

Obsah

Introduction.....	5
1 Theoretical Background for AAC.....	7
1.1 Definition of AAC	7
1.2 AAC in the Czech Republic and abroad	9
1.3 Classification of Potential AAC User Groups	10
1.4 Diagnostic Factors for Selecting the AAC System	12
1.5 AAC System Classification	14
1.6 The Positives and Negatives of the AAC System Use in Special Education Practice.....	16
1.7 Use of Special Hardware and Software with respect to AAC.....	18
1.7.1 Use of Special Hardware with respect to AAC.....	18
1.7.2 Use of Special Software with respect to AAC.....	25
2 Use of AAC in Communication with Individuals with Mental Disability, Dementia or Autistic Spectrum Disorder.....	31
2.1 AAC in Individuals with MD.....	32
2.1.1 Brief Description of Individuals with Mental Retardation.....	32
2.1.2 Use of AAC in Individuals with Congenital Mental Retardation.....	36
2.1.3 Factors for Selecting the AAC System in Individuals with Mental Retardation.....	37
2.1.4 Description of a Selected AAC System Applicable in Communication with Individuals with MD.....	37
2.2 AAC in Individuals with Dementia	45
2.2.1 Description of Individuals with Dementia.....	45
2.2.2 Symptomatology of Dementia	47
2.2.3 AAC in the Area of Social Services.....	48
2.2.4 Cognitive Training.....	48
2.2.5 Impairment of Communication Ability in Individuals with Dementia.....	49
2.2.6 Using AAC-based Communication in Individuals with Dementia.....	51
2.3 AAC in Individuals with Autistic Spectrum Disorders.....	54
2.3.1 Individuals with Autistics Spectrum Disorders	54
2.3.2 Using AAC in Individuals with ASD	56
2.3.3 Establishing Functional Communication in Individuals with ASD Using AAC.....	61
3 Agumentative and Alternative Communication (AAC) Systems Applicable in Persons with Disabilities.....	67
3.1 Characteristics of individuals with ICP	68
3.1.1 ICP in the context of combined disorders	68
3.2 Diagnosis of individuals with physical disability in relation to selection of AAC system.....	70
3.2.1 Aspects for the selection of AAC systems for individuals with ICP.....	71
3.2.2 Bliss's system in communication with individuals with mobility disorder.....	75

3.3	Specification of the application of AAC systems in individuals with ICP	77
4	AAC in persons with impaired communication competences (ICC).....	83
4.1.1	The use of AAC in individuals diagnosed with developmental dysphasia	85
4.2	Characteristics of individuals diagnosed with aphasia.....	87
4.2.1	The use of AAC in individuals diagnosed with aphasia ...	88
4.3	Brief characteristics of individuals diagnosed with dysarthria and anarthria.....	89
4.3.1	The use of AAC in individuals diagnosed with dysarthria/anarthria	90
5	AAC in individuals with visual impairment	93
5.1	Individual with visual impairment	93
5.2	Communication of individuals with VI through real objects, photographs and pictures.....	95
5.3	The use of pictograms and VOKS symbols in individuals with VI.....	95
5.4	AAC systems built on motor skills and gestures of individual with VI	96
5.5	Written communication of blind people – Braille Font	96
5.6	Methodological aspects for selecting AAC systems for individuals with VI	98
6	Possibilities of use of AAC in individuals with auditory and dual sensory impairment	101
6.1	The use of AAC systems in individuals with hearing disability	101
6.1.1	Finger alphabets and phonemic sign codes	102
6.1.2	Sign systems	105
6.2	The use of AAC systems in individuals with dual sensory disability – deafness-blindness.....	110
6.2.1	Communication systems based on spoken language	111
6.2.2	Communication systems based on sign language	117
6.2.3	Non-verbal communications systems	119
	Conclusion.....	125
	Literature cited and recommended.....	127
	Profile Author of the Study Support.....	133
