

Contents

1 Principles of investigation, diagnosis and treatment	1	Periapical periodontitis, abscess and granuloma	79
Taking a history	1	Acute apical periodontitis	80
Clinical examination	6	Acute apical (dentoalveolar) abscess	81
Medical examination	7	Chronic apical periodontitis and periapical granuloma	83
Clinical differential diagnosis	8		
Investigations	9		
SECTION 1: Hard tissue pathology	23	6 Tooth wear, resorption, hypercementosis and osseointegration	87
2 Disorders of tooth development	23	Tooth wear	87
Abnormalities in the number of teeth	23	Bruxism	89
Defective enamel formation	26	Resorption of teeth	90
Defective dentine formation	32	Hypercementosis	93
Defects of enamel and dentine	34	Pathology of osseointegration	95
Other systemic diseases affecting teeth	36	7 Periodontal diseases	99
Extrinsic agents affecting teeth	38	The normal periodontal tissues	99
Odontomes and minor tooth anomalies	42	Classification of periodontal diseases	100
Disorders of eruption	43	Gingivitis	100
3 Disorders of development	47	Periodontitis	104
Clefts of lip or palate	47	Severe periodontitis	112
Other facial clefts	51	Periodontitis as a manifestation of systemic conditions	112
Stafne's idiopathic bone cavity	51	Periodontal (lateral) abscess	113
Hereditary prognathism	51	Acute pericoronitis	114
Ankyloglossia	52	Gingival recession	115
Cowden's syndrome	52	Necrotising periodontal diseases	116
Other craniofacial malformations	53	Periodontitis in HIV infection	117
4 Dental caries	55	Gingival enlargement	117
Aetiology	55	Localised juvenile spongiotic gingivitis	119
Bacterial plaque	55	Foreign body gingivitis	120
Microbiology	56	Plasminogen deficiency gingivitis	120
Sucrose	59	Other inflammatory gingival swelling	120
Susceptibility of teeth to caries	62	8 Osteomyelitis, osteitis and osteonecrosis of the jaws	123
Saliva and dental caries	62	Normal healing of an extraction socket	123
Pathology of enamel caries	63	Alveolar osteitis	125
Pathology of dentine caries	66	Osteomyelitis of the jaws	127
Clinical aspects of caries pathology	69	Acute osteomyelitis	127
5 Pulpitis and apical periodontitis	75	Chronic osteomyelitis	129
Pulpitis	75	Diffuse sclerosing osteomyelitis	130
Pulp calcifications	79	Chronic non-bacterial osteomyelitis	130

Chronic low-grade focal osteomyelitis and sclerosing osteitis	131	Sublingual dermoid cyst	172
Osteoradionecrosis	131	Thyroglossal duct cyst	172
Proliferative periostitis	132	Branchial cyst	173
Medication-related osteonecrosis of the jaws (MRONJ)	133	Foregut cyst	174
Traumatic sequestrum	135	Other cysts in other chapters	174
9 Major infections of the mouth and face	137	11 Odontogenic tumours and related jaw lesions	177
Periapical (dentoalveolar) abscess	137	Pathogenesis of odontogenic tumours	177
Collateral oedema	137	Benign epithelial tumours	178
'Fascial' or tissue space infections	138	Ameloblastomas	178
Facial cellulitis	138	Squamous odontogenic tumour	184
Facial abscess	141	Calcifying epithelial odontogenic tumour	184
Antibiotic abscess	141	Adenomatoid odontogenic tumour	186
Necrotising fasciitis	141	Benign epithelial and mesenchymal tumours	186
Cavernous sinus thrombosis	142	Ameloblastic fibrodentinoma and fibro-odontome	187
Noma (cancrum oris, necrotising stomatitis)	142	Primordial odontogenic tumour	188
Actinomycosis	144	Odontomes (odontomas)	188
The systemic mycoses	145	Calcifying odontogenic cyst	190
Systemic infections by oral bacteria	146	Dentinogenic ghost cell tumour	190
10 Cysts in and around the jaw	149	Benign mesenchymal tumours	191
Classification of cysts	149	Odontogenic fibroma	191
Common features of jaw cysts	150	Odontogenic myxoma	192
Treatment of jaw cysts	151	Cementoblastoma	193
Treatment of soft tissue cysts	152	Cemento-ossifying fibroma	193
Odontogenic cysts	153	Malignant odontogenic tumours	197
Radicular cyst	153	12 Non-odontogenic tumours of the jaws and facial skeleton	201
Inflammatory collateral cysts	156	Benign maxillofacial bone and cartilage tumours	201
Dentigerous cysts	157	Exostoses and tori	201
Eruption cyst	159	Dense bone islands	202
Odontogenic keratocyst	159	Osteomas	202
Orthokeratinised odontogenic cyst	165	Osteochondroma	203
Lateral periodontal and botryoid odontogenic cysts	166	Giant cell lesions of bone	204
Glandular odontogenic cyst	167	Central giant cell granuloma	205
Calcifying odontogenic cyst	168	Peripheral giant cell granuloma	206
Carcinoma arising in odontogenic cysts	168	Cherubism	206
Gingival cyst of the newborn	169	Bone cysts	208
Gingival cyst of adults	169	Simple bone cyst	208
Non-odontogenic cysts	169	Aneurysmal bone cyst	209
Nasopalatine duct cyst	169	Cystic haemorrhagic degeneration in other tumours	210
Surgical ciliated cyst	171		
Nasolabial cyst	171		

Fibro-osseous neoplasms and dysplasias	211	Herpes zoster of the trigeminal nerve	263
Cemento-osseous dysplasias	211	Cytomegalovirus ulcers	265
Fibrous dysplasia and Albright's syndrome	213	Hand-foot-and-mouth disease	265
Ossifying fibromas	216	Herpangina	265
Soft tissue tumours in the jaws	218	Measles	266
Haemangioma of bone	218	Chicken pox	266
Melanotic neuroectodermal tumour of infancy	219	Mpox	267
Ewing's sarcoma	220	Tuberculosis	267
Haematological tumours in the jaws	221	Syphilis	268
Langerhans cell histiocytosis	221	Candidosis	271
Myeloma	223	16 Diseases of the oral mucosa: non-infective	
Solitary plasmacytoma	224	stomatitis	283
Lymphoma	224	Ulcers	283
Primary malignant neoplasms of bone	224	Traumatic ulcers	283
Osteosarcoma	224	Recurrent aphthous stomatitis	285
Chondrosarcoma	226	Behçet's disease	288
Intraosseous rhabdomyosarcoma	226	HIV-associated oral ulcers	290
Metastases to the jaws	226	Nicorandil-induced ulcers	290
13 Inherited, metabolic and other		Miscellaneous mucosal ulcers	291
non-neoplastic bone diseases	231	Lichen planus and similar conditions	291
Inherited diseases of bone	231	Desquamative gingivitis	291
Metabolic bone disease	237	Lichen planus	291
Other bone diseases	240	Lichenoid lesion	298
14 Disorders of the temporomandibular		Lichenoid reactions	298
joints and trismus	245	Graft-versus-host disease	299
Temporary limitation of movement	245	Lupus erythematosus	300
Persistent limitation of movement:		Chronic ulcerative stomatitis	301
extracapsular causes	246	Immunobullous diseases	301
Persistent limitation of movement:		Pemphigus vulgaris	302
intracapsular causes	248	Mucous membrane pemphigoid	304
Limitation of movement: muscle causes	253	Toothpaste and mouthwash-induced epithelial peeling	306
Pain referred to the joint	256	Erythema multiforme	306
Dislocation	256	Stevens Johnson syndrome	308
		Other mucosal allergic responses	308
		Oral signs in reactive arthritis	308
SECTION 2: Soft tissue disease	259	Kawasaki's disease (mucocutaneous lymph node syndrome)	308
15 Diseases of the oral mucosa: mucosal		Multisystem inflammatory syndrome in children	310
infections	259	17 Tongue disorders	315
Ulcers	259	Normal structures	315
Herpesvirus diseases	259	Hamartomas and developmental anomalies	315
Primary herpetic stomatitis	259		
Herpes labialis	262		

Erythema migrans	316	20 Oral cancer	351
Lingual papillitis	317	Epidemiology	351
Hairy tongue and black hairy tongue	317	Aetiology	352
Glossitis	317	'Early' and 'late' oral carcinoma	357
Anaemic glossitis	317	Oral cancer distribution	357
Glossodynia and the sore, physically normal tongue	319	Pathology	358
Macroglossia	319	Management	361
Amyloidosis	319	Role of the dentist	367
Other diseases affecting the tongue	321	Oral cancer screening	368
18 Benign chronic white mucosal lesions	323	Verrucous carcinoma	369
Fordyce spots	323	Carcinoma cuniculatum	370
Leukoedema	323	Diagnostic catches	370
Frictional keratosis	324	21 Other mucosal and lip carcinomas	371
Cheek and tongue biting	325	Lip carcinoma	371
Stomatitis nicotina	325	Human papillomavirus—associated oropharyngeal carcinomas	371
Oral hairy leukoplakia	326	Nasopharyngeal carcinoma	375
White sponge naevus	328	Pseudocarcinomas and diagnostic catches	375
Other keratin diseases	328	22 Non-neoplastic diseases of salivary glands	377
Candidosis	328	Duct obstruction	377
Oral keratosis of renal failure	328	Mucocles and salivary cysts	378
Skin grafts	329	Acute sialadenitis	380
Psoriasis	330	Chronic sialadenitis	381
Other white lesions	330	Xerostomia	381
19 Potentially malignant disorders	331	Sjögren's syndrome	381
Erythroplakia	332	HIV-associated salivary gland disease	387
Speckled leukoplakia	333	IgG4 related disease	387
Leukoplakia	333	Eosinophilic (allergic) sialadenitis	387
Proliferative verrucous leukoplakia	334	Necrotising sialometaplasia	387
Stomatitis nicotina	335	Nodular oncocyctic hyperplasia	389
Smokeless tobacco-induced keratoses	335	Sarcoidosis	389
Chronic hyperplastic candidosis	336	Sialadenosis	389
Oral submucous fibrosis	336	Other salivary gland disorders	389
Lichen planus	338	Hypersalivation and drooling	391
Oral lichenoid lesion	338	23 Salivary gland tumours	395
Lupus erythematosus	339	Salivary gland neoplasms	395
Dyskeratosis congenita	339	Benign tumours	397
HPV-associated dysplasia	339	Malignant salivary gland tumours	402
Syphilitic leukoplakia	339	Metastatic neoplasms	407
Management of potentially malignant disorders	340	Non-epithelial tumours	407
Smoking cessation	346		

Intraosseous salivary gland tumours	408	Inherited clotting disorders	456
Tumour-like salivary gland swellings	408	Acquired clotting defects	458
24 Benign mucosal swellings	413	Combined bleeding disorders	459
Fibroepithelial polyp, epulis and denture-induced granuloma	413	Plasminogen deficiency	460
Papillary hyperplasia of the palate	414	30 Immunodeficiency	461
Pyogenic granuloma and pregnancy epulis	415	Selective IgA deficiency	461
Giant-cell epulis	415	C1 esterase inhibitor deficiency	462
Papillomas	416	Leukopenia and agranulocytosis	462
Verruciform xanthoma	419	Immunosuppressive treatment	462
Calibre-persistent artery	420	Other organ transplants	463
25 Soft tissue tumours	421	HIV infection and AIDS	463
Benign tumours	421	Oral lesions in HIV infection	466
Malignant connective tissue tumours	424	Risks of transmission of HIV infection to healthcare workers	471
26 Oral pigmented lesions	427	Risks of transmission of HIV to patients	472
Diffuse mucosal pigmentation	427	31 Allergy, autoimmune and autoinflammatory disease	473
Localised melanin pigmentation	427	Allergic or hypersensitivity reactions	473
Other localised pigmented lesions	431	Mucosal allergic responses	476
Melanoma	432	Angio-oedema	478
27 Cosmetic procedures	437	Autoimmune diseases	478
Tooth whitening	437	Autoinflammatory diseases	480
Tissue fillers	438	32 Cervical lymphadenopathy	483
Botulinum toxin	440	Investigation	483
Thread facelifts	441	Tuberculous cervical lymphadenopathy	484
Susuk needles	442	Atypical mycobacterial infection	485
Body art	442	Sarcoidosis	485
		Syphilis	486
		Cat-scratch disease	486
		Lyme disease	487
		Infectious mononucleosis	487
		HIV infection	487
		Toxoplasmosis	487
		Mucocutaneous lymph node syndrome (Kawasaki's disease)	488
		Langerhans cell histiocytosis	488
		Sinus histiocytosis with massive lymphadenopathy	488
		Castleman's disease	488
		Drug-associated lymphadenopathy	490
		Virchow's node	490
		Delphian node	490
SECTION 3: Systemic disease in dentistry	445		
28 Anaemias, leukaemias and lymphomas	445		
Anaemia	445		
Sickle cell disease and sickle cell trait	446		
The thalassaemias	447		
Leukaemia	447		
Lymphomas	449		
Leukopenia and agranulocytosis	452		
29 Haemorrhagic disorders	453		
Preoperative investigation	453		
Management of prolonged dental bleeding	453		
Blood vessel abnormalities	454		
Purpura and platelet disorders	454		

33 Cardiovascular disease	491	Multiple endocrine neoplasia	
General aspects of management	491	syndromes	528
Infective endocarditis	492	Diabetes mellitus	529
Prevention of endocarditis	493	Pregnancy	530
Implanted cardiac devices	495	38 Renal disease	533
34 Respiratory tract disease	497	Chronic renal failure and dialysis	533
Maxillary antrum disease	497	Renal transplantation	534
Acute sinusitis	497	39 Orofacial pain, headache and neurological disorders	535
Chronic sinusitis	497	Dental and periodontal pain	537
Surgical damage to the maxillary antrum	499	Pain in edentulous patients	537
Pneumatisation of the sinus	500	Painful mucosal lesions	538
Aspiration of a tooth, root or instrument	501	Pain in the jaws	538
Tuberculosis	501	Postsurgical pain and nerve damage	538
Chronic obstructive airways disease	501	Pain induced by mastication	539
Asthma	502	Pain from salivary glands	539
Midfacial destructive lesions	502	Neuralgia and neuropathy	539
Carcinoma of the antrum	504	Idiopathic orofacial pain	541
Cystic fibrosis (mucoviscidosis)	504	Paraesthesia and anaesthesia of the lower lip	543
Sleep apnoea syndrome	504	Facial palsy	544
Viral pneumonia	505	Bell's palsy	544
Bronchogenic carcinoma	506	Headache	546
35 Gastrointestinal and liver disease	509	Disturbances of taste and smell	547
Gastro-oesophageal reflux and gastric regurgitation	509	Epilepsy	549
Coeliac disease	509	40 Physical and learning disability	553
Crohn's disease	509	Discrimination legislation	554
Orofacial granulomatosis	510	Learning disability	555
Malabsorption syndromes	511	Behavioural disorders	557
Ulcerative colitis	511	Diseases causing physical impairments	558
Intestinal polyposis syndromes	512	41 Mental health conditions	563
Antibiotic-associated colitis	513	Pain without medical cause	563
Liver disease	513	Anxiety	563
Viral hepatitis	513	Depression	564
36 Nutritional deficiencies	519	Factitious ulceration	565
Vitamin deficiencies	519	Anorexia nervosa and bulimia nervosa	565
37 Endocrine disorders and pregnancy	523	Psychoses	566
Pituitary gigantism and acromegaly	523	42 Dentistry and older people	567
Thyroid disease	524	Dementia	567
Parathyroid disease	526	Other systemic diseases	568
Adrenocortical diseases	526	Oral disease in older people	569
Autoimmune polyendocrine syndromes	527		
Diseases of the adrenal medulla	528		

43 Complications of systemic drug treatment	571	Seizures	583
Local analgesics with vasoconstrictors	571	Other emergencies	583
Drug dependence and addiction	574	45 Adverse events in dentistry	585
44 Medical emergencies	577	SECTION 4: Learning guide and self-assessment questions 587	
Sudden loss of consciousness	577	46 Learning guide	587
Chest pain	581	Index	601
Respiratory difficulty	582
