INTRODUCTION 13

PART ONE: Biodeterioration of Cultural Heritage 15

CHAPTER 1

Processes of Biodeterioration: General Mechanisms 15

by Daniela Pinna and Ornella Salvadori

1.1 General Principles	15
1.2 Processes of Biodeterioration	17
1.3 Processes of a Physical Nature	19
1.4 Chemical Processes	21
1.4.1 Acidolysis	21
1.4.2 Complexolysis	22
1.4.3 Alkaline Reactions	24
1.4.4 Selective Mobilization and Accumulation of Elements	25
1.4.5 Cationic Exchange	25
1.4.6 Enzymatic Degradation	26
1.4.7 Production of Pigments	28
1.5 The Appearance of Biodeterioration	31

CHAPTER 2

Ecology of Biodeterioration 35

by Giulia Caneva and Simona Ceschin

2.1 General Principles	35
------------------------	----

2.2 Ecological Factors and Their Relationships with Biodeterioration 36

2.2.1 Water	39
2.2.2 Light	41
2.2.3 Temperature	44
2.2.4 Characteristics of the Substrate	45
2.2.5 Chemical Characteristics of the Atmosphere	48
2.2.6 Climatic Factors	49

2.3 Plant and Microbial Communities: Functional and Dynamic Aspects 53

2.3.1 The Concept of Community and Phytosociology	53
2.3.2 Dynamism, Cycles, and Ecological Successions	55

CHAPTER 3

Structural, Functional, and Ecological Characteristics of the Main Biodeteriogens 59

3.1 Bacteria (Eubacteria and Archaea) 60

*by Giancarlo Ranalli, Clara Urzì,
and Claudia Sorlini*

3.1.1 Morphological and Structural Characteristics	61
3.1.2 Physiological and Reproductive Characteristics	62

3.1.2a Autotrophic Bacteria

Sulphur-oxidizing Bacteria

Nitrifying Bacteria

Hydrogen Bacteria

Iron Bacteria

3.1.2b Heterotrophic Bacteria

Proteolytic and Ammonifying Bacteria

Cellulolytic Bacteria

Amylolytic Bacteria

<i>Lipolytic Bacteria</i>		3.6.3 Ecological Characteristics	95
<i>Denitrifying Bacteria</i>			
3.1.3 Ecological Characteristics	64	CHAPTER 4	
3.2 Fungi	65	Biodeterioration Processes in Relation to Cultural Heritage Materials	97
<i>by Oriana Maggi, Anna Maria Persiani, Filomena De Leo, and Clara Urzì</i>		4.1 Materials of Plant Origin	97
3.2.1 Morphological and Structural Characteristics	65	4.1a General Characteristics of Materials of Plant Origin	97
3.2.2 Physiological and Reproductive Characteristics	67	<i>by Corrado Fanelli, Oriana Maggi, Anna Maria Persiani, and Paola Valenti</i>	
3.2.2a Asexual or Agamic Reproduction		4.1b General Processes of Biodeterioration of Materials of Plant Origin	99
3.2.2b Sexual Reproduction		<i>by Giovanna Pasquariello, Oriana Maggi, and Anna Maria Persiani</i>	
3.2.3 Ecological Characteristics	69	4.1.1 Wood	100
3.2.4 Meristematic Fungi	70	<i>by Stefano Berti, Corrado Fanelli, Sabrina Palanti, and Flavia Pinzari</i>	
<i>by Clara Urzì and Filomena De Leo</i>		4.1.1a Structure and Composition	100
3.3 Algae and Cyanobacteria	71	4.1.1b Biodeterioration of Wood	103
<i>by Maria Luisa Tomaselli and Anna Maria Pietrini</i>		4.1.2 Paper	108
3.3.1 Structural and Morphological Characteristics	72	<i>by Giovanna Pasquariello, Paola Valenti, Oriana Maggi, and Anna Maria Persiani</i>	
3.3.2 Physiological and Reproductive Characteristics	75	4.1.2a Structure and Composition	108
3.3.3 Ecological Characteristics	75	4.1.2b Biodeterioration of Paper	109
3.4 Lichens	77	4.1.3 Textile Fibers (Cotton, Linen, and Other Fibers)	113
<i>by Rosanna Piervittori, Pierluigi Nimis, and Mauro Tretiach</i>		<i>by Maria Pia Nugari</i>	
3.4.1 Structural and Morphological Characteristics	77	4.1.3a Structure and Composition	113
3.4.2 Physiological and Reproductive Characteristics	79	4.1.3b Biodeterioration of Textiles of Plant Origin	114
3.4.3 Ecological Characteristics	80	4.2 Materials of Animal Origin	116
3.5 Bryophytes	81	<i>by Maria Pia Nugari</i>	
<i>by Sandra Ricci</i>		4.2a General Characteristics of Materials of Animal Origin	116
3.5.1 Structural and Morphological Characteristics	82	4.2b General Processes Involved in the Biodeterioration of Materials of Animal Origin	117
3.5.2 Physiological and Reproductive Characteristics	84	4.2.1 Parchment and Leather	118
3.5.3 Ecological Characteristics	86	4.2.1a Structure and Composition	118
3.6 Vascular Plants	87	4.2.1b Biodeterioration of Leather and Parchment	120
<i>by Ettore Pacini and Maria Adele Signorini</i>		4.2.2 Textile Fibers (Silk and Wool)	124
3.6.1 Structural and Morphological Characteristics	87	4.2.2a Structure and Composition	124
3.6.2 Physiological and Reproductive Characteristics	93		

4.2.2b <i>Biodeterioration of Fibers of Animal Origin</i>	127	by Giovanna Pasquariello, Paola Valenti, Oriana Maggi, and Anna Maria Persiani	
4.3 Stone and Related Materials	128		
by Daniela Pinna and Ornella Salvadori			
4.3.1 Natural Stone Materials	129		
4.3.1a <i>Structure and Composition</i>	129	5.1.1a <i>Characteristics of the Environment and of the Materials</i>	171
4.3.1b <i>Biodeterioration of Natural Stone</i>	131	5.1.1b <i>Problems of Biodeterioration</i>	174
4.3.2 Artificial Stone	144	5.1.2 Museums	175
by Maria Pia Nugari, Daniela Pinna, and Ornella Salvadori		by Maria Pia Nugari, Oriana Maggi, and Anna Maria Persiani	
4.3.2a <i>Structure and Composition</i>	144	5.1.2a <i>Characteristics of the Environment and of the Materials</i>	175
4.3.2b <i>Biodeterioration of Artificial Stone Materials</i>	146	5.1.2b <i>Problems of Biodeterioration</i>	177
4.4 Metallic and Vitreous Materials	149	5.1.3 Churches and Crypts	179
4.4.1 Glass	149	by Anna Maria Pietrini, Sandra Ricci, and Maria Pia Nugari	
by Giulia Caneva and Simona Ceschin		5.1.3a <i>Characteristics of the Environment and of the Materials</i>	179
4.4.1a <i>Structure and Composition</i>	149	5.1.3b <i>Problems of Biodeterioration</i>	181
4.4.1b <i>Biodeterioration of Glass</i>	150	5.1.4 Tombs, Catacombs, and Other Hypogean Environments	183
4.4.2 Metals	153	by Patrizia Albertano, Clara Urzì, and Giulia Caneva	
by Elisabetta Zanardini, Francesca Cappitelli, Giancarlo Ranalli, and Claudia Sorlini		5.1.4a <i>Characteristics of the Environment and of the Materials</i>	183
4.4.2a <i>Structure and Composition</i>	153	5.1.4b <i>Problems of Biodeterioration</i>	186
4.4.2b <i>Biodeterioration of Metals</i>	154	5.2 Outdoor Environments	190
4.5 Composite Materials	156	5.2.1 Monuments and Artifacts in Urban Environments	190
4.5.1 Easel Paintings	157	by Giulia Caneva, Simona Ceschin, and Maria Luisa Tomaselli	
by Maria Pia Nugari		5.2.1a <i>Characteristics of the Environment and of the Materials</i>	190
4.5.1a <i>Structure and Composition</i>	157	5.2.1b <i>Problems of Biodeterioration</i>	192
4.5.1b <i>Biodeterioration of Easel Paintings</i>	158	5.2.2 Monuments and Artifacts in Parks and Rural Environments	194
4.5.2 Photographic Materials	160	by Giulia Caneva, Rosanna Piervittori, Ada Roccardi, and Maria Luisa Tomaselli	
by Donatella Matè, Giovanna Pasquariello, and Maria Carla Sclocchi		5.2.2a <i>Characteristics of the Environment and of the Materials</i>	194
4.5.2a <i>Structure and Composition</i>	160	5.2.2b <i>Problems of Biodeterioration</i>	195
4.5.2b <i>Biodeterioration of Photographic Materials</i>	163	5.2.3 Monuments and Artifacts in Coastal Environments	197
4.6 Products Employed in Conservation	166	by Antonella Altieri and Daniela Pinna	
by Maria Pia Nugari and Ornella Salvadori		5.2.3a <i>Characteristics of the Environment and of the Materials</i>	197
CHAPTER 5		5.2.3b <i>Problems of Biodeterioration</i>	198
Problems of Biodeterioration in Relation to Particular Types of Environments	171		
5.1. Enclosed Environments	171		
5.1.1 Libraries and Archives	171		

5.2.4 Fountains and Nymphaea <i>by Anna Maria Pietrini and Sandra Ricci</i>	200	PART TWO:	
5.2.4a <i>Characteristics of the Environment and of the Materials</i>	200	Conservation of Cultural Heritage	273
5.2.4b <i>Problems of Biodeterioration</i>	202	CHAPTER 7	
5.3 Semiencloused Environments	206	Prevention of Biodeterioration	273
<i>by Ada Roccardi, Sandra Ricci, and Anna Maria Pietrini</i>		7.1. Guidelines for Preventive Conservation	273
5.3.1 Loggias and Porticoes	206	7.1.1 Enclosed Environments	274
5.3.1a <i>Characteristics of the Environment and of the Materials</i>	206	7.1.1a <i>Museums, Archives, and Libraries</i>	274
5.3.1b <i>Problems of Biodeterioration</i>	207	<i>by Giovanna Pasquariello, Maria Carla Sclocchi, Donatella Matè, and Paola Valenti</i>	
5.3.2 Rupestrian Environments	208	7.1.1b <i>Churches, Crypts, and Subterranean Environments</i>	282
5.3.2a <i>Characteristics of the Environment and of the Materials</i>	208	<i>by Maria Pia Nugari and Anna Maria Pietrini</i>	
5.3.2b <i>Problems of Biodeterioration</i>	209	7.1.2 Outdoor Environments	
5.4 Marine and Freshwater Environments	211	<i>by Antonella Altieri and Daniela Pinna</i>	287
<i>by Sandra Ricci and Maria Pia Nugari</i>		7.1.2a <i>Direct Interventions on Materials in Use</i>	287
5.4a Characteristics of the Environment and of the Materials	211	7.1.2b <i>Protective Interventions in Archaeological Sites</i>	288
5.4b Problems of Biodeterioration	212	7.1.2c <i>Interventions on the Environment</i>	292
5.5 Edaphic Environments	214	7.2 Microclimate Monitoring	294
<i>by Claudia Sorlini, Giancarlo Ranalli, and Elisabetta Zanardini</i>		<i>by Elisabetta Giani</i>	
5.5a Characteristics of the Environment and of the Materials	214	7.2.1 Thermohygrometric Parameters	294
5.5b Problems of Biodeterioration	216	7.2.2 Measurement Campaigns	296
CHAPTER 6		7.2.3 Data Analysis	298
Biodeterioration Problems in Relation to Geographical and Climatic Contexts	219	7.3 Aerobiological Monitoring	298
<i>by Giulia Caneva and Alessandra Pacini</i>		<i>by Paolo Mandrioli, Giovanna Pasquariello, and Ada Roccardi</i>	
6.1 General Principles	219	7.3.1 Measurement Campaigns	301
6.1.1 Historical and Biogeographical Aspects	220	7.4 The Prevention of Biological Risk: Health Aspects Related to Microflora	302
6.1.2 Bioclimatic and Biogeographical Regions	221	<i>by Gianfranco Tarsitani</i>	
6.2 Problems of Biodeterioration	222	7.4.1 A Health-conscious Approach to Microbiology	303
6.2.1 Desert Climates	222	7.4.2 Diseases of Cultural Heritage Personnel	305
6.2.2 Mediterranean Climates	227	7.4.3 Air-transmitted Diseases	305
6.2.3 Temperate Climates	230		
6.2.4 Tropical Climates	233		
PLATES	239		

CHAPTER 8

**Control of Biodeterioration and
Bioremediation Techniques****8.1 Methodological Aspects
of the Treatments***by Giulia Caneva, Maria Pia Nugari,
and Ornella Salvadori***8.2 Mechanical Methods***by Giulia Caneva, Maria Pia Nugari,
and Ornella Salvadori***8.3 Physical Methods***by Stefano Berti, Flavia Pinzari,
and Piero Tiano***8.3.1 Organic Materials****8.3.2 Inorganic Materials****8.4 Chemical Methods***by Giulia Caneva, Maria Pia Nugari,
and Ornella Salvadori***8.4.1 Organic Materials***by Maria Pia Nugari, Corrado Fanelli,
and Sabrina Palanti***8.4.2 Stone Materials***by Maria Pia Nugari and
Ornella Salvadori***8.4.2a Disinfection****8.4.2b Herbicide Treatments***by Giulia Caneva, Maria Pia Nugari,
and Ornella Salvadori***8.5 Bioremediation***by Giancarlo Ranalli and Claudia Sorlini***8.5.1 Microorganisms Employed
in Cleaning****8.5.1a Bioremoval/Biocleaning
of Unwanted Organic Substances****8.5.1b Bioremoval/Biocleaning
of Sulphates and Nitrates****8.5.1c Bioremoval/Biocleaning
of Calcium Oxalate Patinas****8.5.2 Enzymes Used in Cleaning****8.5.3 Biocalcification for the
Consolidation of Stone**

CHAPTER 9

Techniques and Methods of Investigation**9.1 Techniques for the Study of
Biodeterioration***by Ornella Salvadori and Clara Urzì***9.1.1 Sampling****9.1.2 Identification of Microorganisms****9.1.2a. Techniques Based on Cultures****9.1.2b. Molecular Techniques****9.1.2c. Identification of Microorganisms
by Means of FISH****9.1.2d. Detection of Microbial Activity****9.1.3 Identification of Macroflora and
Ecological Analysis****9.1.4 Analysis for the Assessment of the
Relationship with the Substrate and of
the Induced Deterioration****9.1.4a. Observation of Biological****Specimens under the Optical Microscope****9.1.4b. Observation under the
Electronic Microscope****9.1.4c. Identification of the Induced
Deterioration and of Neoformation
Products****9.1.5 Measurement of Airborne
Microflora****9.2 Methods for Evaluating
Conservation Products***by Maria Pia Nugari and Ornella Salvadori***9.2.1 Evaluation of Biocides****9.2.1a Evaluation of Efficacy****9.2.1b Evaluation of Biocide-Substrate
Interactions****9.2.2 Evaluation of the Susceptibility
to Biodeterioration of Conservation
Products****9.2.2a Tests on the Products Themselves****9.2.2b Tests on the Products as
Applied onto a Substrate****9.2.2c Modifications of the
Performance Characteristics****BIBLIOGRAPHY****CONTRIBUTORS****INDEX**
