Preface	xiii
1 Introduction	1
1.1 Dynamic General Equilibrium versus Traditional Macroeconomics	1
1.2 Traditional Macroeconomics	3
1.3 Dynamic General Equilibrium Macroeconomics	4
1.4 The Structure of This Book	7
2 The Centralized Economy	12
2.1 Introduction	12
2.2 The Basic Dynamic General Equilibrium Closed Economy	12
2.3 Golden Rule Solution	14
2.3.1 The Steady State	14
2.3.2 The Dynamics of the Golden Rule	17
2.4 Optimal Solution	17
2.4.1 Derivation of the Fundamental Euler Equation	17
2.4.2 Interpretation of the Euler Equation	19
2.4.3 Intertemporal Production Possibility Frontier	20
2.4.4 Graphical Representation of the Solution	21
2.4.5 Static Equilibrium Solution	21
2.4.6 Dynamics of the Optimal Solution	23
2.4.7 Algebraic Analysis of the Saddlepath Dynamics	25
2.5 Real-Business-Cycle Dynamics	27
2.5.1 The Business Cycle	27
2.5.2 Permanent Technology Shocks	28
2.5.3 Temporary Technology Shocks	29
2.5.4 The Stability and Dynamics of the Golden Rule Revisited	29
2.6 Labor in the Basic Model	30
2.7 Investment	32
2.7.1 q -Theory	33
2.7.2 Time to Build	36
2.8 Conclusions	37
3 Economic Growth	39
3.1 Introduction	39
3.2 Modeling Economic Growth	40
3.3 The Solow-Swan Model of Growth	42
3.3.1 Theory	42
3.3.2 Growth and Economic Development	44
3.3.3 Balanced Growth	44

3.4	The Theory of Optimal Growth	45
3.4.1	Theory	45
3.4.2	Additional Remarks on Optimal Growth	49
3.5	Endogenous Growth	50
3.5.1	The AK Model of Endogenous Growth	51
3.5.2	The Human Capital Model of Endogenous Growth	51
3.6	Conclusions	53
4	The Decentralized Economy	54
4.1	Introduction	54
4.2	Consumption	55
4.2.1	The Consumption Decision	55
4.2.2	The Intertemporal Budget Constraint	56
4.2.3	Interpreting the Euler Equation	57
4.2.4	The Consumption Function	59
4.2.5	Permanent and Temporary Shocks	61
4.3	Savings	64
4.4	Life-Cycle Theory	65
4.4.1	Implications of Life-Cycle Theory	65
4.4.2	Model of Perpetual Youth	67
4.5	Nondurable and Durable Consumption	68
4.6	Labor Supply	70
4.7	Firms	73
4.7.1	Labor Demand without Adjustment Costs	73
4.7.2	Labor Demand with Adjustment Costs	75
4.8	General Equilibrium in a Decentralized Economy	77
4.8.1	Consolidating the Household and Firm Budget Constraints	77
4.8.2	The Labor Market	79
4.8.3	The Goods Market	80
4.9	Comparison with the Centralized Model	81
4.10	Conclusions	83
5	Government: Expenditures and Public Finances	84
5.1	Introduction	84
5.2	The Government Budget Constraint	86
5.2.1	The Nominal Government Budget Constraint	86
5.2.2	The Real Government Budget Constraint	88
5.2.3	An Alternative Representation of the GBC	88
5.3	Financing Government Expenditures	89
5.3.1	Tax Finance	89
5.3.2	Bond Finance	91
5.3.3	Intertemporal Fiscal Policy	93
5.3.4	The Ricardian Equivalence Theorem	93
5.4	The Sustainability of the Fiscal Stance	96
5.4.1	Case 1: $[(1 + \pi)(1 + \gamma)]/(1 + R) > 1$ (Stable Case)	98
5.4.2	Implications	99
5.4.3	Case 2: $0 < [(1 + \pi)(1 + \gamma)]/(1 + R) < 1$ (Unstable Case)	100
5.4.4	Implications	101
5.4.5	The Optimal Level of Debt	102
5.5	The Stability and Growth Pact	103
5.6	The Fiscal Theory of the Price Level	104

5.7	Optimizing Public Finances	105
5.7.1	Optimal Government Expenditures	106
5.7.2	Optimal Tax Rates	109
5.8	Conclusions	119
6	Fiscal Policy: Further Issues	121
6.1	Introduction	121
6.2	Time-Consistent and Time-Inconsistent Fiscal Policy	121
6.2.1	Lump-Sum Taxation	123
6.2.2	Taxes on Labor and Capital	126
6.2.3	Conclusions	131
6.3	The Overlapping-Generations Model	131
6.3.1	Introduction	131
6.3.2	The Basic Overlapping-Generations Model	132
6.3.3	Short-Run Dynamics and Long-Run Equilibrium	135
6.3.4	Comparison with the Representative-Agent Model	137
6.3.5	Fiscal Policy in the OLG Model: Pensions	138
6.3.6	Conclusions	143
7	The Open Economy	144
7.1	Introduction	144
7.2	The Optimal Solution for the Open Economy	145
7.2.1	The Open Economy's Resource Constraint	145
7.2.2	The Optimal Solution	148
7.2.3	Interpretation of the Solution	149
7.2.4	Long-Run Equilibrium	150
7.2.5	Shocks to the Current Account	152
7.3	Traded and Nontraded Goods	154
7.3.1	The Long-Run Solution	158
7.4	The Terms of Trade and the Real Exchange Rate	159
7.4.1	The Law of One Price	160
7.4.2	Purchasing Power Parity	160
7.4.3	Some Stylized Facts about the Terms of Trade and the Real Exchange Rate	161
7.5	Imperfect Substitutability of Tradeables	163
7.5.1	Pricing-to-Market, Local-Currency Pricing, and Producer-Currency Pricing	163
7.5.2	Imperfect Substitutability of Tradeables and Nontradeables	163
7.6	Current-Account Sustainability	167
7.6.1	Balance of Payments Sustainability	167
7.6.2	The Intertemporal Approach to the Current Account	173
7.7	Conclusions	174
8	The Monetary Economy	176
8.1	Introduction	176
8.2	A Brief History of Money and Its Role	176
8.3	Nominal Household Budget Constraint	179
8.4	The Cash-in-Advance Model of Money Demand	181
8.5	Money in the Utility Function	183
8.6	Money as an Intermediate Good or the Shopping-Time Model	185
8.7	Transactions Costs	188
8.8	Some Empirical Evidence	190

8.9	Hyperinflation and Cagan's Money-Demand Model	192
8.10	The Optimal Rate of Inflation	194
8.10.1	The Friedman Rule	194
8.10.2	General Equilibrium Solution	195
8.11	The Super-Neutrality of Money	199
8.12	Conclusions	201
9	Imperfectly Flexible Prices	203
9.1	Introduction	203
9.2	Some Stylized "Facts" about Prices and Wages	204
9.3	Price Setting under Imperfect Competition	206
9.3.1	Theory of Pricing in Imperfect Competition	207
9.3.2	Price Determination in the Macroeconomy with Imperfect Competition	209
9.3.3	Pricing with Intermediate Goods	213
9.3.4	Pricing in the Open Economy: Local and Producer-Currency Pricing	216
9.4	Price Stickiness	217
9.4.1	Taylor Model of Overlapping Contracts	218
9.4.2	The Calvo Model of Staggered Price Adjustment	219
9.4.3	Optimal Dynamic Adjustment	221
9.4.4	Price Level Dynamics	222
9.5	The New Keynesian Phillips Curve	224
9.5.1	The New Keynesian Phillips Curve in an Open Economy	227
9.6	Conclusions	228
10	Asset Pricing and Macroeconomics	230
10.1	Introduction	230
10.2	Expected Utility and Risk	231
10.2.1	Risk Aversion	231
10.2.2	Risk Premium	232
10.3	No-Arbitrage and Market Efficiency	233
10.3.1	Arbitrage and No-Arbitrage	233
10.3.2	Market Efficiency	233
10.4	Asset Pricing and Contingent Claims	234
10.4.1	A Contingent Claim	234
10.4.2	The Price of an Asset	235
10.4.3	The Stochastic Discount-Factor Approach to Asset Pricing	235
10.4.4	Asset Returns	235
10.4.5	Risk-Free Return	236
10.4.6	The No-Arbitrage Relation	236
10.4.7	Risk-Neutral Valuation	237
10.5	General Equilibrium Asset Pricing	238
10.5.1	Using Contingent-Claims Analysis	238
10.5.2	Asset Pricing Using the Consumption-Based Capital Asset-Pricing Model (C-CAPM)	240
10.6	Asset Allocation	247
10.6.1	The Capital Asset-Pricing Model (CAPM)	250
10.7	Consumption under Uncertainty	251
10.8	Complete Markets	252
10.8.1	Risk Sharing and Complete Markets	253
10.8.2	Market Incompleteness	256
10.9	Conclusions	256

11 Financial Markets	258
11.1 Introduction	258
11.2 The Stock Market	259
11.2.1 The Present-Value Model	259
11.2.2 The General Equilibrium Model of Stock Prices	262
11.2.3 Comment	265
11.3 The Bond Market	265
11.3.1 The Term Structure of Interest Rates	266
11.3.2 The Term Premium	272
11.3.3 Estimating Future Inflation from the Yield Curve	277
11.3.4 Comment	279
11.4 The FOREX Market	279
11.4.1 Uncovered and Covered Interest Parity	280
11.4.2 The General Equilibrium Model of FOREX	289
11.4.3 Comment	292
11.5 Conclusions	293
12 Nominal Exchange Rates	295
12.1 Introduction	295
12.2 International Monetary Arrangements 1873-2007	297
12.2.1 The Gold Standard System: 1873-1937	298
12.2.2 The Bretton Woods System: 1945-71	299
12.2.3 Floating Exchange Rates: 1973-2007	300
12.3 The Keynesian IS-LM-BP Model of the Exchange Rate	304
12.3.1 The IS-LM Model	305
12.3.2 The BP Equation	309
12.3.3 Fixed Exchange Rates: The Monetary Approach to the Balance of Payments	312
12.3.4 Exchange-Rate Determination with Imperfect Capital Substitutability	313
12.4 UIP and Exchange-Rate Determination	315
12.5 The Mundell-Fleming Model of the Exchange Rate	317
12.5.1 Theory	317
12.5.2 Monetary Policy	318
12.5.3 Fiscal Policy	319
12.6 The Monetary Model of the Exchange Rate	320
12.6.1 Theory	320
12.6.2 Monetary Policy	321
12.6.3 Fiscal Policy	325
12.7 The Dornbusch Model of the Exchange Rate	325
12.7.1 Theory	325
12.7.2 Monetary Policy	328
12.7.3 Fiscal Policy	330
12.7.4 Comparison of the Dornbusch and Monetary Models	330
12.8 The Monetary Model with Sticky Prices	332
12.9 The Obstfeld-Rogoff Redux Model	334
12.9.1 The Basic Redux Model with Flexible Prices	335
12.9.2 Log-Linear Approximation	341
12.9.3 The Small-Economy Version of the Redux Model with Sticky Prices	343
12.10 Conclusions	346

13 Monetary Policy	348
13.1 Introduction	348
13.2 Inflation and the Fisher Equation	353
13.3 The Keynesian Model of Inflation	355
13.3.1 Theory	355
13.3.2 Empirical Evidence	358
13.4 The New Keynesian Model of Inflation	358
13.4.1 Theory	358
13.4.2 The Effectiveness of Inflation Targeting in the New Keynesian Model	365
13.4.3 Inflation Targeting with a Flexible Exchange Rate	369
13.5 Optimal Inflation Targeting	371
13.5.1 Social Welfare and the Inflation Objective Function	372
13.5.2 Optimal Inflation Policy under Discretion	374
13.5.3 Optimal Inflation Policy under Commitment to a Rule	378
13.5.4 Intertemporal Optimization and Time-Consistent Inflation Targeting	380
13.5.5 Central Bank versus Public Preferences	382
13.6 Optimal Monetary Policy using the New Keynesian Model	384
13.6.1 Using Discretion	384
13.6.2 Rules-Based Policy	386
13.7 Monetary Policy in the Euro Area	387
13.7.1 New Keynesian Model of the Euro Area	389
13.7.2 Model	389
13.7.3 Optimal Monetary Policy	390
13.7.4 Competitiveness and Absorbtion	392
13.7.5 Is There Another Solution?	393
13.8 Conclusions	393
14 Real Business Cycles, DGE Models, and Economic Fluctuations	396
14.1 Introduction	396
14.2 The Methodology of RBC Analysis	397
14.2.1 Steady-State Solution	400
14.2.2 Short-Run Dynamics	401
14.3 Empirical Evidence on the RBC Model	405
14.3.1 The Basic RBC Model	406
14.3.2 Extensions to the Basic RBC Model	408
14.3.3 The Open-Economy RBC Model	410
14.4 DGE Models of the Monetary Economy	415
14.4.1 The Smets-Wouters Model	416
14.4.2 Empirical Results	420
14.5 Conclusions	422
15 Mathematical Appendix	424
15.1 Introduction	424
15.2 Dynamic Optimization	424
15.3 The Method of Lagrange Multipliers	426
15.3.1 Equality Constraints	426
15.3.2 Inequality Constraints	431
15.4 Continuous-Time Optimization	432
15.4.1 Calculus of Variations	433
15.4.2 The Maximum Principle	434

<i>Contents</i>	xi
15.5 Dynamic Programming	434
15.6 Stochastic Dynamic Optimization	438
15.7 Time Consistency and Time Inconsistency	440
15.8 The Linear Rational-Expectations Models	442
15.8.1 Rational Expectations	443
15.8.2 The First-Order Nonstochastic Equation	444
15.8.3 Whiteman’s Solution Method for Linear Rational-Expectations Models	446
15.8.4 Systems of Rational-Expectations Equations	453
