3	Producer benefits from an irrigation project	195
7.6	Accounting for input price changes	200
7.7	Price changes in other markets	202
7.8	Classification of consumer and producer surplus changes	204
7.9	Further reading	205
	Appendix 1 to Chapter 7: allowing for an increase in the skilled wage in the ICP case study	206
	Appendix 2 to Chapter 7: compensating and equivalent variation	209
	Exercises	214
8	Non-market valuation	217
8.1	Introduction	217
8.2	Causes of market failure	217

8.3	Valuing environmental costs and benefits	219
8.4	Incorporating non-market values in cost-benefit analysis	223
8.5	Methods of non-market valuation	224
8.5.1	The production approach	225
8.5.2	The utility approach	230
8.6	Revealed and stated preference methods of applying the utility approach	233
8.6.1	Revealed preference methods	233
8.6.2	Stated preference methods	239
8.7	Benefit Transfer and Threshold Analysis	242
8.8	Alternative approaches to environmental valuation	243
8.9	Non-market valuation: the value of life	244
8.10	The pandemic	247
8.11	Climate change	250
8.12	Further reading	252
	Appendix to Chapter 8: the annual benefits of the Virginia Creeper Trail as measured by the Travel Cost Method	253
	Exercises	256
9	Uncertainty, information and risk	258
9.1	Introduction	258
9.2	The value of information	260
9.3	An abbreviated cost-benefit analysis	262
9.4	The option of delay	263
9.5	Calculating the value of information	265
9.6	The cost of risk	268
9.6.1	The theory of risk aversion	268
9.6.2	Dealing with project risk	271
9.7	Risk modelling	273
9.7.1	Use of discrete probability distributions	273
9.7.2	Joint probability distributions	274
9.7.3	Continuous probability distributions	276
9.8	Using risk analysis in decision-making	279
9.9	Modelling risk in spreadsheet applications using ExcelSim [®]	279
9.9.1	Modelling a "random walk"	284
9.10	Further reading	286
	Appendix 1 to Chapter 9: incorporating risk analysis in the ICP case study	287
	Appendix 2 to Chapter 9: using the @RISK [®] (Palisade) risk modelling program	290
	Exercises	294
10	Valuing traded and non-traded goods in cost-benefit analysis	297
10.1	Introduction	297
10.2	Traded and non-traded goods	297
10.3	Valuing traded and non-traded goods and services	298
10.4	Worked example: domestic and international price structures	299
10.4.1	Evaluation of an import-replacing project in real terms	299
10.4.2	Evaluation of an import-replacing project in money terms	300
10.5	Summary of the two approaches to valuation: border versus domestic prices	303
10.6	The equivalence of the two approaches	303

10.7	Determinants of the shadow exchange rate	307
10.8	Further reading	310
	Appendix to Chapter 10: shadow-pricing foreign exchange in the ICP case study	311
	Exercises	313
11	Appraisal of the distribution of project benefits and costs	315
11.1	Introduction	315
11.2	Measuring the degree of inequality	317
11.3	Alternative measures of income distribution	318
11.4	Policies to change the income distribution	319
11.5	The use of income distribution weights in project appraisal: some illustrative examples	320
11.6	The derivation of distribution weights	321
11.7	Distributional weighting in practice	327
11.8	Worked example: incorporating income distribution effects in the NFG project	331
11.9	Inter-temporal distribution considerations	332
11.10	Further reading	336
	Exercises	336
12	Economic impact analysis	339
12.1	Introduction	339
12.2	Multiplier analysis	340
12.2.1	The closed economy	340
12.2.2	The open economy	344
12.2.3	Crowding out	346
12.2.4	Cost-benefit analysis of fiscal stimulus	347
12.2.5	The employment multiplier	347
12.3	Inter-industry analysis	348
12.3.1	Inter-industry analysis and the national income multiplier	351
12.3.2	Inter-industry analysis and employment	352
12.4	General equilibrium analysis	353
12.5	Case study: the impact of the ICP Project on the economy	354
12.6	Further reading	355
	Appendix to Chapter 12: the annual economic impact of the Virginia Creeper Trail	356
	Exercises	357
13	Writing the cost-benefit analysis report	359
13.1	Introduction	359
13.2	Contents of the report	360
13.2.1	The executive summary	360
13.2.2	The introduction	360
13.2.3	The methodology	360
13.2.4	The analysis	361
13.2.5	The conclusion	361
13.3	Other issues	362
	Appendix to Chapter 13: report on International Cloth Products Ltd: Spinning Mill proposal prepared by Angela McIntosh	362

Appendix 1: Case study assignments	376
A1.1 South Australian Olive Oil Project	377
A1.2 Walnuts Tasmania Project	381
A1.3 A tuna cannery in Papua New Guinea	385
A1.4 Urban water supply in South-East Queensland	388
A1.5 The Scottish Highlands and Islands remote dental care programme	393
A1.6 The Defarian Early Childhood Intervention Program (DECIP)	397
A1.7 A pulp mill for Tasmania?	404
A1.8 Qingcheng Water Project	408
A1.9 Highway Project 2012	414
A1.10 International Mining Corporation (IMC) Copper Mining Project	421
A1.11 Comparative levelised cost of electricity: renewables vs coal	429
A1.12 Cost-benefit analysis of the proposed repeal of Water Saving Regulations	433
A1.13 Cost-benefit analysis of the proposed extension to the Mount Beno Walking Trail	439
A1.14 Cost-benefit analysis of a proposed Drug Court programme in the State of Euphoria, Federal Republic of Oz	445
Appendix 2: Discount and annuity factors	452
Glossary	455
Index	456
