

TABLE OF CONTENTS

<i>List of Figures</i>	<i>xiii</i>
<i>List of Tables</i>	<i>xvii</i>
<i>Preface</i>	<i>xx</i>
Chapter 1 Introduction	1
Chapter 2 The History of Environmental Economics	3
Chapter 3 Environmental Attitudes	9
Chapter 4 Multidisciplinary Nature of Environmental Science	11
Chapter 5 The Concept of Sustainable Development	13
5.1. Measuring Sustainable Development.....	15
Chapter 6 Understanding The Basics Of Environmental Economics	17
6.1. What Is Environmental Economics?.....	17
6.2. The Law of Diminishing Returns.....	18
6.3. The Tragedy of The Commons.....	23
6.4. Carrying Capacity.....	25
6.5. The Malthusian Theory Of Population.....	26
6.6. Carrying Capacity And Population Growth.....	28
6.7. Ecological Footprints.....	29
6.8. Environmental Economics And Sustainable Development.....	33
6.9. Supply And Demand.....	35
6.10. Externalities.....	37
6.11. Net Present Value.....	37
6.12. Trade-Offs.....	39
6.13. Marginal Costs And Benefits.....	40
6.14. Cost Benefit Analysis.....	41

Chapter 7	Linking The Ecosystem And Economics	43
	7.1. Human Influences on The Ecosystem.....	43
	7.2. Negative Influences on Ecosystems.....	45
	7.3. Ecosystem Services.....	52
	7.4. Regulating Services.....	55
	7.5. Cultural Services.....	58
	7.6. Quantifying Impacts on Ecosystem Services.....	59
	7.7. Ecosystem Valuation.....	60
	7.8. Environmental Impact Analysis.....	61
	7.9. Integrating Ecosystem Needs With Human Needs.....	61
Chapter 8	Ecosystem-Based Management	65
	8.1. Ecosystem-Based Management In Wetlands.....	66
Chapter 9	Understanding The Links Between The Natural Environment And The Human Economy	67
	9.1. The Concept of Natural Resources.....	67
	9.2. Using The Market To Provide Information on Resource Activity.....	70
	9.3. Determining The Performance of A Competitive Market Economy.....	72
	9.4. Factor Substitution And Technological Changes.....	77
	9.5. Implications of Factor Substitution on Resource Scarcity.....	77
	9.6. Constant Factor Substitution.....	77
	9.7. Diminishing Factor Substitution.....	77
	9.8. No Factor Substitution Possibilities.....	78
	9.9. Changes In Production Technology And Its Implications.....	78
Chapter 10	The Natural Environment And The Human Economy (Ecological Perspective)	81
Chapter 11	Ecosystem Structure	83
	11.1. Functions of An Ecosystem.....	89
	11.2. Human Influences on The Ecosystem.....	92
	11.3. Negative Influences on Ecosystems.....	93
	11.4. Positive Influences on Ecosystems.....	94
Chapter 12	Economics of The Environment	95
	12.1. Fundamentals Economics of Environmental Resources.....	95

Chapter 13	The Economics of Environmental Regulations: Regulating The Environment Through Judicial Procedures	103
	13.1. Environmental Regulation Through Liability Laws	103
	13.2. The Property Rights or Coasian Approach	105
	13.3. Emission Standards	108
	13.4. The Economics of Environmental Regulations: Pollution Taxes And Transferable Emission Permits	112
	13.5. Effluent Charges	112
Chapter 14	Applying Environmental Economics: Applications In Integrated Water Management	117
	14.1. What Is Integrated Water Resource Management?	117
	14.2. Changing Ways Of Thinking	119
	14.3. Linking IWRM To Key Development Issues	122
	14.4. Implementing IWRM	126
	14.5. Investment Allocations For Water Resource Infrastructure	128
	14.6. Roles And Functions Of Organizations At Different Levels	130
	14.7. Capacity Building For Solving Problems	132
	14.8. Management Instruments	132
	14.9. Water Resource Assessments	133
	14.10. Water Resource Knowledge Bases	133
	14.11. Objective Of Water Resources Assessments	133
	14.12. User Behavior, Preferences, And Demands	134
Chapter 15	Environmental Impact Assessments (EIA)	135
	15.1. Tools For Risk Assessment	135
	15.2. Risk Management	135
	15.3. The Precautionary Principle	136
	15.4. Enhancing The Involvement Of Stakeholders	136
	15.5. Openness And Transparency	136

15.6. Water Allocation And Conflict Resolution	137
15.7. Resolving Conflicts By Using Valuations	137
15.8. Resolving Upstream And Downstream Conflicts	137
15.9. Valuation Research On Environmental Benefits	138
Chapter 16 Regulatory Instruments	139
16.1. Three Groups Of Regulatory Instruments.....	139
16.2. Standards And Guidelines.....	140
16.3. Regulation Of Utilities	140
16.4. Efficiency Of Economic Tools.....	140
16.5. Encouraged Self-Regulation	141
16.6. Technological Advances Towards Sustainability.....	141
16.7. The Legal Framework	141
16.8. Boundary Conditions And Scales	142
16.9. Water Allocation Issues.....	143
16.10. Uncertainty.....	143
16.11. Efficiency And Equity	144
16.12. Water Losses.....	144
16.13. Water Allocations Between Sectors	144
Chapter 17 Environmental Economics And Water Governance.....	147
17.1. The Need For More Effective Water Governance	148
17.2. Challenges of Water Governance.....	150
17.3. Improving Water Governance	153
Chapter 18 Conclusion	155
Recommended Reading and Resources	157
References.....	159
Index	165
