Preface, vii

Acknowledgements, ix

1 What is biodiversity? 1

1.1 Marion Island, 1

1.2 What is biodiversity? 3

1.3 Elements of biodiversity, 5

1.4 Measuring biodiversity, 9

1.5 Summary, 16

Further reading, 16

2 Biodiversity through time, 19

2.1 Introduction, 19

2.2 Sources of information, 19

2.3 A brief history of biodiversity, 21

2.4 How many extant species are there? 38

2.5 Summary, 48

Further reading, 48

3 Mapping biodiversity, 50

3.1 Introduction, 50

3.2 Issues of scale, 51

3.3 Extremes of high and low diversity, 57

3.4 Gradients in biodiversity, 71

3.5 Congruence, 85

3.6 Summary, 89

Further reading, 90

4 Does biodiversity matter? 91

4.1 Introduction, 91

4.2 Direct-use value, 92

4.3 Indirect-use value, 98

4.4 Non-use value, 103

4.5 Summary, 105

Further reading, 105

5 Human impacts, 108

5.1 Introduction, 108

5.2 Species extinctions, 108

5.3 Populations, individuals and genetic diversity, 115

5.4 Threats to biodiversity, 116

5.5 The scale of the human enterprise, 130

5.6 Summary, 135

Further reading, 135

6 Maintaining biodiversity, 138

6.1 Introduction, 138

6.2 Objectives of the Convention, 139

6.3 General measures for conservation and sustainable use, 141

6.4 Identification and monitoring, 143

6.5 *In-situ* conservation, 144

6.6 *Ex-situ* conservation, 152

6.7 Sustainable use of components of biological diversity, 154

6.8 Incentive measures, 155

6.9 Responses to the Convention, 156

6.10 Summary, 156

Further reading, 157
