

Contents

<i>Preface</i>	<i>xiii</i>
<i>A Thumbnail Sketch of Our Journey</i>	<i>xvii</i>
1 Our Sense of Time: Time's Arrow	1
Our Awareness of Time	1
The Stream of Consciousness	2
Inner Time versus Physics Time	4
The Way the Cookie Crumbles	6
How to Predict the Future from the Past	8
Why the Cookie Crumbles	11
Can Time Go Backward?	12
Time and Our Perception of Reality	13
2 Information Arrows	15
Retrieving the Past	15
The Arrows of Time and Information	19
The Products of Information Arrows: An Overview	21
Life's Arrow	22
The Strange Circles at Coordinates 0,0,0	25
Molecular Demons	26
Wresting Information from Entropy:	
The Quintessence of Cognition	28
Who Shoulders Life's Arrow?	32
3 The Second Coming	35
The Demons for Fast Information Transmission	36
The Sensory Demons	41

A Generalized Sensory Scheme	42
The Demon Tandem	44
How the Demon Tandems Censor Incoming Information	46
4 The Sensors	49
The Sensory Transducer Unit	49
A Lesson in Economics from a Master	51
The Silent Partner	53
How Electrical Sensory Signals Are Generated	54
5 Quantum Sensing	57
The Quantum World	58
Our Windows to the Quantum World	61
Coherent Quantum Information Transmission	64
The Advantages of Being Stable	66
Why We See the Rainbow	67
The Demons Behind Our Pictures in the Mind:	
A Darwinistic Physics View	70
Why White Is White	72
The Quantum View	75
Again, Why White Is White	76
Lady Evolution's Quantum Game Plan	77
Quantum Particles That Don't Cut the Mustard	78
6 Quantum into Molecular Information	81
Boosting the Quantum	81
A Consummate Sleight of Hand	83
The Ubiquitous Membrane Demon	86
7 Molecular Sensing	87
A Direct Line from Nose to Cortex	87
A Thousand Information Channels of Smell	89
Mapping, Coding, and Synonymity	90
Molecular Sensory Synonymity	92
Why Sensory Synonymity	95
Quantum Synonymity	97
Harmless Double Entendres	98

8	Electronic Transmission of Biological Information	99
	Evolution's Favorite Leptons	99
	Electronic Information Transmission: A Development Stumped	101
	Two Old Batteries	103
9	The Random Generators of Biomolecular Complexity	107
	Genuine Transmogrification	107
	A Quantum Random Generator of Molecular Form	109
	The Heuristics of Transmogrification	113
	The Random Generator and Our Genetic Heritage	114
	An Algorithm Is No Substitute for a Demon	116
	The Second Generator of Biomolecular Form	118
	Complexity as a Windfall	122
	Ikats	122
10	The Ascent of the Digital Demons	125
	Quantum Electron Tunneling	125
	The Electronic Cul-de-Sac	127
	The Rise of the Digital Demons	127
	Do Plants Have Digital Demons, Too?	128
11	The Second Information Arrow and Its Astonishing Dénouement: Consciousness	131
	The Structure of Time	132
	The Evolutionary Niche in the Structure of Time: A Hypothesis	133
	Forecognition	134
12	How to Represent the World	137
	The Universal Turing Machine	137
	Rendering the World by Computer	140
	The Neuronal Virtual-Reality Generator	142
	Our Biased World Picture	143
	Computing by Neurons	145
	Correcting Our World Picture	148
	Flying the Coop of Our Senses	149

13	Expanded Reality	155
	A Fine Bouquet	155
	Mathematics and Reality	156
	The Neuron Circuitry of Language	157
	The Feathers of the Brain	159
	Mathematics and Forecognition	160
	The Reluctant Sensory Brain	161
	The Limits of Knowledge	162
	A Note About Reality	163
14	Information Processing in the Brain	165
	Cell Organization in the Brain	166
	Cortical Information-Processing Units	168
	Cortical-Cell Topography and Worldview	170
	A Last-Minute Change in Worldview	173
	Retrieving a Lost Dimension	175
	Information Processing in the Brain from the Bottom Up	178
	Being of One Mind	179
	Two Minds in One Body?	182
	An Old Pathway Between Brain Hemispheres for Information Producing Emotion	183
	The Virtues of Parallel Computation	184
15	Information Transforms in the Cortex and the Genesis of Meaning	189
	The Censoring of Sensory Information	189
	What the Eyes Tell the Brain	191
	Coding for the Vertical, the Horizontal, and the Oblique	193
	The Neuron Pecking Order	194
	The Grandmother Cell	196
	Distributed Coding	200
	The Imprinting of Cortical Cells	202
	The Begetting of Meaning	204
	How to Measure Meaning	205
	Logical Depth	206
	Lowbrow Meaning	208

16	The Conscious Experience	215
	The Consciousness Polychrome	216
	Consciousness, Sensory Information Processing, and Computing	216
	The Conscious Experience of the Passing of Time, and Memory	217
	Unconscious Thinking	219
	From Piecemeal Information to Unity of Mind	221
	Feelings and Emotions	223
	Gut Feelings	226
	Two Ways for Information to Get to the Promised Land	227
	The Virtues of Signal Synchrony as a Higher-Order Sensory Code	228
	Signal Synchrony and Conscious Perception	229
	Neuronal Synchronization during Competition for Access to Consciousness	231
17	Consciousness and Quantum Information	235
	Boltzmann's World	235
	Where the Quantum World May Come into Evolution's Ultimate Information Enterprise	237
	Quantum Information Waves	238
	The Vanishing Act	240
	Are Quantum Waves and Consciousness Entangled?	242
	Irretrievable Quantum Information Losses: Decoherence	243
	Why Our Weltanschauung Is So Narrow: An Unexpected Lesson for Philosophy	245
	On the Possibility of Quantum Coherence in the Brain	246
18	Molecular Quantum Information	
	Processing and Quantum Computing	249
	Quantum Computers	250
	The Advantages of Quantum Computing	251
	Quantum Computers in the Real: Computing with Atoms	252
	Quantum Computing with Atomic Nuclei	254
	Natural Quantum-Computer Games	256
	How to Rig a Molecular Quantum Computer	259
	Toward Multi-Qubit Computers	261

19	Quantum Information Processing and the Brain	265
	Naturally Slow Decoherence	265
	A View of Evolution from the Quantum Bottom	266
	Two Variations on an Ancient Biological Quantum Theme	267
	A Final Darwinistic-Physics Inquirendo and a Hypothesis	269
	Neuronal Quantum Computing in Light of the Hypothesis	271
	Explanatory Remarks on the Hypothesis	273
	Prospects	274
	<i>Appendix</i>	277
	<i>Recommended Reading</i>	281
	<i>References</i>	283
	<i>Acknowledgments</i>	309
	<i>Illustrations and Other Credits</i>	311
	<i>Index</i>	313
