xiv	Introduction

1 The circular economy, roots and context 1

1.1 History 1
1.2 The notion of the circular economy 4
1.3 What distinguishes the circular economy from the linear industrial economy? 6

2 Circularity, sustainability and labour in the circular industrial economy 9

2.1 The shift to a modern circular industrial economy 9
2.2 Sustainability and the circular industrial economy 11
2.3 Labour in the circular industrial economy 14

3 The circular industrial economy, a wealth of new opportunities 16

3.1 Shifting from a circular society to a circular industrial economy 16
3.2 Analysing the circular industrial economy 17
3.3 Some principles underlying the circular industrial economy 21
3.4 Which external factors drive the circular industrial economy? 21
3.5 The value fork 22
3.6 Innovation challenges in the circular industrial economy 24

4 The era of 'R': The owner decides locally 26

4.1 Managing stocks of physical objects 26
--

	4.2 The decision makers 28
	4.3 The characteristics of the era of 'R' 29
	4.4 Trust, skills and people, economic value and savings in the era of 'R' 31
	4.5 Putting flesh to the bones of the era of 'R' 33
	4.6 Research, innovation and policy challenges in the era of 'R' 35
5	The era of 'D': Economic actors recovering resource assets decide 38
	5.1 Managing stocks of atoms and molecules 38
	5.2 The need to identify decision makers to maintain highest value in the era of 'D' 40
	5.3 The characteristics of the era of 'D' 41
	5.4 The foundation of the era of 'D': R&D, technology, knowledge and people 42
	5.5 The ownership fork 44
	5.6 Innovation and opportunities for policymakers in the era of 'D' 45
6	The point of sale, or factory gate, and liability 47
	6.1 The point of sale as frontier between two economic philosophies 47
	6.2 Of toys and tools, fashion and function 49
	6.3 The point of sale: pivot for ownership and liability 50
	6.4 Producer liability is shifting 51
	6.5 What is in it for manufacturers, after the point of sale? 51
7	The invisible liability loop, labour and the role of policy 53
	7.1 Extended Producer Liability (EPL): closing the invisible liability loop 53
	7.2 Objects: EPL and Ultimate Liability Owners in the era of 'R' 55
	7.3 Materials: EPL and Ultimate Liability Owners in the era of 'D' 56
	7.4 Labour in the circular economy: a suitable case for research 57
	7.5 The role of policy and labour taxation 58
	7.6 The role of appropriate economic indicators 60
	7.7 The role of governments and policymakers 62
8	The Performance Economy, industry adopting the circular industrial economy as default option 66
	8.1 The business models 66
	8.2 The decision makers 67

94	Index
87	10 Outlook
	10.1 The circular industrial economy needs holistic approaches 87
	10.2 Governments: the elephant in the circular megaverse 89
	10.3 A technology-driven New Economy supports the circular industrial economy 90
	10.4 The quest for holistic solutions 90
	10.5 Culture, information and motivation: regional change levers 91
80	9 Radical innovation to enhance stock management
	9.1 The drivers of innovation in the circular industrial economy 80
	9.2 Innovation in the era of 'R' 82
	9.3 Innovation in the era of 'D' 84
	9.4 The role of policymakers in innovation 85
	8.3 The characteristics of the Performance Economy 71
	8.4 No sharing without caring: culture enters the economic game 72
	8.5 The foundation of the Performance Economy: the factor 'Time' 75
	8.6 Uncertainty, discreteness of risk and economy of scale, resilience 77
