

# Content

**Content** ..... 5

**1. Introduction** ..... 7

1.1 Purpose..... 7

1.2 Geophysical maps ..... 9

1.3 New basic geological maps 1 : 25 000 of the Czech Republic..... 11

**2. Basic parameters of the Krkonoše-Jizera Composite Massif** ..... 17

2.1. Chemical classification and composition ..... 19

**3. Architecture of the western segment of the Krkonoše-Jizera Composite Massif** ..... 23

3.1 Granite typology and petrology ..... 23

3.2 Geochemical discrimination of the Liberec and Jizera Granites ..... 29

3.3 Petrophysical discrimination of the Liberec and Jizera Granites..... 31

3.4 Fojtka Hybrid Granitoids – structural and lithological markers ..... 33

3.5 Tanvald Massif – relict of the magmatic body in the KJCM..... 38

3.6 Intrusive relationship and interaction between the Tanvald  
and Liberec Granites ..... 41

3.7 Magmatic structures in the Krkonoše-Jizera Composite Massif..... 42

3.8 Basaltandesite (melaphyre) and trachyandesite dykes..... 51

3.9 Tertiary volcanites in the Krkonoše-Jizera Composite Massif ..... 52

**4. Tectonic network in western segment of the Krkonoše-Jizera Composite Massif**..... 61

4.1 Vratislavice fault zone – an example of the tectonic dilatation  
of the Liberec Granite ..... 65

4.2 Fractures in the granite outcrops of the KJCM ..... 66

4.3 Seismicity in the western segment of the Krkonoše-Jizera Composite  
Massif ..... 68

4.4 Recent seismicity survey in the Bedřichov water-supply tunnel section A... 69

4.5 Geothermal field of the Krkonoše-Jizera Composite Massif..... 77

**5. Water-supply tunnels in the Jizerské hory Mts.** ..... 83

5.1 Tunnels parameters ..... 83

5.2 Geology of the Bedřichov water-supply tunnels (section A and B) ..... 87

5.3 Spatial visualisation of the Bedřichov tunnel section A wall topography ... 97

5.4 Spacial visualisation of the geological scene of the tunnel section A walls ... 99

5.5 Computer-based image analysis of granite alteration in the Bedřichov  
water-way tunnel (section A)..... 102

**6. Mineralogy and mineralization** ..... 105

6.1 Garnet in the Tanvald Granite ..... 105

6.2 Quartz-topaz greisens at periphery of the Krkonoše-Jizera Composite  
Massif. .... 107

6.3 Tungsten-tin mineralization in the exocontact of the Tanvald Massif .....111

6.4 Exotic hornfels from the contact aureole of the Tanvald Granite  
Massif – the raw material for Neolithic tools. .... 114

6.5 Chemistry of allanite in relation to uranium release during alteration  
of the Jizera Granite. .... 117

6.6 Fracture carbonates in granites from Bedřichov water-supply tunnels ..... 118

6.7 Sekaninaite at the Liberec and Tanvald Granite contact ..... 126

6.8 Composition of the groundwaters in the Bedřichov water-supply tunnel ... 127

6.9 Recent minerals and the processes of their precipitation on walls  
in the Bedřichov tunnel section A ..... 128

6.10 Migration of uranium and associated elements in the Bedřichov  
water-supply tunnel (section A) ..... 134

**7. Urban geology of Liberec City** ..... 137

7.1 Spatial data layers ..... 140

**8. Conclusions**..... 143
