

Contents

1. Health Demography: An Evolving Discipline	1
Introduction	1
The Origins of Health Demography	2
Demographic Roots	2
Historical Demography	2
Applied Demography	3
Epidemiological Roots	3
Social Science Origins	4
Major Trends Affecting the Development of Health Demography	6
Changing Population Characteristics	6
The Changing Nature of Health Problems	8
Changing Perceptions of Health and Illness	8
Overview of the Volume	9
Objectives	9
The Audience	13
Organization of the Volume	15
Additional Resources	16
2. Health and Health Care: An Introduction	19
Introduction	19
The Relationship among Health, Health Care, and Demography ...	21
Twentieth-Century Trends	23
The Societal Context of Health and Health Care	28
The Institutional Framework	28
The Cultural Framework	30
The Structure of Health Care Systems	31

Medical Care and Health Care	31
The Organization of US Health Care	33
The Vertical Dimension of the Health Care System	35
The Horizontal Dimension of the Health Care System	41
Health Care Personnel	42
Control in the System	47
Financing Health Care	49
Additional Function of the Health Care System	53
Public Health	53
Health Care Research	54
Education	55
Planning and Regulation	55
Medical Supplies—Equipment—Pharmaceuticals	56
References	56
Additional Resources	57
 3. The Language of Health Care	 59
Introduction	59
Health, Sickness, and Disease	59
Illness and Sickness	62
Disease	63
Physical Illness and Mental Illness	64
The Classification of Physical Illness	65
International Classification of Diseases	66
Current Procedural Terminology	68
Diagnostic-Related Groups	69
Ambulatory Patient Groups	72
The Classification of Mental Illness	73
Alternative Mental Disorder Classification	73
Key Concepts from Epidemiology and Health Care	76
Acute and Chronic Conditions	76
Incidence and Prevalence	80
Case Finding	81
References	85
Additional Resources	86
 4. Population Size, Concentration, and Distribution	 87
Introduction	87
Conceptual and Measurement Issues	88
Population Size	88
Concentration and Distribution	97

Rates of Change	99
Trends in Population Size, Concentration, and Distribution	101
Census Divisions	102
States	103
Counties	106
Measuring the Supply of Health Services	108
National Patterns	108
State Patterns	108
County Patterns	110
Implications for Health Care Delivery	110
General Issues	110
Population Thresholds for Health Services	111
References	113
Additional Resources	114
 5. Population Composition	 115
Introduction	115
Compositional Measures	116
Biosocial Factors	117
Sociocultural Factors	119
Measures of Compositional Variation	121
Population Pyramids	123
Dependency Ratios	124
Sex Ratios	126
Cohort Analysis	126
Standardization	128
Compositional Characteristics and Trends for the US Population ..	131
Age	131
Sex	133
Race–Ethnicity	134
Marital Status, Living Arrangements, and Family Structure	136
Education, Income, and the Labor Force	138
Changing Population Characteristics: Implications for Health Care	139
Compositional Shifts	139
Health Care Needs	141
References	142
Additional Resources	143
 6. Fertility	 145
Introduction	145
Concepts, Measures, and Trends	147
