

Chapters

- Introduction** 3
- 1 The Legal Design Philosophies** 13
Ten fundamental principles that are essential for successful legal design projects.
- 2 What is Legal Design?** 45
An initial definition of legal design and an in-depth look at the broad field of design.
- 3 Why Legal Design?** 79
The legal market is facing various challenges. We illustrate how these challenges can be mastered with legal design.
- 4 The Legal Design Process** 109
A practical instruction on how to successfully realize legal design projects. The chapter contains a step-by-step description of the process from beginning to end.
- 5 Field Work** 157
Six different examples from across the world demonstrate the variety and diversity of how legal design can be implemented in different ecosystems.

6	The Role of Legal Designers	231
	Legal designers need to have different skills and knowledge. Our “floating model” describes what the professional profile of a legal designer should look like.	
7	Legal User Experiences	255
	Legal work and services can have different levels of quality, which can be easily classified using our legal quality pyramid.	
8	The Value of Legal Design	263
	What can’t be measured is worth, well, not much. We show how basic KPIs can be defined and measured in the context of legal design.
