

CONTENT

1. SOLUTIONS	5
<i>Task 1:</i> Preparation of calcium chloride solution (Solutio calcii chloridi hexahydrici SFK) ...	8
<i>Task 2:</i> Preparation of calcium hydroxide solution (Solutio calcii hydroxidati PhBS IV)	8
<i>Task 3:</i> Preparation of lead subacetate solution (Plumbum aceticum basicum solutum PhBS II)	8
<i>Task 4:</i> Preparation of aluminium aceto-tartrate solution (Solutio aluminii acetotartratis SFK)	9
<i>Task 5:</i> Preparation of alcoholic solution of iodine (Solutio iodi ethanolica SFK)	9
<i>Task 6:</i> Preparation of glycerolic solution of iodine (Solutio iodi glycerolica SFK)	10
<i>Task 7:</i> Preparation of hydrogen peroxide solution 3% (Hydrogenii peroxidum 3 %, Ph. Eur.)	11
<i>Task 8:</i> Preparation of Jarisch solution (Solutio Jarisch, SFK)	11
<i>Task 9:</i> Preparation of Fraeser solution (Solutio Fraeser, PhB)	12
2. AROMATIC WATERS	14
<i>Task 10:</i> General preparation of aromatic waters from essential oils	14
<i>Task 11:</i> Preparation of aromatic waters by dilution of a concentrated aromatic water	17
<i>Task 12:</i> Preparation of aromatic waters by solubilisation with surfactants	17
3. SYRUPS	18
<i>Task 13:</i> Simple syrup (Sirupus simplex PhBS IV)	18
<i>Task 14:</i> Orange syrup (Sirupus aurantii PhBS IV)	19
<i>Task 15:</i> Marshmallow syrup (Sirupus althaeae PhBS IV)	19
<i>Task 16:</i> Thyme syrup (Sirupus thymi compositus PhBS IV)	19
<i>Task 17:</i> The effect of concentration of sucrose on solubility of active substances in a syrup .	20
<i>Task 18:</i> The effect of solvent and manufacturing procedure on the sucrose dissolution rate during orange syrup preparation	20
4. ETHANOLIC SOLUTIONS OF SOAPS	22
<i>Task 19:</i> Soap alcohol (Spiritus saponatus PhBS IV)	22
<i>Task 20:</i> Alcohol with potassium soap (Spiritus saponis kalini PhBS IV)	22
<i>Task 21:</i> Liniment (Linimentum saponato-camphoratum PhBS IV)	23
5. MUCILAGES AND GELS	24
<i>Task 22:</i> Mucilage of acacia (Mucilago gummi arabici PhBS IV)	24
<i>Task 23:</i> Mucilage of methylcellulose (Mucilago methylcellulosi PhBS IV)	25
<i>Task 24:</i> Tragacanth gel (Unguentum solubile PhBS II)	25
<i>Task 25:</i> Pectine gel – the effect of various alcohols on the gel viscosity and stability	25

<i>Task 26: Starch hydrogels</i>	26
<i>Task 27: Mucillage of carmellose sodium (Mucilago carboxymethylcellulosi solubile)</i>	27
<i>Task 28: Carbomer gels</i>	27
<i>Task 29: Soft zinc gelatin (Gelatina zinci oxydati mollis PhBS IV)</i>	28
<i>Task 30: Dispersion of bentonite (Magma bentoniti PhBS IV)</i>	28
<i>Task 31: Measurement of viscosity of mucilages and syrups by Höppler viscometer</i>	28
6. DOSAGE FORMS OBTAINED BY EXTRACTION OF HERBAL DRUGS	30
6.1. Decoctions and infusions (Decocta, Infusa).....	30
<i>Task 32: Preparation of decoctions</i>	30
<i>Task 33: Preparation of infusions</i>	31
<i>Task 34: Infusions and decoctions from drugs with the content of alkaloids</i>	31
<i>Task 35: Infusions and decoctions from drugs with the content of saponines</i>	32
<i>Task 36: Infusions and decoctions from drugs with the content of mucilages</i>	32
<i>Task 37: Preparation of decoctions and infusions in a high speed mixer</i>	32
<i>Task 38: Preparation of decoctions and infusions by dissolution of dry extracts</i>	33
6.2. Tinctures (Tincturae)	33
<i>Task 39: Preparation of tinctures by dissolution</i>	34
<i>Task 40: Preparation of tinctures by maceration</i>	34
<i>Task 41: Preparation of tinctures by percolation</i>	36
<i>Task 42: Preparation of tinctures by extraction in a high-speed mixer</i>	38
<i>Task 43: Adjustment of tinctures to a prescribed content of active substances</i>	39
<i>Task 44: The determination of density, dry matter and the content of ethanol in tinctures</i>	40
6.3. Extracts (Extracta)	41
<i>Task 45: Preparation of liquid extracts by percolation</i>	43
<i>Task 46: Adjustment of extracts to a prescribed content of active substances</i>	44
7. EAR PREPARATIONS	45
<i>Task 47: Preparation of ear drops</i>	45
8. NASAL PREPARATIONS	47
<i>Task 48: Preparation of nasal drops</i>	47
9. PARENTERAL PREPARATIONS	49
9.1. Categories of parenteral preparations	49
9.2. Methods and conditions of sterilisation	51
9.3. Aseptic preparation	52
<i>Task 49: Preparation of a solution for injection</i>	53
<i>Task 50: Quality control tests for parenteral solution</i>	54
<i>Task 51: Determination of quality of ampoule's glass</i>	55
<i>Task 52: Preparation of a solution for infusion</i>	57
<i>Task 53: Conversion of ionic composition in medical prescription</i>	58
10. EYE PREPARATIONS	60
<i>Task 54: Preparation of eye drops</i>	61
<i>Task 55: Preparation of eye ointments</i>	63
REFERENCE LIST	66
