Preface *xiii*

Acknowledgments *xix*

1	Evolution of Quality Through Industrial Revolutions	1
1.1	Quality Before Industrial Revolutions	2
1.2	Quality in the First Industrial Revolution	3
1.3	The Second Industrial Revolution and the Birth of Modern Quality Management	3
1.3.1	Mass Production System Is a Game Changer	4
1.3.2	The Start of Modern Quality System	6
1.4	The Third Industrial Revolution and the Maturity of Modern Quality Management System	8
1.4.1	Contributions of Japan to Quality Management	8
1.4.1.1	Total Quality Control	8
1.4.1.2	Taguchi Method	9
1.4.1.3	Quality Function Deployment	9
1.4.1.4	Kano Model	9
1.4.1.5	Affinity Diagram	9
1.4.1.6	Kansei Engineering	9
1.4.1.7	Poka-Yoke	10
1.4.2	Total Quality Management (TQM)	11
1.4.3	The Third Industrial Revolution and Its Impact on Quality Management	11
1.4.4	Lean Six Sigma	12
1.4.4.1	Overview of Lean Six Sigma	12
1.4.4.2	Limitations of Lean Six Sigma	13
1.5	Current Challenges and Difficulties for Quality Management	14
1.5.1	Industry 4.0 Is Coming	14
1.5.2	Customers in Industry 4.0 Age and Their Expectations	15
1.5.3	Challenges for Modern Quality Management Brought by Industry 4.0	16
1.5.3.1	The Limitations of Traditional Quality Management Practices	16
1.5.3.2	Changing Realities in a Connected World	18
1.5.3.3	Smart Producers, Old Quality Management	19
1.5.3.4	Quality and Innovation	19
1.5.3.5	Quality and Risk Management	19
1.6	Summary	20
	References	20

2	Evolving Paradigm for Quality in the Era of Industry 4.0	23
2.1	Current Quality Definitions and Paradigms	23
2.1.1	Definitions from Quality Community	24
2.1.2	Quality Definitions and Paradigms from Academic Community	25
2.1.3	Robert M. Pirsig's View on Quality	27
2.1.3.1	Summary of Robert M. Pirsig's View on Quality	27
2.1.3.2	Possible Contributions for New Quality Paradigm	28
2.1.4	Christopher Alexander's View on Quality	29
2.1.4.1	Summary of Christopher Alexander's Work	29
2.1.4.2	Possible Contributions for New Quality Paradigm	33
2.2	Changes Brought by Industry 4.0	34
2.2.1	Smart Manufacturing	34
2.2.2	Smart Enterprise by Superconnectivity	36
2.2.2.1	How Superconnectivity Affects Product Development and Production	37
2.2.3	Other Changes Brought by Industry 4.0	38
2.2.4	Summary: Impact of Industry 4.0 on Quality	39
2.3	Quality 4.0	39
2.3.1	What Is Quality 4.0	39
2.3.2	American Society of Quality's Descriptions on Quality 4.0	41
2.3.2.1	American Society of Quality Definition of Quality 4.0	41
2.3.2.2	Key Features of Quality 4.0	41
2.3.2.3	Establishing and Implementing Quality 4.0 Principles	42
2.3.2.4	Quality 4.0 Tools	42
2.3.2.5	Quality 4.0 Value Propositions	43
2.3.3	Reflecting on ASQ's Quality 4.0 Narratives	43
2.4	Hidden Gems: Lesser Known but Potent Ideas on Quality	43
2.4.1	Quality as Customer Value	44
2.4.2	Individualized Customer Value	46
2.4.3	Peter Drucker's View: Good Quality and Poor Quality	47
2.5	Evolving Paradigm for Quality in the Era of Industry 4.0	49
2.5.1	Dual Facets of Quality	50
2.5.2	Customer Value Creation in the New Era	51
2.5.3	Expanded Role of Quality Assurance	52
2.5.4	Evolving Trends	53
	References	54
3	Quality by Design and Innovation	57
3.1	The Trend of Quality: Going Upstream	57
3.2	The Journey into Quality by Design	60
3.3	Design for Six Sigma, A Serious Attempt for Quality by Design	61
3.3.1	Samsung's Journey for DFSS and Innovation	62
3.3.1.1	DFSS and TRIZ Greatly Helped Samsung's Innovation Initiatives	63
3.3.1.2	A Dual-Track Innovation Strategy: Technology Push and Market Pull	63
3.3.1.3	Summary of Samsung Experiences	65
3.3.2	Apple Inc.'s Innovation Journey Under Steve Jobs	65
3.4	Quality by Design in the Era of Industry 4.0	66
3.4.1	Overviews of Design Quality and Quality by Design	66

3.4.2	Some Significant Changes in Business Ecosystem in Digital Revolution	68
3.4.3	More Changes Expected by Industry 4.0	69
3.4.3.1	Summary: Benefits of Industry 4.0 Technologies for Quality by Design	71
3.4.4	The Objective of Quality by Design in Industry 4.0: Cultivating Customer Value	71
3.4.5	Identifying Customer Needs in the Era of Industry 4.0	72
3.4.5.1	Voice of Customer (VoC) 4.0	73
3.4.5.2	Mining Customer Needs with IoT (Internet of Things)	73
3.4.5.3	Mining Customer Needs with IoB (Internet of Behaviors)	74
3.4.5.4	Social Listening	74
3.4.6	Evaluating Customer Value and Analyzing Value Proposition	75
3.4.6.1	Willingness to Pay (WTP) as a Customer Value Indicator	79
3.4.6.2	Survey-Based Customer Value Evaluation Methods	79
3.5	Customer Value Creation by Innovation	80
3.5.1	Blue Ocean Strategy	80
3.5.2	Medici Effect	83
3.5.3	Design Thinking	85
3.5.4	Co-creation with Customers and Stakeholders	87
3.5.5	Design for Individualized Customer Value	90
3.5.6	Emotional, Psychological, and Culture Value Creation for Stakeholders	91
3.5.7	Design for Quality of Experience	93
3.6	Quality Management and Assurance in Early Product Life Cycle	99
3.6.1	Quality in Product Development: Crafting Customer Value and Controlling Quality Loss	99
3.6.1.1	Dual Responsibilities in Quality Management	99
3.6.2	Whose Responsibilities for Quality?	101
3.6.2.1	Emergence of the Quality Department	101
3.6.2.2	Realignment of Quality Management Functions: Integration and Deep Collaboration	102
3.6.3	Quality Assurance in the Early Stage of Product Life Cycle	104
3.6.3.1	Is the Separation of Value Creation and Quality Assurance a Good Idea?	104
3.6.3.2	Quality and Standards: An Interconnected Relationship	105
3.6.4	Overview of Risk Management for New Product Development	108
3.6.4.1	Framework for Risk Management in New Product Development	109
3.6.4.2	New Content Risk Analysis and Management	111
3.6.4.3	Robust Technology Development	112
3.6.4.4	Risk Management by Complexity Theory	112
	References	113
4	Quality Management in the Era of Industry 4.0	119
4.1	Introduction	119
4.2	Smart Factory	120
4.2.1	What Is a Smart Factory?	120
4.2.2	Several New Quality Control Methods in Smart Factory	124
4.2.2.1	Real-Time Monitoring and Control	124
4.2.2.2	Predictive Quality Assurance (PQA)	126
4.2.2.3	Electronic/Digital Poka Yoke Methods	126
4.2.2.4	Tesla's "Giga Press"	127

4.2.3	Collaboration of Manufacturing, Engineering, and Quality in Smart Factory	129
4.2.4	Predictive Maintenance in Smart Factory	130
4.3	Quality Management for Smart Supply Chain	130
4.3.1	Understanding the Smart Supply Chain	130
4.3.2	Overview of Supplier Quality Management and Capabilities Brought by Industry 4.0	133
4.3.3	Contemporary Collaboration Models Between Producers and Suppliers in Quality Management	135
4.3.3.1	APQP and PPAP	135
4.3.3.2	Integrated Product Development (IPD)	136
4.3.4	Leveraging Industry 4.0 for Supply Quality Management Enhancement	137
4.3.4.1	Early Supplier Involvement During the Product Development Stage	137
4.3.4.2	Upgrading the Supplier Quality Validation Process Via Industry 4.0 Technology	138
4.4	Quality Management in After-Sale Customer Service	139
4.4.1	Introduction	139
4.4.1.1	Regular After-Sale Customer Service	139
4.4.1.2	Users Feedback Management	140
4.4.1.3	Product Innovation	140
4.4.2	Upgrading After-Sale Customer Services with Industry 4.0	141
4.4.3	Upgrading User Feedback Management with Industry 4.0	143
4.4.4	Upgrading User Feedback Management with Social Listening	144
4.4.5	Upgrading User Feedback Management with Quality of Experience Mining and Analysis	144
4.4.6	Improving After-Sale Customer Service Team's Contribution in Product Innovation by Industry 4.0	145
4.5	Quality Management for Service Industry	146
4.5.1	What Are the Differences in Quality Management Between Service and Manufacturing Industry	146
4.5.2	What Industry 4.0 Can Help in Service Quality Management	147
4.5.3	Industry 4.0 and Individualized Services	147
4.6	Digital Quality Management System Under Industry 4.0	149
4.6.1	Introduction	149
4.6.1.1	Structure	150
4.6.1.2	Functionalities and Features	150
4.6.2	Cloud-Based Master Platforms that Integrate eQMS with Other Business Applications	152
4.6.3	Collaborative Work on Quality Through Product Life Cycle	153
4.6.4	Enhance Digital Quality Management System by Industry 4.0 Technologies	154
4.6.5	Unified Quality Management System	155
4.6.6	Collaborations of Professionals in Unified Quality Management System	156
4.6.6.1	Collaboration Among Quality Professionals in Different Sectors	156
4.6.6.2	Collaboration Between Quality Professionals and Others	157
	References	157
5	Predictive Quality	161
5.1	Introduction	161
5.1.1	Definition and Importance	162

5.1.1.1	Definition	162
5.1.1.2	Importance	162
5.1.2	Historical Perspective	162
5.1.3	Current Trends	163
5.2	Elements of Predictive Quality	164
5.2.1	Data Collection	164
5.2.2	Data Quality	164
5.2.3	Data Analysis	166
5.2.4	Predictive Models	167
5.3	Exploration of Predictive Quality Models	168
5.3.1	Regression Models	168
5.3.2	Time Series Model	170
5.3.3	Machine Learning Model	171
5.3.4	Deep Learning Models	175
5.4	Performance Metrics in Predictive Modeling	176
5.4.1	Accuracy	177
5.4.2	Precision	177
5.4.3	Recall	178
5.4.4	F1 Score	178
5.4.5	AUC-ROC	179
5.5	Application of Predictive Quality in Various Industries	180
5.5.1	Manufacturing	180
5.5.2	Healthcare	190
5.5.3	Retail	190
5.5.4	Finance	191
5.5.5	Information Technology	192
5.6	The Challenges and Limitations of Predictive Quality	193
5.6.1	Data Privacy and Security Issues	193
5.6.2	Model Interpretability	193
5.6.3	Overfitting and Underfitting	193
5.6.4	Need for High-Quality and Relevant Data	194
5.7	The Future of Predictive Quality	194
	References	194
6	Data Quality	199
6.1	Introduction	199
6.2	Data and Data Quality	200
6.2.1	Overview	200
6.2.1.1	Data Involved in Data Quality Study	200
6.2.1.2	Definition of Data Quality	200
6.2.2	Categories of Data	201
6.2.3	Causes of Poor Data Quality	205
6.2.4	Cost of Poor Data Quality	205
6.3	Data Quality Dimensions and Measurement	206
6.3.1	Data Quality Dimensions	206
6.3.2	Measurement of Data Quality	207
6.3.2.1	Measuring Accuracy in Data Quality	207

6.3.2.2	Measure Completeness in Data Quality	208
6.3.2.3	Measure Consistency in Data Quality	209
6.3.2.4	Measure Timeliness in Data Quality	210
6.3.2.5	Measure Validity in Data Quality	211
6.3.2.6	Measure Uniqueness in Data Quality	211
6.3.2.7	Measuring Integrity in Data Quality	212
6.3.2.8	Measuring Relevance	213
6.3.2.9	Measuring Reliability	214
6.4	Data Quality Management	216
6.4.1	Reactive Versus Proactive Data Quality Management	217
6.4.2	Data Quality Assessment	218
6.4.3	Data Cleansing	219
6.4.4	Data Integration	220
6.4.5	Data Validation	221
6.4.6	Data Monitoring	222
6.4.7	Technology, Tools, and Software on Data Quality Management	223
6.4.7.1	Technologies and Tools	223
6.4.7.2	Data Quality Management Software	224
6.5	Data Governness	225
6.5.1	Data Governance Strategy	226
6.5.1.1	Fundamentals	226
6.5.1.2	Objectives	226
6.5.1.3	Winning Strategy	226
6.5.2	Data Governance Framework	227
6.5.3	Data Stewardship	230
6.5.4	Data Life Cycle Management	231
6.5.5	Data Governness Tools and Technology	231
6.6	The Role of Quality Professionals	232
6.7	Future Trends in Data Quality	234
	References	235
7	Risk Management in the 21st Century	237
7.1	Introduction	237
7.1.1	Overview of Risk Management	238
7.1.2	Redefining Risk Management in the 21st Century	239
7.1.3	The Paramountcy of Risk Management in the Contemporary Context	240
7.2	Deciphering the Nature of Risk	241
7.2.1	Definition of Risk	242
7.2.2	Types of Risks	243
7.2.3	Risk Assessment and Analysis	244
7.3	Risk Management Frameworks	246
7.3.1	Traditional Risk Management Approaches	247
7.3.1.1	Risk Identification	247
7.3.1.2	Risk Analysis	248
7.3.1.3	Risk Treatment	249
7.3.1.4	Risk Monitoring	250
7.3.1.5	Pros and Cons of Traditional Risk Management Approaches	250

7.3.2	Contemporary Risk Management Models	251
7.3.2.1	Enterprise Risk Management (ERM)	251
7.3.2.2	Operational Risk Management (ORM)	252
7.3.2.3	Strategic Risk Management (SRM)	253
7.3.2.4	Integrated Risk Management (IRM)	254
7.3.2.5	Pros and Cons of Contemporary Risk Management Models	255
7.3.3	Integrating Risk Management with Strategic Planning	255
7.4	Risk Management Techniques	259
7.4.1	Techniques for Risk Identification	260
7.4.2	Techniques for Risk Assessment	261
7.4.3	Quantitative and Qualitative Risk Analysis	262
7.5	Technology and Risk Management	263
7.5.1	Role of Technology in Risk Management	264
7.5.1.1	Current Role of Technology in Risk Management	264
7.5.2	Automation and Artificial Intelligence in Risk Assessment	266
7.5.2.1	State of the Art as of Now	266
7.5.3	Data Analytics for Risk Prediction and Management	268
7.6	Resilience and Business Continuity	270
7.6.1	Cultivating Resilience in Organizations	271
7.6.1.1	Historical Context and Evolution	271
7.6.1.2	Current Approaches to Building Resilience	271
7.6.1.3	Building Resilience through Complexity Theory	273
7.6.2	Business Continuity Planning	274
7.6.3	Disaster Recovery and Emergency Response	275
	References	276
8	Emerging Organizational Changes in the 21st Century	281
8.1	The Continuously Shifting Landscape of Organizational Structures	282
8.1.1	Evolution from Traditional Pyramid to Contemporary Organizational Structures	282
8.1.1.1	Traditional Pyramid Structures	283
8.1.1.2	The Move to Matrix Structures	283
8.1.1.3	The Flat and Horizontal Organizations	283
8.1.1.4	Contemporary Organizational Structures	283
8.1.2	The Emergence of Flexible and Flat Structures	284
8.2	Impact of Technological Advances on Organizational Structures	288
8.2.1	Impact of Artificial Intelligence	288
8.2.1.1	AI Technologies and Their Impact	288
8.2.2	The Role of Big Data	290
8.2.2.1	Applications of Big Data and Their Impact	291
8.2.3	Effects of Industry 4.0	291
8.2.3.1	Industry 4.0 Technologies and Their Impact	291
8.3	Emerging Organizational Models in the 21st Century	292
8.3.1	The Networked Organization	292
8.3.1.1	Structure of a Networked Organization	292
8.3.1.2	Reasons for Adopting a Networked Structure	293
8.3.2	The Holacracy Model	294

8.3.3	The Agile Organization	295
8.3.4	Virtual and Remote Organizations	296
8.3.5	The Platform Model	297
8.3.5.1	Assigning Roles and Responsibilities	297
8.3.6	Rendanheyi Model	298
8.4	Future of Organizational Structures	299
8.4.1	Predicted Trends and Patterns	300
8.4.2	Potential Challenges and Solutions	301
8.4.3	Impact of Future Technologies	302
8.5	The Impact on Quality Professionals	303
8.5.1	Role Shifts and Adaptation	304
8.5.2	New Quality Management Approaches	305
8.5.3	Impact of Remote Working on Quality Management	306
8.6	Required Skills and Knowledge for Quality Professionals in the Future	307
8.6.1	Emphasizing Data Literacy	307
8.6.2	Proficiency in AI and Machine Learning	308
8.6.3	Understanding of Agile and Lean Methodologies	309
8.6.4	Understanding the Human Side of Quality	310
8.6.5	Understanding Holistic View of Quality	311
	References	312
