<b>1. Biological invasions: a global threat to insect diversity</b>	<b>1</b>
Noa Núñez-González, Ana Novoa, Petr Pyšek and Jonatan Rodríguez	
The challenge of insect conservation in the 21st century	1
What is an invasive species?	2
The impacts of biological invasions	3
The impact of biological invasions on insect diversity	5
Aims and scope of this book	6
Acknowledgments	8
References	8

## SECTION 1 Biodiversity, insect decline, and consequences of global trade

<b>2. Biodiversity and the importance of insect diversity</b>	<b>19</b>
Iago Sanmartín-Villar and Adolfo Cordero-Rivera	
What is biodiversity?	19
Insect biodiversity and ecosystem services	31
Insect conservation: are we interested?	35
Biological invasions and insect conservation	37
Acknowledgments	39
References	39

<b>3. The insect decline syndrome</b>	<b>47</b>
Wolfgang Rabitsch and Klaus Peter Zulka	
Introduction	47
A brief history of insect decline	48
The causes of insect decline	52
Can IDS cause a tipping point for insect populations, ecosystem functions, and ecosystem services?	75

Conclusions and outlook	77
Acknowledgments	80
References	80

#### **4. Global trade in alien species: a challenge for insect conservation 91**

Jonatan Rodríguez, Beatriz Rodriguez-Salvador, Ana Novoa and Petr Pyšek

Introduction	91
Plants	92
Insects	94
Noninsect invertebrates	96
Vertebrates	98
Conclusions	103
Acknowledgments	104
References	104

### **SECTION 2 Impacts of invasive alien species on insect diversity**

#### **5. Alien plants and insect diversity 119**

Andrea R. Litt, Adam B. Mitchell and Douglas W. Tallamy

Alien plants are ubiquitous	119
Alien plants affect arthropods	120
Impacts through pests and diseases associated with alien plants	129
Conclusions	131
Acknowledgments	131
References	132

#### **6. Invasive alien insects and insect decline 143**

Wolfgang Rabitsch, Victoria Werenkraut, Marc Kenis, Alain Roques and Helen E. Roy

Introduction	143
Impact mechanisms	147
Conclusions	160
Acknowledgments	160
References	160

#### **7. Invasive alien non-insect invertebrates and insect diversity 173**

Giuseppe Mazza and Elena Tricarico

Introduction	173
Freshwater environments	173

Terrestrial environments	181
Conclusions	183
References	184
<b>8. The impact of invasive alien vertebrates on native insects</b>	<b>189</b>
Giovanni Vimercati, Robert Britton, Thomas Evans, John Measey, Nitya Prakash Mohanty and Lara Volery	
Introduction	189
Alien fishes	197
Alien amphibians	199
Alien reptiles	202
Alien birds	204
Alien mammals	206
General remarks and conclusion	209
Acknowledgments	211
References	211
<b>9. Microorganisms and disease-mediated invasions affecting native insect conservation</b>	<b>225</b>
Jonatan Rodríguez, Ana Novoa and Petr Pyšek	
Introduction	225
Introduced insects and cointroduced pathogens	227
Pathogens as biocontrol agents	239
Introduced plants and cointroduced pathogens	243
Concluding remarks and future directions	244
Acknowledgments	246
References	246
<b>SECTION 3 Lessons from management and monitoring programs: Restoration ecology and citizen science as socioecological solutions</b>	
<b>10. Reconciling invasive alien species management and insect conservation in terrestrial ecosystems</b>	<b>259</b>
Manon C.M. Hess, Michael J. Samways and Elise Buisson	
Introduction	259
Prescribed burning	260
Physical removal	264

Mowing	266
Grazing	268
Chemical compounds	270
Biological control	274
Conclusions	277
Acknowledgments	278
References	278
<b>11. The role of citizen science in biodiversity monitoring: when invasive species and insects meet</b>	<b>291</b>
Elizabete Marchante, Francisco Alejandro López-Núñez, Liliana N. Duarte and Hélia Marchante	
Introduction	291
Citizen science initiatives involving invasive alien species and insects	298
Final considerations	307
Acknowledgments	309
References	309
<b>12. From trade regulations to socio-ecological solutions: Present and future actions to promote insect conservation</b>	<b>315</b>
Jonatan Rodríguez, Beatriz Rodriguez-Salvador, Ana Novoa and Petr Pyšek	
Introduction	315
Actions to prevent future invasions	317
Biases toward non-insect taxa	318
Actions to include citizens in invasive species management and native insect conservation	319
Concluding remarks and future directions	320
Acknowledgments	321
References	321
<i>Index</i>	327
