

CONTENTS

PREFACE	7
1 PHYSIOLOGY OF THE NERVE AND MUSCLE	
1.1 Physiological properties of the nerve – compound action potential and stimulus intensity (<i>R. Važan</i>)	9
1.2 Physiological properties of the nerve – chronaxy and rheobase (<i>R. Važan</i>)	11
1.3 Physiological properties of the nerve – absolute and relative refractory periods (<i>R. Važan</i>)	12
1.4 Physiological properties of the nerve – Hoorweg-Weiss curve (<i>R. Važan</i>)	13
1.5 Determination of the skeletal muscle strength in a human (<i>R. Važan</i>)	15
1.6 Work and fatigue of the skeletal muscle in vivo (<i>S. Lakatošová</i>)	16
1.7 Physiological properties of the skeletal muscle – threshold and maximal stimulus for contraction (<i>R. Važan</i>)	18
1.8 Physiological properties of the skeletal muscle – incomplete and complete tetanus (<i>R. Važan</i>)	19
2 PHYSIOLOGY OF SENSES	
2.1 Otoscopy – external ear examination (<i>A. Tomova, S. Hnilicová</i>)	22
2.2 Ear tests with tuning forks (<i>A. Tomova, R. Važan</i>)	24
2.3 Audiometry (<i>A. Tomova</i>)	27
2.4 Examination of vestibular nystagmus in human (<i>R. Važan</i>)	30
2.5 Model of the eye – formation of the image on retina (<i>R. Važan</i>)	32
2.6 Purkinje images (<i>R. Važan</i>)	34
2.7 Keratometry (<i>R. Važan</i>)	36
2.8 Determination of the punctum proximum (<i>R. Važan</i>)	37
2.9 Determination of the central visual acuity (<i>R. Važan</i>)	39
2.10 Reaction of pupils to light and accommodation (<i>R. Važan</i>)	41
2.11 Determination of the visual field – perimetry (<i>R. Važan</i>)	42
2.12 Ophthalmoscopy (<i>J. Radošinská, M. Vidošovičová</i>)	44
2.13 The red reflex of the ocular background (<i>R. Važan</i>)	47
2.14 Purkinje flash-light figure (<i>J. Radošinská</i>)	48
2.15 Examination of optokinetic nystagmus (<i>R. Važan</i>)	49
2.16 Examination of tear production – Schirmer test (<i>R. Važan</i>)	51
2.17 Additive mixing of colours (<i>R. Važan</i>)	52
2.18 Successive and simultaneous contrasts (<i>R. Važan</i>)	55
2.19 Examination of colour vision using the pseudoisochromatic charts (<i>J. Radošinská</i>)	58
2.20 Stereoscopic vision (<i>S. Lakatošová</i>)	61
2.21 Detection of olfactory sensations (<i>S. Lakatošová</i>)	63

2.22	Determination of taste sensations (<i>S. Lakatošová</i>)	65
2.23	Examination of cutaneous sensitivity – esthesiometry (<i>J. Radošinská</i>)	67
2.24	Influencing the skin sensitivity (<i>J. Radošinská</i>)	70
2.25	Adaptation of skin mechanoreceptors (<i>S. Lakatošová</i>)	71
2.26	Accuracy of tactile localisation (<i>S. Lakatošová</i>)	73
2.27	Stereognosis and graphesthesia (<i>J. Radošinská</i>)	75
3	PHYSIOLOGY OF THE ENDOCRINE AND CENTRAL NERVOUS SYSTEM	
3.1	Determination of hormones in the virtual laboratory – ENDOLAB (<i>R. Važan</i>)	77
3.2	Reflex examination (<i>P. Keményová, D. Ostatníková</i>)	79
3.3	Measurement of the reaction time (<i>S. Lakatošová, J. Radošinská</i>)	82
3.4	Examination of the memory (<i>P. Keményová</i>)	84
3.5	Examination of spatial abilities (<i>P. Keményová</i>)	86
3.6	Assessment of motor handedness (<i>P. Keményová, D. Ostatníková</i>)	88
3.7	Training and rehabilitation of cognitive functions (<i>P. Keményová, D. Ostatníková</i>)	89
3.8	Examination of cognitive functions (<i>P. Keményová</i>)	92
3.9	Examination of cerebellar functions (<i>P. Keményová</i>)	93
4	PHYSIOLOGY OF BLOOD	
4.1	Venous blood collection in humans (<i>G. Repiská, A. Kubranská</i>)	96
4.2	Capillary blood collection in humans (<i>G. Repiská, A. Kubranská</i>)	98
4.3	Examination of erythrocyte sedimentation rate (<i>G. Repiská, A. Kubranská</i>)	99
4.4	Determination of blood density (<i>S. Lakatošová</i>)	101
4.5	Determination of erythrocyte osmotic resistance (<i>S. Lakatošová</i>)	102
4.6	Haemolysis (<i>S. Lakatošová</i>)	104
4.7	The count of erythrocytes (<i>S. Lakatošová, M. Vidošovičová</i>)	105
4.8	Determination of haematocrit value (<i>S. Lakatošová, M. Vidošovičová</i>)	108
4.9	Determination of haemoglobin concentration (<i>S. Lakatošová, M. Vidošovičová</i>)	109
4.10	The count of leukocytes (<i>S. Lakatošová, M. Vidošovičová</i>)	111
4.11	Leukogram (<i>K. Babinská, G. Repiská</i>)	112
4.12	Derived haematological parameters – calculation (<i>K. Babinská, G. Repiská</i>)	114
4.13	Determination of blood group in AB0 system (<i>K. Babinská, G. Repiská</i>)	116
4.14	Determination of blood group in rhesus system – Rh factor (<i>K. Babinská, G. Repiská</i>)	117
4.15	Cross-matching test (<i>K. Babinská, G. Repiská</i>)	118
4.16	Determination of bleeding time by Duke (<i>G. Repiská, A. Kubranská</i>)	120
4.17	Determination of blood coagulation time by Lee-White (<i>G. Repiská, A. Kubranská</i>)	121
4.18	Determination of prothrombin time by prothrombin time by Quick (<i>S. Lakatošová</i>)	122
4.19	Determination of activated partial thromboplastin time (<i>S. Lakatošová</i>)	125
4.20	Determination of recalcification time (<i>J. Bakoš</i>)	127
5	PHYSIOLOGY OF THE RESPIRATORY SYSTEM	
5.1	Hering's model of respiratory system (<i>J. Radošinská</i>)	128
5.2	Parallelogram – model of intercostal muscles function (<i>J. Radošinská</i>)	131
5.3	Auscultation of the respiratory sounds (<i>R. Važan, S. Hnilicová</i>)	133
5.4	Lungs and thorax relaxation curve (<i>R. Važan</i>)	136

5.5 Breathing from non-relaxation positions of chest and lungs (<i>R. Važan</i>)	138
5.6 Measurement of vital capacity (<i>R. Važan</i>)	140
5.7 Spirometry – functional lung examination (<i>J. Bakoš</i>)	141
5.8 Spirometry examination using the spirosout device (<i>J. Radošinská</i>)	144
5.9 Analysis of respiratory gases in exhaled air (<i>R. Važan</i>)	149
5.10 Pulse oximetry (<i>J. Hodosy</i>)	150
5.11 Effect of increasing CO ₂ concentration and decreasing O ₂ concentration on respiration (<i>J. Bakoš</i>)	152
5.12 Voluntary apnea (<i>J. Bakoš</i>)	154
5.13 Measurement of nasopharyngeal mucociliary transport (<i>J. Radošinská</i>)	155
5.14 Measurement of peak expiratory flow with a peek flow meter (<i>S. Hnilicová</i>)	156
6 PHYSIOLOGY OF THE CARDIOVASCULAR SYSTEM	
6.1 Heart auscultation in humans and on a simulator (<i>R. Važan, S. Hnilicová</i>)	159
6.2 Electrocardiography (<i>J. Hodosy</i>)	162
6.3 Model of the vessel elasticity (<i>R. Važan</i>)	167
6.4 Examination of the arterial pulse (<i>R. Važan</i>)	169
6.5 Measurement of the arterial blood pressure (<i>R. Važan</i>)	170
6.6 The reactive hyperaemia (<i>R. Važan</i>)	173
6.7 Regulation of the blood pressure (<i>J. Radošinská</i>)	174
6.8 The orthostatic reflex (<i>R. Važan</i>)	178
6.9 Ruffier's test – effect of physical activity on heart rate (<i>J. Radošinská</i>)	179
6.10 The effect of standardized physical activity on the blood pressure (<i>R. Važan</i>)	180
6.11 Rumpel-Leede test of skin capillaries resistance (<i>J. Radošinská</i>)	181
7 GASTROINTESTINAL PHYSIOLOGY AND NUTRITION	
7.1 Observation of the effect of salivary alpha-amylase (<i>K. Babinská, J. Babková</i>)	183
7.2 Transport of food through oesophagus (<i>K. Babinská, J. Babková</i>)	184
7.3 Determination of glycaemia by glucometer (<i>K. Babinská, J. Babková</i>)	186
7.4 Calculation of the daily energy and nutrient intake (<i>K. Babinská, J. Babková</i>)	188
7.5 Evaluation of the daily energy and nutrient intake (<i>K. Babinská, J. Babková</i>)	190
7.6 The use of food composition tables in practice (<i>K. Babinská, J. Babková</i>)	193
7.7 Basic anthropometric measurements (<i>K. Babinská, J. Babková</i>)	196
8 METABOLISM	
8.1 Measurement of the basal metabolic rate (<i>K. Babinská, G. Repiská</i>)	201
8.2 Measurement of metabolic rate during physical activity, determination of oxygen debt and efficiency of physical work (<i>K. Babinská, G. Repiská</i>)	206
8.3 Calculation of the total daily energy expenditure (<i>K. Babinská, G. Repiská</i>)	210
9 PHYSIOLOGY OF KIDNEYS	
9.1 Renal function tests – the measurement of the glomerular filtration (<i>J. Radošinská</i>)	213
9.2 Renal function tests – the concentration and dilution test (<i>J. Radošinská</i>)	215
9.3 Examination of urine with diagnostic strips (<i>K. Babinská</i>)	217
9.4 Renal physiology – clinical cases (<i>K. Babinská, J. Radošinská</i>)	218

10 CLINICAL PHYSIOLOGY – SIMULATIONS

10.1 Introduction (S. Hnilicová, K. Babinská) 226

10.2 Basics of working with a simulator (S. Hnilicová) 227

10.3 Clinical case – blood loss (S. Hnilicová, K. Babinská) 229

10.4 Clinical cases – examination of respiratory functions at the patient’s bedside
(K. Babinská) 231

10.5 Clinical cases – respiratory diseases (S. Hnilicová) 233

10.6 Clinical case – heart sounds (J. Radošinská) 236

10.7 Clinical cases – cardiovascular system (S. Hnilicová) 238

10.8 Clinical case – integrative physiology (S. Hnilicová) 241

APPENDICES (S. Hnilicová) 243
