

CONTENTS

PART ONE FRAMEWORK OF THE EARTH

CHAPTER ONE CONTINENTS AND OCEANS

The Earth's Interior	2
Mid-ocean Ridges	5
Oceanic Trenches	9
Plate Tectonics	10
Continental Drift	13
Age of the Ocean Basins	14
Break-up of Pangaea	17

CHAPTER TWO OROGENESIS	22
Anatomy of a Mountain Chain	22
Geosynclines and Trenches	28
Continental Structure	32

PART TWO THE SEDIMENTARY RECORD

CHAPTER THREE STRATIGRAPHY	38
Interpretation of Sedimentary Rocks	38
Fossils	41
Paleoecology	49
Biostratigraphy	51
Marine and Non-marine Sediments	55

CHAPTER FOUR CORRELATION	58
Facies Changes	58
Stratigraphic Maps	66
Nature and Thickness of Sedimentary Formations	70
Continuity of the Sedimentary Record	73
Paleontological Correlation	74
Intercontinental Correlation	78

CHAPTER FIVE TIME	80
Length of Geological Time	80
Lead Methods	82
Rubidium-Strontium Method	83

Potassium-Argon Method	84
Radiocarbon Dating	84
Growth of the Relative Time Scale	85
Nature of the Relative Time Scale	88
Dating the Geological Time Scale	90
The Geological Perspective	92

CHAPTER SIX THE EARTH IN SPACE	96
Earth's Place in the Universe	96
Origin of the Solar System	104
The Moon	106
Mars and Venus	110
The Early Earth	113

CHAPTER SEVEN UNIFORMITY AND PROGRESS	118
Uniformity	118
Atmosphere and Oceans	119
Magnetic Field	122
Rotation	127
Temperature	128

CHAPTER EIGHT LIFE AND EVOLUTION	132
Origin of Life	132
Evolution	143

PART THREE THE CRATON

CHAPTER NINE THE SHIELD	150
Division of Pre-Paleozoic Time	152
Geology of a Typical Area	153
Structural Trends and Provinces	155
Archean Rocks	158
Aphebian Rocks	158
Helikian Rocks	162
Pre-Paleozoic Rocks Beneath the Platform	163
Metallogenetic Provinces	165
Continental Accretion	165
Archean and Proterozoic Fossils	166

CHAPTER TEN THE SAUK SEQUENCE	172	Cordilleran Geosyncline	303
Arches and Basins	174	Antler Orogeny	307
The Early Paleozoic Platform	177	Late Paleozoic Sediments and Orogeny	310
Stratigraphic Divisions of Cratonic Rocks	178	CHAPTER FIFTEEN CORDILLERAN OROGENY AND MESOZOIC LIFE	316
Late Proterozoic Rocks of the Continental Margins	180	Introduction	316
Basal Beds of the Sauk Sequence	182	Jurassic-Cretaceous Record in the Cordilleran Geosyncline	318
The Origin of the Metazoa and the Cambrian Fauna	185	Cordilleran Intrusive Rocks	320
The Sauk Transgression	189	Structures Produced by Cordilleran Deformation	322
Cambrian Life	192	Causes of Cordilleran Deformation	325
CHAPTER ELEVEN THE TIPPECANOE SEQUENCE	200	Jurassic Rocks of the Western Platform	327
Multicycle Sandstones	200	Mesozoic Mammals	332
Origin of Vertebrates	202	Cretaceous System of the Western Platform	335
Chazy Limestone and the First Coral Reefs	205	The Age of Reptiles	342
The Mid-Paleozoic Reef Community	206	Dinosaurs, Masters of the Land	346
Tippecanoe Epeiric Seas	212	Marine Reptiles	350
Silurian Organic Reefs	218	The Conquest of the Air	351
Facies in an Evaporite Basin	221	Birds	355
CHAPTER TWELVE THE KASKASKIA SEQUENCE	228	The End of Reptilian Dominance	359
Worm's Eye Maps and Reworked Sediments	228	CHAPTER SIXTEEN THE CORDILLERA IN THE CENOZOIC	364
Solution of Evaporites	231	Introduction	364
Devonian Reefs of Western Canada	231	Wyoming and Colorado	366
The Age of Fish	236	Basin and Range Province	374
Origin of Tetrapods	240	Columbia and Snake River Plateaus	380
Mississippian System	245	Cenozoic Basins of the Pacific Coast	388
CHAPTER THIRTEEN THE ABSAROKA SEQUENCE	252	Cenozoic Mammals	392
Cyclothems	252	PART FIVE THE APPALACHIANS	
Glaciation in the Southern Hemisphere	258	CHAPTER SEVENTEEN EARLY PALEOZOIC HISTORY	406
Coal	258	Regional Setting	406
Environment of Coal Deposition	265	Beginning of the Appalachian Record	411
Origin of Reptiles	269	Ordovician Sedimentation	415
Cratonic Highlands and Basins	271	Taconic Orogeny	420
The End of an Era	284	The Appalachians in the Silurian	423
The End of a Sequence	289	CHAPTER EIGHTEEN LATE PALEOZOIC CONTINENTAL COLLISION	430
Fauna of the Late Paleozoic-Early Mesozoic Redbed Facies	291	Introduction	430
PART FOUR THE CORDILLERA		Acadian Orogeny	430
CHAPTER FOURTEEN THE PALEOZOIC ERA	298	Catskill Clastic Wedge	431
Regional Setting	298	Mid-Paleozoic Fold Belts of the North Atlantic	435
Proterozoic Rocks in the Cordillera	301	Late Paleozoic Basins of the Northern Appalachians	439
Lower Paleozoic Rocks of the			

Late Paleozoic Clastic Wedge	441	Petroleum Resources of the Arctic	
The Alleghany Orogeny	441	Borderlands	492
The Ouachita and Marathon Arcs	446	Plate Tectonic Interpretations of	
CHAPTER NINETEEN THE BREAK-UP		Arctic Geology	493
OF PANGAEA	454	CHAPTER TWENTY-ONE THE LATE	
Introduction	454	CENOZOIC ICE AGE	496
Triassic Rift Basins	455	Introduction	496
Geometry of the Coastal Plains	458	Growth of Glaciers	497
Mesozoic Stratigraphy of the		Conditions at the Glacial Maximum	501
Coastal Plains	459	Stratigraphy of the Drift	504
Cenozoic Sedimentation	465	Deglaciation	509
Salt-Cored Structures	466	Causes of Glaciation	515
Petroleum in the Coastal Plains	468	Primates	517
Erosion of the Appalachian		Hominids	519
Mountains	469	Early Man in North America	522
Animal Distribution and the		APPENDIX A SUMMARY OF THE	
Break-up of Pangaea	471	PLANT AND ANIMAL	
PART SIX THE ARCTIC AND		KINGDOMS	528
CENOZOIC ICE AGE		The Names of Plants and Animals	528
CHAPTER TWENTY BORDERLANDS		The Plant Kingdom	529
OF THE ARCTIC OCEAN	482	The Animal Kingdom	534
Introduction	482	INDEX	550
Tectonic Divisions of the Arctic			
Islands	483
