

Short Overview

Foreword	xxv
About the Author	xxvii
Acknowledgements	xxix
Preface	xxxi
About the Companion Site	xxxv
I Introduction	1
1 The Big Picture with Kondratiev and Kardashev	3
2 The Scientific Method and Data	7
3 Conventions	11
II Starting with R and Elements of Statistics	19
4 The Basics of R	21
5 Lexical Scoping and Environments	81
6 The Implementation of OO	87
7 Tidy R with the Tidyverse	121
8 Elements of Descriptive Statistics	139
9 Visualisation Methods	159
10 Time Series Analysis	197
11 Further Reading	211

III Data Import	213
12 A Short History of Modern Database Systems	215
13 RDBMS	219
14 SQL	223
15 Connecting R to an SQL Database	253
IV Data Wrangling	257
16 Anonymous Data	261
17 Data Wrangling in the tidyverse	265
18 Dealing with Missing Data	333
19 Data Binning	343
20 Factoring Analysis and Principle Components	363
V Modelling	373
21 Regression Models	375
22 Classification Models	387
23 Learning Machines	405
24 Towards a Tidy Modelling Cycle with modelr	469
25 Model Validation	475
26 Labs	495
27 Multi Criteria Decision Analysis (MCDA)	511
VI Introduction to Companies	563
28 Financial Accounting (FA)	567
29 Management Accounting	583
30 Asset Valuation Basics	597
VII Reporting	683
31 A Grammar of Graphics with ggplot2	687

32 R Markdown	699
33 knitr and L^AT_EX	703
34 An Automated Development Cycle	707
35 Writing and Communication Skills	709
36 Interactive Apps	713
VIII Bigger and Faster R	741
37 Parallel Computing	743
38 R and Big Data	761
39 Parallelism for Big Data	767
40 The Need for Speed	793
IX Appendices	819
A Create your own R package	821
B Levels of Measurement	829
C Trademark Notices	833
D Code Not Shown in the Body of the Book	839
E Answers to Selected Questions	845
Bibliography	859
Nomenclature	869
Index	881
