Preface	ix
Editors	xiii
Contributors	xv
1 Elements of Time Scales Calculus	1
<i>Ravi P. Agarwal, Bipan Hazarika, and Sanket Tikare</i>	
1.1 History and Objectives	1
1.2 Time Scales	3
1.3 Delta Differentiation	8
1.4 Delta Integration	19
1.5 Dynamic Equations	25
1.6 Nabla Calculus Essentials	34
2 First-Order Functional Dynamic Equations	39
<i>Svetlin G. Georgiev and Sanket Tikare</i>	
2.1 Functional Dynamic Equations—Basic Concepts, Existence and Uniqueness Theorems	39
2.1.1 Classification of Functional Dynamic Equations	39
2.1.2 The Picard–Lindelöf Theorem	41
2.1.3 Existence and Uniqueness Theorems	45
2.1.4 Continuous Dependence on Initial Data	48
2.2 Uniform Stability	49
2.3 Uniformly Asymptotical Stability	60
2.4 Global Stability	64
2.5 Asymptotic Stability	71
2.6 Exponential Stability	83
2.7 Positive Solutions	87
2.8 Iterated Oscillation Criteria for First-Order Functional Dynamic Equations	103
2.9 Oscillations of the Solutions of First-Order Functional Dynamic Equations with Several Delays	113
2.10 Nonoscillations of First-Order Functional Dynamic Equations with Several Delays	118
3 Foundations of Linear Control Theory on Time Scales	129
<i>Tom Cuchta and Nick Wintz</i>	
3.1 Introduction	129
3.2 Linear Deterministic Systems	130
3.2.1 Controllability and Observability	130
3.2.2 Linear Time Varying	133
3.2.3 Switched Systems	136

3.3	Stability Analysis	137
3.3.1	Definitions	137
3.3.2	Realizations, Stability, and Stabilizability	139
3.3.3	Lyapunov Methods	141
3.4	Optimization	147
3.4.1	Calculus of Variations	147
3.4.2	Linear Quadratic Regulator	149
3.4.3	Linear Quadratic Tracking (LQT)	153
3.5	Kalman Filter	158
3.6	Stochastic Time Scales	164
4	Optimal Control Theory for Dynamic Equations	171
	<i>Iguer Luis Domini dos Santos and Sanket Tikare</i>	
4.1	Optimal Control Problems	171
4.2	Preliminaries	172
4.2.1	Δ -Measurable Sets	172
4.2.2	Δ -Integrable Functions	173
4.2.3	Absolutely Continuous Functions	174
4.2.4	Set-Valued Functions and Measurability	175
4.2.5	Control Processes for (P_2)	176
4.2.6	Δ -Measurable Selection	176
4.3	Main Results	176
4.4	Proofs of the Main Results	185
4.5	Conclusions	190
5	Controllability of Dynamic Equations	192
	<i>Hugo Leiva and Cosme Duque</i>	
5.1	Introduction	192
5.2	Controllability of Linear Systems	192
5.3	Controllability of Dynamic Equations with Memory	195
5.4	Examples	201
5.5	Controllability of a Semilinear Neutral Dynamic Equation with Impulses and Nonlocal Conditions	202
5.6	An Example	209
5.7	Conclusion and Final Remark	209
6	Delayed Dynamic Equations with s^p-Terms	214
	<i>Mohssine Es-saiydy and Mohamed Zitane</i>	
6.1	Introduction	214
6.2	General Definitions	215
6.2.1	Doubly Weighted Pseudo Almost Periodic Functions on Time Scales	215
6.2.2	Stepanov-like Almost Periodic Functions	216
6.3	Doubly Weighted Stepanov-like Pseudo Almost Periodic Functions on Time Scales	217
6.4	Doubly Weighted Pseudo Almost Periodic Solution on Time Scales	223
6.5	Numerical Example	227
6.6	Conclusion	228

7	Integro-Dynamic System with Stepanov-like Coefficients	231
	<i>Soniya Dhama</i>	
7.1	Introduction	231
7.2	Preliminaries	232
7.3	Existence and Uniqueness	238
7.4	Stability of Solution	244
7.5	Example	245
7.6	Conclusion	247
8	Terminal Value Problems for Discrete Fractional Relaxation Equations	249
	<i>Sangeeta Dhawan and Jagan Mohan Jonnalagadda</i>	
8.1	Introduction	249
8.2	Preliminaries	250
8.3	Construction of the Green Functions	259
8.4	Existence of Solutions	262
8.5	Uniqueness of Solutions	264
8.6	Conclusion	267
9	Diamond-Alpha Hardy–Copson Type Dynamic Inequalities-I	271
	<i>Zeynep Kayar and Billur Kaymakçalan</i>	
9.1	Introduction	271
9.2	Literature Review	271
9.3	Preliminaries	274
9.4	Diamond-Alpha Hardy–Copson Type Dynamic Inequalities	275
9.5	Conclusion	285
10	Diamond-Alpha Hardy–Copson Type Dynamic Inequalities-II	290
	<i>Zeynep Kayar and Billur Kaymakçalan</i>	
10.1	Introduction	290
10.2	Literature Review	290
10.3	Preliminaries	296
10.4	Complementary Diamond-Alpha Hardy–Copson Type Dynamic Inequalities	297
10.5	Conclusion	305
11	Fishing Model with Feedback Control on Time Scales	310
	<i>Mahammad Khuddush</i>	
11.1	Introduction	310
11.2	Preliminaries	312
11.3	Persistence	313
11.4	Almost Periodic Solutions and Stability Analysis	315
11.5	Numerical Simulations	318
11.6	Conclusion and Future Work	320
12	Some Geometric Properties of Dual Space on Time Scales	325
	<i>Hatice Kusak Samanci</i>	
12.1	Introduction	325
12.2	The Dual Numbers, Dual Vectors and Dual Space on the Time Scales	326
	12.2.1 The Inner Product and Norm of the Dual Numbers on the Time Scale	327
	12.2.2 Module- $\mathbb{D}$ on the Time scales	328
12.3	Dual Directional Derivative on the Time Scale	330
12.4	Dual Vector Field on the Time Scales	335

12.5	The Taylor Expansion of Dual Analytic Function on the Time Scales . . .	336
12.6	Dual Derivative Mapping on the Time Scales	337
13	Serret–Frenet Frame of a Curve Parametrized by Time Scales: A Brief Survey	341
	<i>Hatice Kusak Samanci</i>	
13.1	Introduction	341
13.2	The Discrete Frenet Frame	342
13.3	The Frenet Frame of a Curve Parametrized by Time Scales	342
14	Applications of Time Scales in Nature: A Brief Survey	349
	<i>Jervin Zen Lobo, Svetlin G. Georgiev, and Sanket Tikare</i>	
14.1	Motivating Examples	349
14.1.1	El Niño Effect	349
14.1.2	Growth of a Plant Species	349
14.1.3	Tumor Growth Model on Time Scales	350
14.2	A COVID-19 Model on Time Scales	351
14.2.1	Introduction and Preliminaries	351
14.2.2	A Nonautonomous Model for COVID-19 on Time Scales	354
14.2.3	Endurance and Extinction of COVID-19 Infection	356
14.2.4	Illustrative Examples	364
14.3	Delayed Predator–Prey System on Time Scales	367
14.3.1	Introduction and Preliminaries	367
14.3.2	Existence of Periodic Solutions	369
14.3.3	An Illustration	373
14.4	Existence of Periodic Solutions for an Ecological Model on Time Scales . .	375
14.4.1	Introduction and Preliminaries	375
14.4.2	Existence Result	376
14.5	Summary	380
15	Applications of Time Scales in Economics: A Brief Survey	382
	<i>Jervin Zen Lobo, Svetlin G. Georgiev, and Sanket Tikare</i>	
15.1	HMMS Models on Time Scales	382
15.1.1	Introduction and Preliminaries	382
15.1.2	Statement of HMMS Model	384
15.1.3	Analysis of the HMMS Model	385
15.2	Dynamic Optimization Problems on Multiple Time Scales	387
15.2.1	Introduction and Preliminaries	387
15.2.2	Dynamic Maximization Utility Problem	388
15.2.3	Consumption Paths on Various Time Scales	389
15.3	Applications of Calculus of Variations in Behavioral Economics	392
15.3.1	Introduction	392
15.3.2	The Cake-Eating Problem	392
15.3.3	The Household Problem	400
15.4	Qualitative Analysis of a Solow Model on Time Scales	404
15.4.1	The Solow Model on Time Scales	404
15.4.2	Improved Solow Model on Time Scales	407
15.5	Summary	411
	Index	415
