Foreword by Benno Müller-Hill ix

Acknowledgments xvii

Introduction 1

1. The Expulsion and Emigration of Scientists, 1933–1939	10
1. A Brief Summary of Legal Measures	10
2. “Non-Aryan” Dismissals and Emigrations	15
3. Political Dismissals and Emigrations	23
4. The Impact of the Expulsion of Biologists on Research in Germany	25
5. Viktor Hamburger and Johannes Holtfreter: The Expulsion of Two Eminent Experimental Embryologists	30
6. Dismissed Biologists Able to Continue Their Work in Germany	38
7. Karl von Frisch, the <i>Mischling</i> , and the Solidarity of His Colleagues	40
8. The Return of Émigré Biologists to Scientific Institutes in Germany after 1945	48
9. <i>Wiedergutmachung</i> in Public and Civil Service	50
10. Gerta von Ubisch: The Emigration and Return of a Professor	52
2. NSDAP Membership, Careers, and Research Funding	59
1. NSDAP Membership	61
2. The Significance of NSDAP Membership for <i>Habilitation</i> and Appointments	64

3. The Chair in Zoology in Münster, 1935–1937	72
4. “German Biology”: The Example of Ernst Lehmann	74
5. The Notgemeinschaft (Emergency Association) of German Science, the German Research Association, and the Reich Research Council under National Socialism	89
6. Funding for Biological Projects by the DFG and the RFR, 1933–1945, and the Significance of NSDAP Membership	94
7. Research Funding for Biologists at Universities and Kaiser Wilhelm Institutes	97
8. Research Funding and the Quality of Research	99
9. Funding according to Individuals and Specialities	104
10. The Political and Ideological Background to Research Funding	105
3. The Content and Result of Research at Universities	132
1. Botany	133
2. Zoology	150
3. Konrad Lorenz, Ethology, and National Socialist Racial Doctrine	179
4. The Content and Result of Research at Kaiser Wilhelm Institutes	206
1. The KWI for Biology, Berlin-Dahlem	206
2. The Division for Virus Research of the KWIs for Biology and Biochemistry, Berlin-Dahlem	210
3. The KWI for Cultivated Plant Research, Tuttendorf	214
4. The KWI for Breeding Research (Erwin Baur Institute), Müncheberg	218
5. The Genetics Department of the KWI for Brain Research, Berlin-Buch	219
6. The KWI for Biophysics, Frankfurt	227
7. The Department of Hereditary Pathology of the KWI for Anthropology, Human Genetics, and Eugenics, Berlin-Dahlem: The Example of Hans Nächtsheim	229
5. Scientific Research by the SS	251
1. The Scientific Interests of Heinrich Himmler	251
2. The SS Research and Teaching Society Das Ahnenerbe	251

3. Heinz Brücher at the Ahnenerbe's Institute for Plant Genetics, Lannach	258
4. Eduard May at the Ahnenerbe's Entomological Institute, Dachau	264
5. SS Research at the University of Jena: Gerhard Heberer, Human Origins, and the Nordic Race	269
 6. Research to Develop Biological Weapons	 277
1. The Working Group Blitzableiter	278
2. Biological Warfare Research under Deputy Reich Physician Führer Kurt Blome	282
 7. Aftereffects of National Socialism	 290
1. The RFR and the DFG after 1945	290
2. The Effects of National Socialism on the Development of Molecular Genetics in Germany	294
 Conclusion	 318
1. Expulsion and Emigration	319
2. Science in Nazi Germany: Ideology and Scientific Reality	321
3. Continuity and Freedom of Research under National Socialism and in the Soviet Union under Stalin	326
 Epilogue	 333
Appendix A: Career Information	337
Appendix B: Biologists in the Study	375
Abbreviations	379
Notes	381
