Introduction 6

1 A House Built of Elements 8

Atoms, molecules, and the infinite connections of chemistry

2 The Power of Names 24

The right name makes all the difference

3 Dead or Alive 46

Living or nonliving, rock or wool, what is organic?

4 Oil and Water 56

Soap brings together ancient enemies

5 Mineral and Vegetable 70

The two worlds of sticky, oily, pasty things

6 Rock and Ore 86

Rocks, minerals, and the source of all compounds

7 Rope and Fiber 102

Yes, ropes really are made of long, thin molecules

8 Pain and Pleasure 138

A family tree of painkillers and their cousins

9 Sweet and Double Sweet 156

Sugar and all the tasty things that are not sugar

10 Natural and Artificial 174

Who does a better job, us or Mother Nature?

11 Rose and Skunk 186

Some molecules smell really good, and some really don't

12 Color Me Chemical 198

The beautiful palette of molecules

13 I Hate That Molecule 216

Poor innocent compounds caught up in politics

14 Machines of Life 228

When is a molecule not a molecule?
