

BRIEF CONTENTS

Preface xxii

Acknowledgments xxxi

1	<i>Keys to Studying Chemistry: Definitions, Units, and Problem Solving</i>	2
2	<i>The Components of Matter</i>	40
3	<i>Stoichiometry of Formulas and Equations</i>	92
4	<i>Three Major Classes of Chemical Reactions</i>	140
5	<i>Gases and the Kinetic-Molecular Theory</i>	200
6	<i>Thermochemistry: Energy Flow and Chemical Change</i>	252
7	<i>Quantum Theory and Atomic Structure</i>	290
8	<i>Electron Configuration and Chemical Periodicity</i>	326
9	<i>Models of Chemical Bonding</i>	362
10	<i>The Shapes of Molecules</i>	398
11	<i>Theories of Covalent Bonding</i>	436
12	<i>Intermolecular Forces: Liquids, Solids, and Phase Changes</i>	466
13	<i>The Properties of Mixtures: Solutions and Colloids</i>	530
14	<i>Periodic Patterns in the Main-Group Elements</i>	580
15	<i>Organic Compounds and the Atomic Properties of Carbon</i>	626
16	<i>Kinetics: Rates and Mechanisms of Chemical Reactions</i>	686
17	<i>Equilibrium: The Extent of Chemical Reactions</i>	744
18	<i>Acid-Base Equilibria</i>	794
19	<i>Ionic Equilibria in Aqueous Systems</i>	848
20	<i>Thermodynamics: Entropy, Free Energy, and Reaction Direction</i>	906
21	<i>Electrochemistry: Chemical Change and Electrical Work</i>	950
22	<i>The Elements in Nature and Industry</i>	1008
23	<i>Transition Elements and Their Coordination Compounds</i>	1046
24	<i>Nuclear Reactions and Their Applications</i>	1084

Appendix A Common Mathematical Operations in Chemistry A-1

Appendix B Standard Thermodynamic Values for Selected Substances A-5

Appendix C Equilibrium Constants for Selected Substances A-8

Appendix D Standard Electrode (Half-Cell) Potentials A-14

Appendix E Answers to Selected Problems A-15

Glossary G-1

Index I-1

Data Tables D-1
