

TABLE OF CONTENTS

Introduction.....	5
Part 1	
Using educational resources for mathematics learning	
The pathways of 'additional' educational materials up to the mathematics classrooms <i>Chrysanthi Skoumpourdi.....</i>	9
Early childhood teachers' understanding of a plane rotation task <i>Ewa Swoboda, Marta Pytlak.....</i>	24
Mathematics textbooks as a possible cause of students' misconceptions in planimetry <i>Vlasta Moravcová.....</i>	37
Similarity in Greek mathematics textbook series <i>Panagiota Kaskaouti, Andreas Moutsios-Rentzos.....</i>	50
Hands-on activity as a classroom resource in the preservice primary school teachers' lessons in Hungary and Indonesia <i>Linda Devi Fitriana, Zoltán Kovács, Christiyanti Aprinastuti.....</i>	61
Customized learning paths: Navigating combinatorics for diverse learners <i>Anna Kuřík Sukniak.....</i>	69
Precise mathematical language and learning of quantifiers <i>Ivona Grzegorzczuk, Eric Bravo.....</i>	80
Part 2	
Educational resources as research-based tools	
Educational resources in mathematics – the interplay between research and school practice <i>Mirosława Sajka.....</i>	93
Students' concept image of function in connection with learning kinematics <i>Gergely Kardos, Eszter Kónya.....</i>	106
Texts as resources for posing open-ended problems <i>Konstantinos Tatsis, Božena Maj-Tatsis.....</i>	117
Non-standard problems as resource to verify multiplication understanding in primary school <i>Eva Nováková, Paola Vighi.....</i>	126
The development of the simple strategy for solving mathematical word problems <i>Qendresa Morina.....</i>	137

How to deal with misconceptions - Can mathematical dialogue be helpful? <i>Vida Manfreda Kolar</i>	147
Mathematical literacy: the concept and analysis of students' performance in primary school <i>Tatjana Hodnik</i>	162
Part 3	
Digital resources in the mathematics classroom	
Potentials of digital educational resources in the mathematics classroom – didactical considerations and empirical findings <i>Daniel Walter</i>	179
The role of new technologies in shaping various ways of solving an unusual mathematical task <i>Edyta Juskowiak</i>	193
A comparative analysis of mathematics students' performance on paper-pencil vs online assessments <i>Eliza Jackowska-Boryc, Abimbola Akintounde, Katarzyna Charytanowicz</i>	206
Impact of APLUSIX on algebra performance among pre-service teachers in Colleges of Education in Ghana <i>Marlene Kafui Amusuglo, Antonín Jančařík</i>	215
Attitudes towards graphing calculators and the self-efficacy of mathematics students <i>Abimbola Akintounde</i>	224
Addresses of the contributors	234
