Preface	7
Introduction to Laboratory Diagnostics.	11
Notes on Biochemical Diagnostics	11
Notes on Hematological Diagnosis	13
Notes on Immunological Diagnostics.	15
Notes on Microbiological Diagnostics	16
Notes on urine examination	19
Laboratory Diagnostics.	25
<i>Laboratory Diagnostics in Hematology</i>	<i>25</i>
Hematology	25
Anemia.	25
Coagulation disorders	28
<i>Laboratory Diagnostics in Cardiology</i>	<i>35</i>
<i>Laboratory Diagnostics in Gastroenterology and Hepatology.</i>	<i>43</i>
<i>Laboratory Diagnostics in Nephrology.</i>	<i>52</i>
<i>Laboratory Diagnostics of Disorders of Acid-Base Balance, Water and Electrolyte Management.</i>	<i>60</i>
Disorders of acid-base balance	60
Disorders of electrolyte management.	63
<i>Laboratory Diagnostics in Endocrinology</i>	<i>65</i>
Pituitary gland.	65
Thyroid.	67
Adrenal glands	70
<i>Laboratory Diagnosis of Metabolic Disorders.</i>	<i>74</i>
<i>Laboratory Diagnostics in Rheumatology</i>	<i>78</i>
<i>Notes on Laboratory Diagnosis of Damage due to Physical Causes.</i>	<i>82</i>
<i>Notes on Laboratory Diagnosis of Intoxications</i>	<i>86</i>
<i>Notes on the Pathophysiological and Clinical Context of Laboratory Diagnostics in Immunology.</i>	<i>90</i>
<i>Notes on the Pathophysiological and Clinical Context of Laboratory Diagnostics in Gerontology.</i>	<i>94</i>
Definition, development	94
<i>Notes on the Pathophysiological and Clinical Context of Laboratory Diagnostics in Acute Conditions</i>	<i>97</i>
<i>Notes on Laboratory Diagnostics in Infectology</i>	<i>102</i>
Introduction	102
Epidemics and pandemics	102
Sexually transmitted infections.	105
Other gynecological infections and urinary tract infections.	108
Respiratory tract infections.	108
Exanthematous diseases, mostly of childhood	111
Neuroinfections.	113
GIT infections	115
Viral hepatitis	117
Anthropozoonoses	118
Mycoses and pseudomycosis	120
Selected parasitic diseases	121

Laboratory Parameters	125
<i>Hematology</i>	125
Coagulation	130
Transfusiology	132
<i>Cardiology</i>	134
<i>Pulmonology</i>	136
Blood gases and acid-base balance (ABR)	136
<i>Gastroenterology</i>	138
Esophagus, stomach, intestinal tract.	138
Liver	140
Pancreas	145
<i>Nephrology</i>	148
<i>Electrolytes</i>	155
<i>Endocrinology</i>	160
<i>Metabolic disorders</i>	166
Lipids	166
Diabetes	169
<i>Rheumatology</i>	172
Minerals	175
<i>Intoxications</i>	177
<i>Immunology</i>	181
Humoral immunity	181
Cellular immunity	186
Inflammation	190
<i>Other parameters</i>	192
Plasma proteins	192
Oncomarkers	197
Trace elements	199
Vitamins	202
<i>Infectology</i>	205
Microscopy and cultivation	205
Serology	209
Identification.	213
<i>Clinical Diagnoses and Laboratory Parameters - Summaries.</i>	217
Hematology	217
Cardiology and angiology	219
Pulmonology	220
Gastroenterology	221
Nephrology	222
Disorders of the internal environment	224
Endocrinology.	224
Rheumatology.	226
Damage from physical causes	227
Intoxications.	227
Infectology.	228
Immunology.	231
<i>Reference values</i>	233
Epilogue	239
References	243
