1	General properties of families of sets	9
1.1	Basic terminology	9
1.2	Borel sets	15
2	Measure as a set function	17
2.1	Properties of set functions	17
2.2	Definition of measure	20
2.3	Introducing measure on family \mathcal{H}_r	25
3	Abstract Jordan measure	35
3.1	Introducing measure to \mathcal{H}_r	35
3.2	Finalising construction of Jordan measure	37
4	Abstract Lebesgue measure	49
4.1	Introducing measure to \mathcal{I}_r	49
4.2	Finalising construction of Lebesgue measure	54
4.3	Restriction of Lebesgue measure	65
5	Theory of abstract Lebesgue integral	67
5.1	Basic notions	67
5.2	Measurable functions	68
5.3	Abstract Lebesgue integral	74
5.4	Ordinary Lebesgue integral	98
6	Lebesgue integral with real parameter	111
6.1	Limit and continuity of integral with parameter	111
6.2	Differentiation of integral with parameter	115
7	Generalised Lebesgue integral and factorisation of the space of square integrable functions	121
7.1	Generalised Lebesgue integral	121
7.2	Space of square integrable functions and its factorisation	125
8	Exercise problems	131
8.1	Problems in abstract measure theory	131
8.2	Problems in theory of Lebesgue integration	139
9	Appendix	151
9.1	Basic concepts in set theory	151
10	Problem solutions	155
	Index	158
