Preface		v
Part 1	<i>An Introduction to Economics</i>	1
Chapter 1	Economics: Scarcity and Choice	3
	Scarcity, Choice, and Human Behavior	4
	The Production Possibilities Frontier	6
	Specialization, Exchange, and the PPF	12
	Markets and the Role of Price	14
	Profits, Incentives, and Entrepreneurs	15
	Middlemen and Mutually Advantageous Exchange	16
Appendix:	How to Read and Interpret Graphs	17
Chapter 2	An Introduction to the Economic Way of Thinking	25
	The Five Foundations of the Economic Way of Thinking	26
	The Scientific Method	30
	Positive and Normative Economics	31
	Logical Fallacies and Economic Reasoning	32
	The Role of Economists in Industry, Academe, and Government	34
Appendix:	The Economist's Toolbox — Marginal and Average Analysis	34
Chapter 3	How Economies Are Organized	45
	The Problem of Scarcity	46
	The Economic Goals of a Society	52
	Individual versus Social Choice:	
	Types of Economic Organization	57
Part 2	<i>Markets and the Mixed Economy</i>	63
Chapter 4	Demand and Supply in the Market Economy	65
	The Concept of Demand	67
	The Determinants of Demand	69
	Changes in Quantity demand versus Changes in Demand	73
	The Concept of Supply	75
	The Determinants of Supply	77
	Changes in Quantity Supplied versus Changes in Supply	80
		xi

	Market Equilibrium	81
	Price Floors and Price Ceilings	89
	The Power of Price	92
Chapter 5	Governments and Markets: The Mixed Economy	101
	The Market and Economic Efficiency	103
	Some Necessary Conditions for Market Efficiency	105
	Government as an Economic Force	109
	Government Policies and the Market	110
	The Potential for Government Inefficiencies	119
Chapter 6	An Overview of the Private Sector	127
	The Relationship Between Businesses and Households	129
	Households: One Half of the Private Sector	131
	Businesses: The Other Half of the Private Sector	136
	Concentration, Market Power, and Size	139
	Industrial Development Policy	141
Chapter 7	An Overview of the Private Sector	147
	The Public versus the Private Sector	148
	The Economic Functions of Government	150
	Conflicts Among Governmental Functions	153
	The Tools of Government Policy	154
	Government Resources	155
	Tax Shifting and Incidence	159
	Economic Effects of Taxes	162
	Are Taxes Fair?	163
	The Distribution of the Tax Burden	165
	Major United States Taxes	166
	The Total Tax Burden	173
	Deficits and the National Debt	174
Part 3	Macroeconomic Goals and Problems	181
Chapter 8	Gross National Product and Economic Growth	183
	A Study Guide to Macroeconomics	184
	The Circular Flow of Spending and Income	186
	National Income and Gross National Product	188
	The Financial, Government, and Foreign Sectors	189
	Measuring Gross National Product	192
	Real Gross National Product	198
	Gross National Product and the Quality of Life	200
	The Goal of Economic Growth	202
	Measuring Economic Growth	204
	Vested Interests and Economic Growth	207
	Industrial Development Policy	211
	Japan: A Textbook Case in Growth Policy	212
Appendix:	The National Income and Product Accounts	215
Chapter 9	Inflation and Unemployment: Problems, Policies, and Perspectives	223
	Progress Toward Macroeconomic Goals	225
	Economic Events in the 1960s	227

	The Phillip's Curve in the 1960s	228
	Economic Events in the 1970s	230
	Unemployment	237
	Inflation	244
Part 4	Macroeconomic Theory and Policy	257
Chapter 10	The Keynesian Model of the Economy	259
	Classical Economic Ideas	261
	The Keynesian Revolution	261
	Consumption Spending	266
	Investment Spending	274
	Net Export Spending	278
	Government Spending	279
	Equilibrium Income	280
	Inflationary and Recessionary Gaps	286
	The Spending Multiplier	287
	Simple Keynesian Theory in Perspective	293
Chapter 11	Aggregate Demand and Aggregate Supply	300
	The Changing Economy of the 1960s and 1970s	302
	The Evolution of Economic Theory	304
	Determinants of Aggregate Demand	306
	The Aggregate Demand Curve	309
	Shifts in Aggregate Demand	309
	Determinants of Aggregate Supply	310
	The Aggregate Supply Curve	313
	Shifts in Aggregate Supply	315
	AD-AS Equilibrium	316
	The 1960s: Demand — Pull Inflation	318
	The 1970s: Cost — Push Inflation	319
	Changing Economic Policies in the 1960s and 1970s	320
	The Goal of Increasing Aggregate Supply	325
	The Problem of Expectations	326
	A Look Ahead	327
Chapter 12	Fiscal Policy, Deficits, and Supply-side Economics	332
	An Introduction to Demand-side Fiscal Policy	334
	The Tools of Demand-side Fiscal Policies	335
	Supply-side Fiscal Policies	344
	The Federal Budget Deficit	352
Part 5	Monetary Institutions, Theory, and Policy	367
Chapter 13	Money and the Banking System	369
	What Is Money?	370
	The Functions of Money	372
	Definitions of the Money Supply	374
	Problems of the Financial Sector	378
	How Financial Intermediaries Work	380
	How Banks Work	382
	How Banks Create Money	387
	Deregulation of the U.S. Financial Sector	392

	Money and the Economy: Early Monetary Theory	394
	A Look Ahead	396
Chapter 14	The Federal Reserve, Credit Markets, and Monetary Policy	401
	The Federal Reserve System	402
	The Federal and the Banking System	408
	The Federal and the Treasury	409
	The Instruments of Monetary Policy	409
	Interest Rates and Credit Markets	416
	The Keynesian Theory of Money	427
	How Does Money Really Affect the Economy?	433
Chapter 15	Monetarist and Rational Expectations Theories	438
	An Overview of Monetary Theories	439
	Recent Monetary Policy	442
	The Development of Monetarist Theory	446
	Keynesian and Monetarist Comparisons	451
	The Monetarist Remedy	453
	Which Economic Theory Is Correct?	454
	The Role of Expectations in Macro Policy	456
	Macroeconomic Theories in Perspective	465
Part 6	Microeconomics	469
Chapter 16	Consumer Choice: From Where Does Demand Come?	471
	The Problem of Consumer Choice	472
	Total and Marginal Utility	473
	Deriving Demand Curves	478
	Consumer Choice in Action	481
	Price Elasticity of Demand	481
	Income Elasticity: Another Demand Measure	488
Appendix:	Indifference Curves and the Budget Constraint	489
Chapter 17	Supply and the Costs of Production	501
	Who Are the Producers and Why Do They Produce?	503
	The Production Function	504
	Profit-Maximizing Output	512
	Firm and Market Summary	513
	Economies and Diseconomies of Scale	518
Chapter 18	Perfect Competition in the Marketplace	524
	Competition as a Process	526
	Market and Firm Equilibrium	529
	Market Adjustment to Changing Demand	531
	Application: Price Ceilings	535
	Efficiency in Competition Markets	537
	A Final Word on Competition	542
Chapter 19	Monopoly: The Case of the One-Firm Market	547
	What Is a Monopoly?	549
	Monopoly Demand and Revenue	551
	Monopoly versus Perfect Competition	556
	Antitrust Policies	557

	The Debate Over Monopolies	561
Chapter 20	Monopolistic Competition and Oligopoly	567
	Monopolistic Competition	569
	Price and Output Decisions: Economic Theory versus Mark-up Pricing	572
	Is Product Differentiation Desirable?	577
	Oligopoly	578
	Oligopoly Behavior: The Cartel Option	583
	Implicit Collusion: Leaders and Followers	585
	Competition and Kinked Demand Curves	587
	What to Do with Oligopolies	589
Part 7	Factor Markets and Income Distribution	595
Chapter 21	Resource Markets: Demand and Supply at Work	596
	What Resource Markets Do	597
	The Derived Demand for Resources	599
	Monopoly Resource Demand	607
	Monopsony: The One-Buyer Market	609
	Resource Supply	612
	Combining Inputs: Optimal Resource Use	614
Chapter 22	Workers, Wages, and Jobs	619
	Labor Supply in the Economy	621
	Unions in the United States	627
	The Minimum Wage Controversy	633
	Planning for Future Labor Market Conditions	638
Chapter 23	Profit, Interest, and Rent	644
	Economic Profit	645
	Interest: The Price of Loans	650
	Economic Rent	658
Chapter 24	Poverty and Income Distribution	666
	Income Distribution in the United States	668
	Trends in U.S. Income	671
	Antipoverty Policies	676
	What Does the Future Hold?	685
Part 8	Private versus Public Choice	689
Chapter 25	Externalities and Public Goods: Private Versus Public Choice	691
	Market Successes and Market Failures	693
	Externalities	693
	Communal Goods	703
	Public Goods	704
	Private Choice versus Public Choice	705
Chapter 26	Energy Economics	715
	Energy Supply: Where Does Energy Come From?	717
	Energy Demand: Where Does Energy Go?	719
	Demand and Supply Interdependence	720

	Roots of the Energy Crisis	720
	A Short History of OPEC	723
	Is the Energy Crisis Over?	725
	The Consequences of Higher Energy Costs	725
	Energy Solutions: Increasing Supply	727
	Energy Solutions: Lower Energy Demand	728
	Energy Policy: Prices or Government Rules	730
	Energy versus the Environment	730
Part 9	<i>International Economics and Comparative Economic Systems</i>	735
Chapter 27	International Trade	737
	Why do Nations Trade?	739
	Tariffs and Quotas	744
Chapter 28	International Finance	756
	International Payments	758
	Financing a Balance of Payments Deficit?	758
	The Balance of Trade	759
	Is a Payments Deficit Bad?	761
	The IMF and the World Bank	761
	The Mysterious Exchange Rate	762
	Prices and Exchange Rates	762
	The Foreign Exchange Market	762
	The Games Exchange Rates Play	765
	Here Is Demand, Where Is Supply?	765
	Exchange Market Equilibrium	766
	The Foreign Exchange Market at Work	768
	Fixed Exchange Rates	773
Chapter 29	International Economic Policy	780
	How Exchange Rates Affect the Economy	781
	Interest Rates, Exchange Rates, and International Credit Movements	784
	Economic Policy with Flexible Exchange Rates	785
	Economic Policy with Fixed Exchange Rates	788
	Domestic and International Economic Goals	791
	The Trade Deficit: Policy Options	793
	Lessons for Economic Policy	795
Chapter 30	Comparative Economic Systems	801
	Three Choices an Economic System Must Make	803
	Evaluating Alternative Economic Systems	805
	Centralized or Decentralized Choice	805
	Property Rights: Private Versus Public Ownership	806
	The Range of Economic Systems	807
	The Economy of the Soviet Union	811
	Changes in the Soviet System?	814
	Yugoslavia: The Worker-Managed Firm	815
	The Convergence Hypothesis	817
Glossary		823
Index		835
