

Introduction	7
Background, methods and previous studies.....	7
Stratigraphic framework of the North Karelia Schist Belt.....	10
Principal structural and metamorphic features	11
Terminology	12
Relationships between Kaleva and Jatuli associations; description	13
The eastern contact of the Kaleva mica schists	13
Nunnanlahti - Kuhnusta area.....	21
Kaleva lithotypes and lithological assemblages, description and interpretation	23
Lithological assemblage 1	24
Lithological assemblage 2	27
Lithological assemblage 3	28
Lithological assemblage 4	28
Lithological assemblage 5	31
Major element geochemistry	32
Chemical data	32
General aspects of sediment geochemistry	32
Major features and trends	37
Major elements and primary clastic components: the problem with K-feldspar	40
Regional comparisons	42
Provenance	44
Evidence from detrital components	44
Evaluation of major element geochemistry	44
Structural geology	48
Overall structural style	48
Structural sequence in the Kaleva mica schists	49
Thrusts and shear zones	54
Structural domains and regional correlation	55
Interpretation of structures	55
Structural interpretation of the eastern boundary of the Kaleva mica schists	59
Evolutionary models	61
Geochronological constraints	61
A depositional model for the study area	62
A model for the Kaleva sediments of the North Karelia Schist Belt	64
Crustal shortening stage; tectonic basin inversion	66
Summary and tectonic setting	68
Conclusions and suggestions for further work	73
Conclusions	73
Suggestions for further work	73
Acknowledgements	74
References	75
Appendix 1: XRF-analyses; location and short description of samples
