

Contents

- 1. BASICS OF PHYSIOLOGICAL REGULATIONS (*B. Mravec*) 13
 - 1.1 Internal environment 13
 - 1.2 Homeostasis 14
 - 1.2.1 Homeostats. 15
 - 1.2.2 Negative and positive feedback. 16
 - 1.2.3 Feed-forward regulation 17
 - 1.3 Levels of homeostatic regulations 17
 - 1.3.1 Cellular homeostatic regulations. 18
 - 1.3.2 Tissue homeostatic regulations. 18
 - 1.3.3 Systemic homeostatic regulations 19
 - 1.4 Allostasis 20
 - 1.4.1 Allostatic overload. 21
- 2. PHYSIOLOGY OF EXCITABLE TISSUES (*D. Ostatníková*) 23
 - 2.1 Organization of the nervous system – nerve cells. 23
 - 2.2 Electrical activity in the nerve cells. 25
 - 2.3 Neurotransmitters and neuromodulators 27
 - 2.4 Excitation of a neuron, nerve conduction 29
 - 2.4.1 Refractory periods. 33
 - 2.4.2 Conduction of the nerve impulses 34
 - 2.5 Skeletal muscle physiology 34
 - 2.5.1 Structure of skeletal muscle. 35
 - 2.5.2 Functional division of skeletal muscle. 36
 - 2.5.3 Skeletal muscle excitation and contraction 37
 - 2.5.4 Muscle fatigue 39
 - 2.5.5 Smooth muscle physiology 40
- 3. SENSES (*R. Važan*) 43
 - 3.1 General physiology of senses 43
 - 3.1.1 Classification of senses 43
 - 3.1.2 General structure and properties of the sensory systems 43
 - 3.2 Sense of vision 44
 - 3.2.1 Functional morphology. 44
 - 3.2.2 Projection of objects onto the retina and accommodation 45
 - 3.2.3 Emmetropic and ammetropic eyes 46
 - 3.2.4 Structure and functions of retina 47
 - 3.2.5 Visual field, central and peripheral vision, stereoscopic vision 49
 - 3.2.6 Adaptation of eyes to different intensities of light 51
 - 3.3 Sense of hearing 52
 - 3.3.1 Functional morphology. 52
 - 3.3.2 Conduction of sounds and function of the cochlea 54
 - 3.3.3 Perception of sound source location. 54

3.3.4 Hearing disorders	55
3.4 Sense of balance	55
3.4.1 Functional morphology.	55
3.4.2 Nystagmus and vertigo	56
3.5 Sense of taste and sense of smell	57
3.5.1 Functional morphology.	57
3.5.2 Basic modalities of taste and smell.	58
3.6 General (somatovisceral) sensory system	58
3.6.1 Tactile sensitivity	59
3.6.2 Thermoreception	60
3.6.3 Nociception	60
3.6.4 Proprioception.	61
4. CENTRAL NERVOUS SYSTEM (D. Ostatníková, J. Babková)	63
4.1 Integrative functions of the CNS	64
4.2 Brain development.	64
4.3 Hierarchical organisation of the CNS	66
4.4 Diffuse modulatory system	69
4.5 Sensory division of the CNS	70
4.6 Motor division of the CNS	71
4.7 Autonomic nervous system	76
4.8 Sleep and wakefulness	78
4.8.1 Brain activity recording.	79
4.8.2 Stages of sleep	80
4.9 Emotions	81
4.10 Learning and memory	83
4.11 Speech	87
4.12 Functional specialisation of the brain hemispheres.	89
5. BODY FLUIDS AND BLOOD (K. Babinská)	93
5.1 Body fluids	93
5.2 Composition, properties and functions of blood	94
5.3 Plasma	96
5.3.1 Osmotic and oncotic pressures of plasma.	97
5.4 Erythrocytes and their functions	98
5.4.1 Haemoglobin.	99
5.4.2 Fate and destruction of erythrocytes	100
5.5 Platelets and haemostasis	101
5.5.1 Haemostasis	101
5.5.1.1 Vascular reaction	101
5.5.1.2 Activity of the platelets	101
5.5.1.3 Haemocoagulation	102
5.5.1.4 Fibrinolysis	103
5.5.1.5 Anticoagulant mechanisms	104
5.6 Leukocytes and immunity	105
5.6.1 Main functions and life cycle of leukocytes.	105

5.6.2 Leukocytes and their immune functions	106
5.6.2.1 Innate immunity	107
5.6.2.2 Acquired immunity.	107
5.6.2.3 Active and passive immunization	108
5.7 Blood groups	108
5.7.1 ABO system	108
5.7.2 Rhesus (Rh) system	110
5.7.3 Other blood group systems and the cross matching test	111
5.8 Haematopoiesis	111
5.9 Blood and regulation of acid-base balance	114
6. RESPIRATION (J. Radošinská)	117
6.1 Lung ventilation	117
6.1.1 Interpleural and alveolar pressure	117
6.1.2 Mechanics of breathing	118
6.1.2.1 Mechanics of inspiration.	118
6.1.2.2 Mechanics of expiration	119
6.1.3 Lung compliance.	120
6.1.4 Relaxation position of the chest and lungs	122
6.1.5 Lung volumes and capacities	122
6.1.6 Minute lung ventilation.	123
6.1.7 Dead space	124
6.1.8 Alveolar ventilation	125
6.2 Exchange of respiratory gases through the alveolocapillary barrier	125
6.2.1 Partial pressure.	125
6.2.2 Composition of alveolar and expired air	126
6.2.3 Exchange of respiratory gases through the alveolocapillary barrier	126
6.3 Perfusion of alveoli	127
6.4 Transport of respiratory gases in blood	128
6.4.1 Transport of oxygen	128
6.4.1.1 Physically dissolved oxygen	128
6.4.1.2 Oxygen chemically bound to the molecule of haemoglobin	128
6.4.2 Transport of carbon dioxide	130
6.4.2.1 Physically dissolved carbon dioxide.	130
6.4.2.2 Chemically bound carbon dioxide	130
6.4.2.3 Carbon dioxide in the form of bicarbonate	130
6.5 Regulation of ventilation	131
6.6 Mechanisms of breathing during the diving and in high altitudes	132
6.6.1 Mechanisms of breathing during the diving	132
6.6.2 Mechanisms of breathing in high altitudes	133
7. CARDIOVASCULAR AND LYMPHATIC SYSTEM (J. Radošinská).	135
7.1 Heart.	135
7.1.1 Functional morphology of the heart.	135
7.1.2 Physiological properties of the cardiac muscle	135
7.1.2.1 Autorhythmicity – chronotropy.	136

7.1.2.2 Conductivity – dromotropy	137
7.1.2.3 Excitability – bathmotropy.	138
7.1.2.4 Contractility – inotropy	139
7.1.3 Cardiac cycle	140
7.1.3.1 Isovolumic contraction of the ventricles	140
7.1.3.2 Ejection period	141
7.1.3.3 Isovolumic relaxation.	141
7.1.3.4 Filling of the ventricles	141
7.1.4 Metabolism of the cardiac muscle	141
7.1.5 Regulation of the heart	142
7.1.5.1 Autoregulation of the heart – Frank-Starling mechanism	143
7.1.5.2 Nervous regulation	144
7.1.5.3 Humoral regulation.	145
7.1.5.4 Effect of changes in the temperature	146
7.1.6 Manifestation of the heart activity.	146
7.1.6.1 Electrical manifestation of the heart activity.	146
7.1.6.2 Heart sounds - acoustic manifestation of the heart activity . . .	151
7.1.6.3. Arterial pulse - mechanical manifestation of the heart activity	152
7.2 Vascular system.	152
7.2.1 Functional morphology of the vessels	152
7.2.2 Hemodynamics	153
7.2.3 Physiology of the arterial system.	155
7.2.4 Physiology of the microcirculation	156
7.2.5 Physiology of the venous system.	158
7.2.6 Regulation of circulation	159
7.2.6.1 Local regulatory mechanisms	159
7.2.6.2 Humoral regulation of vessels	160
7.2.6.3 Nervous regulation of vessels	161
7.2.6.4 Regulation of the circulating blood volume	161
7.2.7 Specifics of selected circulations	162
7.2.7.1 Coronary circulation	162
7.2.7.2 Cerebral circulation.	162
7.2.7.3 Pulmonary circulation	163
7.2.7.4 Renal circulation	163
7.2.7.5 Hepatic circulation	164
7.2.7.6 Skin circulation	164
7.2.7.7 Skeletal muscle circulation.	164
7.3 Lymphatic system	165
7.3.1 Functional morphology of the lymphatic system	165
7.3.1.1 Lymphatic vessels	165
7.3.1.2 Lymph	165
7.3.1.3 Lymphatic tissues and organs	166
7.3.2 Lymph formation	167
7.3.3 Lymph flow.	167

8. GASTROINTESTINAL SYSTEM (K. Babinská, A. Tomova) 169

8.1 General functions of the gastrointestinal system 169

8.2 Secretion in the gastrointestinal system 170

8.3 Motility in the gastrointestinal system 170

8.4 Membrane potentials in the alimentary tract 172

8.5 Regulatory mechanisms in the gastrointestinal system 172

8.5.1 Neural regulation 173

8.5.2 Humoral regulation 174

8.6 The oral cavity 175

8.6.1 Secretion of saliva 175

8.6.2 Motility in the oral cavity 175

8.7 Swallowing and functions of oesophagus 176

8.8 The stomach 177

8.8.1 Gastric secretion 177

8.8.2 Gastric motility 179

8.8.3 Vomiting 181

8.9 Pancreas and its functions. 181

8.10 Liver and its functions 183

8.10.1 Bile formation 183

8.10.2 Other functions of the liver 184

8.11 Small intestine. 186

8.11.1 Secretion in the small intestine 186

8.11.2 Motility in the small intestine. 187

8.11.3 Absorption in the small intestine 188

8.12 Large intestine. 188

8.12.1 Secretion in the large intestine 188

8.12.2 Motility in the large intestine 188

8.12.3 Defecation and composition of the faeces 189

8.12.4 Absorption in the large intestine 189

8.13 Gastrointestinal microbiota 190

8.14 Digestion and absorption in the gastrointestinal tract 190

8.14.1 Mechanisms of absorption in the digestive system 191

8.14.2 Digestion and absorption of carbohydrates 192

8.14.3 Digestion and absorption of proteins 193

8.14.4 Digestion and absorption of fats 193

8.14.5 Absorption of water, ions and vitamins 194

9. NUTRITION, METABOLISM AND THERMOREGULATION (K. Babinská) . 197

9.1 Nutrition 197

9.1.1 Proteins 197

9.1.2 Carbohydrates 198

9.1.2.1 Dietary fibre 198

9.1.3 Fats 199

9.1.4 Vitamins 200

9.1.5. Minerals 200

9.1.6 Healthy nutrition recommendations	201
9.1.7 Vegetarian nutrition and other types of alternative nutrition	202
9.1.7.1 Vegetarian nutrition	203
9.1.7.2 Other types of alternative diets	204
9.1.8 Regulation of the food intake.	204
9.2. Metabolism.	206
9.2.1 Sources of energy	207
9.2.2 Major pathways of carbohydrate metabolism.	208
9.2.3 Major pathways of lipid metabolism.	209
9.2.4 Major pathways of protein metabolism	210
9.2.5. Basal metabolic rate.	212
9.2.6. Metabolism during physical activity	214
9.2.7 Energy balance.	216
9.3 Body temperature and its regulation	217
9.3.1 Normal body temperature	217
9.3.2 Heat production	219
9.3.3 Heat loss	219
9.3.4 Thermoregulation	220
9.3.4.1 Responses to cold	221
9.3.4.2 Responses to heat	221
9.3.5 Fever	222
10. URINARY SYSTEM AND ACID-BASE BALANCE (R. Važan).	223
10.1 Kidneys	223
10.1.1 Functional morphology	223
10.1.2 Glomerular filtration and the primary urine	225
10.1.3 Functions of the proximal tubule	226
10.1.4 Functions of the loop of Henle	228
10.1.5 Functions of the distal tubule and collecting duct	230
10.1.6 Changes of osmolarity in different parts of the tubular system	231
10.1.7 Urea and its role in the concentration of urine	232
10.1.8 Role of kidneys in the control of acid-base balance.	233
10.1.9 Role of kidneys in the control of extracellular fluid volume	235
10.1.10 Role of kidneys in the control of minerals in the body	236
10.1.11 Final urine	237
10.1.12 Assessment of the renal functions	237
10.2 Urinary tract	238
10.2.1 Function of ureters.	239
10.2.2 Function of urinary bladder and urethra	239
10.3 Acid-base balance.	239
10.3.1 Mechanisms of regulation of the acid-base balance	240
10.3.2 Disorders of the acid-base balance	241
11. ENDOCRINE SYSTEM (B. Mravec, A. Tomova)	243
11.1 Hormones	243
11.1.1 Secretion and action	244

11.1.2 Transport in blood	245
11.1.3 Clearance from blood and termination of their effect	245
11.1.4 Mechanisms of action	246
11.1.5 Hormone receptors	246
11.1.6 Mechanisms of signalling	247
11.1.7 Feedback regulation of endocrine glands secretion.	248
11.2 Hypothalamic-pituitary axis.	248
11.2.1 Pituitary gland	249
11.2.2 Hypothalamic regulation of pituitary hormone secretion	250
11.3 Regulation of osmolarity, volume of body fluids, and blood pressure.	252
11.3.1 Antidiuretic hormone	253
11.3.2 Renin-angiotensin-aldosterone system	254
11.4 Endocrine regulation of calcium and phosphate metabolism	256
11.4.1 Parathyroid glands and parathyroid hormone	257
11.4.2 Thyroid gland and calcitonin	258
11.4.3 Vitamin D.	258
11.5 Regulation of growth and metabolism	259
11.5.1 Growth hormone and growth regulation	259
11.5.2 Thyroid hormones and metabolic rate.	260
11.5.3 Pancreas and metabolism of carbohydrates, fats and proteins.	262
11.5.4 Adipose tissue as an endocrine organ	265
11.6 Adrenal glands and neuroendocrine aspects of stress response	266
11.6.1 Hormones of adrenal cortex	267
11.6.2 Hormones of adrenal medulla	269
11.7 Endocrine functions of reproductive system.	270
11.7.1 Testes and testosterone	270
11.7.2 Ovaries, oestrogens and progesterone	270
11.7.3 Prolactin, oxytocin, breasts and uterus	272
11.7.4 Adrenal cortex and androgens	273
11.8 Other endocrine systems.	273
11.8.1 Hormones of gastrointestinal tract.	273
11.8.2 Heart and atrial natriuretic peptide	273
11.8.3 Kidneys and erythropoietin.	273
11.8.4 Intermediate lobe of pituitary gland	274
11.8.5 Epiphysis and regulation of circadian rhythm.	274
12. REPRODUCTION AND PREGNANCY (A. Tomova, R. Važan)	277
12.1 Functions of male reproductive system.	277
12.1.1 Spermatogenesis	277
12.1.2 Production of male sex hormones	278
12.1.3 Functions of other organs in male reproductive system	279
12.2 Functions of female reproductive system	279
12.2.1 Oogenesis and ovulation	279
12.2.2 Ovarian cycle	280
12.2.3 Endometrial cycle	281

12.2.4 Ovarian hormones	282
12.2.5 Functions of other organs in female reproductive system	283
12.3 Sexual intercourse and fertilisation	283
12.4 Pregnancy, parturition and lactation	284
12.4.1 Pregnancy	284
12.4.2 Parturition	285
12.4.3 Lactation	286
13. NEURO-ENDOCRINE-IMMUNE INTERACTIONS (B. Mravec)	287
13.1 Neuro-endocrine interactions	287
13.1.1 Nervous regulation of endocrine glands	288
13.1.2 Endocrine glands affect activity of the nervous system	288
13.2 Neuro-immune interactions	289
13.2.1 Neuronal regulation of the immune system	290
13.2.1.1 Neuroendocrine regulation of immune functions	291
13.2.1.2 Role of autonomic and sensitive nerves	291
13.2.2 Effect of the immune system on activity of the nervous system	293
