

Table of contents

Executive Summary	9
Chapter 1. Summary of discussions by John Preston.....	13
1. Introduction.....	14
2. Objectives	15
3. The role of high-speed rail	16
4. The costs and benefits of high-speed rail.....	18
5. Breakeven conditions.....	31
6. Funding	34
7. Indian context.....	35
8. Conclusions.....	36
Notes.....	38
Acknowledgements.....	40
Bibliography	41
Chapter 2. When to invest in high-speed rail by Christopher Nash	45
1. Introduction.....	46
2. Costs and benefits of high-speed rail	47
3. In what circumstances will benefits exceed costs?	52
4. The high-speed rail debate in Britain.....	57
5. Overall conclusions.....	69
Notes.....	69
Bibliography	70
Chapter 3. Performance in France: From appraisal methodologies to ex-post evaluation by Yves Crozet	73
1. Introduction.....	74
2. The TGV in France: The product of an environment and ex-ante assessments.....	84
3. Ex post assessments and extension of the LGV network: How far is not too far?	90
4. Conclusion	98
Annex 3.A1. Ramsey-Boiteux pricing: Opportunity cost of public funds and price elasticity.....	99
Annex 3.A2. Effective speed and effective speed for society, another indicator for determining the critical zone for a TGV	101
Notes.....	103
Bibliography	104
Chapter 4. Shinkansen investment before and after JNR reform by Fumio Kurosaki.....	107
1. Introduction.....	108
2. Outline of JNR reform	108
3. Shinkansen projects in JNR and its management	109
4. Shinkansen projects since JNR reform	113
5. Characteristics of train operation in Japan.....	117

6. Changes in performance and its evaluation	120
7. Conclusions.....	126
Bibliography	128
Chapter 5. The financial and economic assessment of China's high-speed rail investments: A preliminary analysis by Jianhong Wu	129
1. Introduction.....	130
2. The cost of building HSR infrastructure and its composition in China	135
3. The initial operational performance of HSR in China	136
4. Financial assessment of China's HSR investment.....	138
5. Economic assessment of China's HSR investments	141
6. Some tentative conclusions.....	153
Annex 5.A1. HSR construction, design speed and HSR scale in China by 2012.....	154
Annex 5.A2. HSR infrastructure construction cost in China by 2012.....	155
Annex 5.A3. Estimation of traffic density on selected HS lines from 2010 to 2012.....	156
Annex 5.A4. Estimation of break-even traffic density of HSR in China via international comparison.....	157
Annex 5.A5. Air and HSR Comparison between China (Beijing-Shanghai) and Japan (Tokaido and Sanyo Shinkansen).....	158
Annex 5.A6. Tariff level and estimated load factors of selected HSR lines in China in 2012.....	159
Notes.....	160
Bibliography	161
Chapter 6. New entry in the Italian high-speed rail market by Fabio Croccolo.....	163
1. The Italian high-speed rail market	164
List of participants.....	172
Figures	
1.1. High speed rail / air market share	23
1.2. Evolution of numbers of passengers for rail and air modes.....	30
1.3. First year demand required for socio-economic break-even.....	33
3.1. High-speed rail traffic in Europe, 2012 (billion passenger-km)	75
3.2. Rail infrastructure use charges in Europe	78
3.3. Comparative generalised costs of rail and air	89
3.4. Improvement of the market share of rail as a result of the introduction of high-speed services.....	89
3.5. Variations between predicted and observed traffic.....	92
3.6. Observed variations in the cost of works.....	92
3.A2.1. Social effective speed (SES) and social cost/km	103
4.1. Growth in line length and transport volume of Shinkansen lines	117
4.2. Through-train services between two railway companies in Japan.....	118
4.3. Operational responsibilities of the three Shinkansen lines	119
4.4. Changes in transport volume on Shinkansen lines.....	120
4.5. Traffic density of the Tohoku Shinkansen line.....	122
4.6. Traffic density of the Joetsu and Hokuriku Shinkansen lines.....	123
4.7. Average sale of Shinkansen commuter passes.....	125
4.8. Changes in revenue from Shinkansen and conventional lines.....	125
