

Table of Contents

CHAPTER 1: MATHEMATICAL PREREQUISITES.....	2
GAUSSIAN INTEGRALS.....	2
SERIES EXPANSIONS	6
COMPLEX NUMBERS	11
BACK TO SERIES.....	12
INTEGRALS WITH COMPLEX NUMBERS	14
GAUSSIAN INTEGRALS WITH IMAGINARY NUMBERS	15
ADDITIONAL EXERCISES.....	17
CHAPTER 2: VARIATIONAL CALCULUS	20
STATIONARITY PRINCIPLE	24
DERIVING THE EQUATION FOR THE SHORTEST PATH	26
FURTHER EXAMPLES OF VARIATIONAL CALCULUS	30
LEAST ACTION PRINCIPLE	37
CHAPTER 3: FEYNMAN'S PATH INTEGRAL: A MATHEMATICAL INTRODUCTION	44
DISCRETIZING AN ACTION.....	44
CALCULATING A SIMPLE PATH INTEGRAL	46
ROLE OF THE CONSTANT	54
INDIRECT METHOD FOR EVALUATING PATH INTEGRALS	56
CHAPTER 4: PATH INTEGRALS IN QUANTUM MECHANICS.....	64
THE CONNECTION BETWEEN CLASSICAL AND QUANTUM	64
DERIVATION OF DE BROGLIE'S AND EINSTEIN'S RELATION FROM FREE PARTICLE PROPAGATOR ..	74
CHAPTER 5: PATH INTEGRALS IN THE PRESENCE OF POTENTIAL ENERGIES.....	78
POTENTIAL ENERGIES IN THE MICROSCOPIC WORLD	78
PATH INTEGRALS WITH THE POTENTIAL ENERGY TERM IN THE ACTION	80
MULTIPLICATIVE LAW OF PROPAGATORS.....	84
EXAMPLES OF CALCULATING PATH INTEGRALS WITH POTENTIAL ENERGY	89
CHAPTER 6: DERIVING SCHRODINGER'S EQUATION USING THE PROPAGATOR ..	100
EXAMPLE-1: DERIVING SCHRODINGER'S EQUATION FOR A FREE PARTICLE	103
EXAMPLE-2: DERIVING SCHRODINGER'S EQUATION FOR A PARTICLE HAVING A POTENTIAL ENERGY:	106
<i>Case I: The Potential Energy $V(x)$ Is Linear in the Space Variable</i>	<i>107</i>
<i>Case II: The Potential Energy $V(x)$ Is Quadratic in the Space Variable</i>	<i>110</i>
<i>Case-III: Deriving Schrodinger's Equation for a Particle with a General Potential Energy $V(x)$</i>	<i>113</i>

CHAPTER 7 CLASSICAL PROBABILITIES AND QUANTUM PROBABILITY AMPLITUDES **118**

INTRODUCTION118

EXAMPLE 1: DIGITAL PCR, CALCULATING CONCENTRATION FROM THE ODDS OF NEGATIVES..120

POISSON PLUS—A DIGITAL PCR ALGORITHM123

EXAMPLE 2: RANDOM WALK128

APPENDIX 1..... 132

FUNCTIONALS132

APPENDIX 2..... 134

POTENTIAL ENERGIES134

APPENDIX 3..... 136

HEISENBERG’S UNCERTAINTY PRINCIPLE: AN APPLICATION OF THE MULTIPLICATIVE LAW OF PROPAGATORS (ADVANCED TOPIC)136

APPENDIX 4..... 142

THE WIDE-RANGING APPLICABILITY OF FREE PARTICLE PROPAGATORS (ADVANCED TOPIC)....142

APPENDIX 5..... 146

FUNCTIONAL DERIVATIVES146

APPENDIX 6..... 152

STATISTICS OF A RANDOM WALK152

APPENDIX 7..... 156

SOLUTIONS156

INDEX..... 170
