Preface

to the first edition	v
to the second edition	vii

0 Order-theoretic foundations 1

0.1 Ordered sets	1
0.2 Complete lattices	5
0.3 Closure operators	9
0.4 Galois connections	15
0.5 Notes, references, and trends	20

1 Concept lattices of formal contexts 23

1.1 Formal context and formal concept	23
1.2 Formal context and concept lattice	29
1.3 Context constructions	41
1.4 Conceptual scaling of many-valued contexts	59
1.5 Notes, references, and trends	67

2 Determination and representation 77

2.1 All formal concepts of a formal context	77
2.2 Diagrams of concept lattices	83
2.3 Implications	92
2.4 Clauses and dependencies	104
2.5 Notes, references, and trends	112

3 Parts, factors, and bonds 117

3.1 Subcontexts	117
3.2 Complete congruences and tolerances	124
3.3 Closed subrelations	140
3.4 Bonds and connections	147
3.5 Notes, references, and trends	160

4 Decompositions of concept lattices 163

4.1 Subdirect decompositions	163
4.2 Atlas decompositions	170

4.3	Substitution	184
4.4	Tensorial decompositions	197
4.5	Notes, references, and trends	214
5	Constructions of concept lattices	215
5.1	Subdirect product constructions	216
5.2	Gluings	223
5.3	Local doubling	229
5.4	Tensorial constructions	237
5.5	Notes, references, and trends	247
6	Properties of concept lattices	249
6.1	Size and breadth	249
6.2	Distributivity, modularity and semimodularity	252
6.3	Semidistributivity and local distributivity	262
6.4	Dimension	270
6.5	Notes, references, and trends	279
7	Context comparison and conceptual measurement	283
7.1	Automorphisms and foldings	283
7.2	Morphisms	292
7.3	Scale measures	298
7.4	Measurability theorems	303
7.5	Notes, references, and trends	308
8	Contextual concept logic	311
8.1	Contextual attribute logic	312
8.2	Pre-, proto-, and semiconcepts	317
8.3	Concept algebras	323
8.4	Contextual logic with relations	326
8.5	Notes, references, and trends	332
	References	335
	Formal contexts and concept lattices in this book	361
	Index	363
