

CONTENTS

1. Introduction _____ 7
2. Principles of retention of complete dentures _____ 8
3. The anatomy of the basal seat _____ 12
 - 3.1 The edentulous upper jaw _____ 12
 - 3.2 The edentulous lower jaw _____ 14
4. Management and denture fabrication _____ 16
5. Examination of the patient _____ 17
 - 5.1 Extraoral examination _____ 17
 - 5.2 Intraoral examination _____ 17
6. Impression taking of edentulous jaws _____ 19
 - 6.1 Preliminary impression _____ 19
 - 6.2 Definitive impression _____ 20
 - 6.2.1 Preparation of the individual trays for the impression _____ 20
 - 6.2.2 Functional modelling of the individual tray margins _____ 21
 - 6.2.3 The Definitive Impression _____ 22
 - 6.2.4 The methods of definitive (master or working) impression taking of edentulous jaws _____ 23
 - 6.2.5 Casting of the definitive impressions _____ 24
7. The reconstruction of jaw relationships & occlusal plane _____ 25
 - 7.1 The reconstruction of occlusal plane _____ 26
 - 7.2 The reconstruction of vertical relations (bite height) _____ 28
 - 7.3 Estimation and registration of the horizontal (centric) jaw relation _____ 30
 - 7.4 Connecting the record blocks together and registering orientation points _____ 31
8. The selection of teeth _____ 34
9. Mounting the models to the articulatory device _____ 35
 - 9.1 Mounting models to the occludor _____ 35
 - 9.2 Mounting models to the articulator _____ 35
10. Setting up the teeth _____ 37
 - 10.1 Arrangement of frontal teeth _____ 37
 - 10.1.1 Incisors _____ 38
 - 10.1.2 Canines _____ 38
 - 10.2 Static rules for setting up of artificial lateral teeth _____ 39
 - 10.2.1 Rule of the alveolar crest line _____ 40
 - 10.2.2 Rule of the inter-ridge axis ("interalveolar axis") _____ 41
 - Summary _____ 43
 - 10.3 The complete arrangement of artificial dental arches _____ 43
11. Trying the denture models _____ 46
 - 11.1 Aesthetics _____ 46
 - 11.2 Statics _____ 47
 - 11.3 Articulation _____ 48
 - 11.4 Phonetics _____ 49
 - 11.5 Correcting and adjusting the denture models and relieving the denture models _____ 50
12. Delivering the finished dentures _____ 52
 - 12.1 Instructing the patient _____ 53
13. The immediate complete denture _____ 56

14. Overdentures	58
15. Rebasing of complete dentures / denture reline	59
15.1 Direct rebasing	59
15.2 Indirect rebasing	60
15.3 Rebasing with elastic materials (soft relining)	60
16. Repairs of dentures	61
