

# CONTENTS

## PREFACE xix

## PART I INTRODUCTION 1

### 1. THINKING LIKE AN ECONOMIST 3

Scarcity and Choice 3

The Cost-Benefit Approach to Decisions 4

EXAMPLE 1.1 *Should I turn down my stereo?* 5

A Note on the Role of Economic Theory 6

Some Common Pitfalls in Decision Making 7

EXAMPLE 1.2 *Should I go skiing or work as a research assistant?* 7

EXAMPLE 1.3 *Should I go skiing or scrape plates?* 8

EXAMPLE 1.4 *After high school, should I work first or go to college first?* 9

EXAMPLE 1.5 *Is it fair to charge interest when lending a friend some money?* 10

EXAMPLE 1.6 *Why do banks pay interest in the first place?* 10

EXAMPLE 1.7 *Should I drive to Boston or take the bus?* 12

EXAMPLE 1.8 *The Pizza Experiment: how does an “all-you-can-eat” offer affect consumption?* 13

EXAMPLE 1.9 *Which is more important in a rental car for an energy-conservation-minded consumer: better gas mileage or a cheaper rental rate?* 14

The Invisible Hand 15

EXAMPLE 1.10 *Should I burn my leaves or haul them into the woods?* 16

Rationality and Self-Interest 17

EXAMPLE 1.11 *Should I vote in the next presidential election?* 18

Would Parents Want Their Daughter or Son to Marry *Homo Economicus*? 19

The Economic Naturalist 20

EXAMPLE 1.12 *Why is airline food so bad?* 20

EXAMPLE 1.13 *Why do manual transmissions have five forward speeds, automatics only four?* 21

EXAMPLE 1.14 *Why have paper towels replaced hot-air hand dryers in public restrooms?* 22

Positive Questions and Normative Questions 23

## Microeconomics and Macroeconomics 24

Summary 24

Questions for Review 25

Problems 25

Answers to In-Chapter Exercises 27

**2. SUPPLY AND DEMAND 28**

Chapter Preview 29

Supply and Demand Analysis 29

Equilibrium Quantity and Price 32

Some Welfare Properties of Equilibrium 35

Free Markets and the Poor 36

EXAMPLE 2.1

*Is denied boarding compensation unfair to low-income passengers? 37*

EXAMPLE 2.2

*Rent controls 38*

The Rationing and Allocative Functions of Prices 40

Determinants of Supply and Demand 41

Predicting and Explaining Changes in Price and Quantity 44

EXAMPLE 2.3

*Why do the prices of apples go down during the months of heaviest consumption, while the prices of beachfront cottages go up? 44*

Price Supports 44

EXAMPLE 2.4

*How does a price support program in the soybean market affect the price and quantity of beef? 46*

The Algebra of Supply and Demand 46

Taxes 47

Summary 51

Questions for Review 53

Problems 53

Answers to In-Chapter Exercises 55

**PART II THE THEORY OF CONSUMER BEHAVIOR 57****3. RATIONAL CONSUMER CHOICE 59**

Chapter Preview 59

The Opportunity Set or Budget Constraint 60

EXAMPLE 3.1

*Quantity discount gives rise to a kinked budget constraint: graphing the budget constraint for a consumer's electrical power 66*

EXAMPLE 3.2

*Budget constraints following theft of gasoline or loss of cash: should Gowdy buy more gas? 67*

Consumer Preferences 68

EXAMPLE 3.3

*Graphing indifference curves for perfect substitutes: Jolt Cola vs. Coca-Cola 74*

EXAMPLE 3.4

*Graphing indifference curves for perfect complements: skis and bindings 75*

EXAMPLE 3.5	<i>A neutral good: Eve likes apples but doesn't care about pears</i>	77
EXAMPLE 3.6	<i>When more of a good is worse: food vs. cigarette smoke</i>	78
	The Best Feasible Bundle	79
EXAMPLE 3.7	<i>Equilibrium with perfect substitutes: Jolt Cola vs. Coca-Cola</i>	83
	An Application of the Rational Choice Model	83
EXAMPLE 3.8	<i>Is it better to give poor people cash or food stamps?</i>	84
	Summary	87
	<b>APPENDIX: The Utility Function Approach to the Consumer Budgeting Problem</b>	88
	Cardinal versus Ordinal Utility	88
	Generating Indifference Curves Algebraically	90
	Using Calculus to Maximize Utility	91
	Questions for Review	96
	Problems	96
	Answers to In-Chapter Exercises	99
	<b>4. INDIVIDUAL DEMAND</b>	101
	Chapter Preview	101
	Effects of Changes in Price	102
EXAMPLE 4.1	<i>Graphing price-consumption curves and demand curves for perfect substitutes: rice vs. wheat</i>	104
	The Effects of Changes in Income	105
EXAMPLE 4.2	<i>Income and substitution effects for perfect complements: skis and bindings</i>	110
	Consumer Responsiveness to Changes in Price	112
	The Income-Compensated Demand Curve	115
	Consumer Surplus	117
EXAMPLE 4.3	<i>What is the loss in consumer surplus from an oil price increase?</i>	118
EXAMPLE 4.4	<i>Consumer surplus from eating at Pizza Hut</i>	120
	Overall Welfare Comparisons	122
EXAMPLE 4.5	<i>Price changes: was Jones better off this year or last?</i>	122
	Summary	122
	<b>APPENDIX: Cost-of-Living Indexes</b>	124
EXAMPLE A.4.1	<i>Cost of living changes with perfect substitutes: Smith's consumption in two different years</i>	128
	Questions for Review	129
	Problems	130
	Answers to In-Chapter Exercises	131

## 5. MARKET DEMAND 134

Chapter Preview 134

Aggregating Individual Demand Curves 135

EXAMPLE 5.1

*The market demand curve: beech saplings in a Vermont town 136*

Price Elasticity of Demand 136

EXAMPLE 5.2

*Price elasticity of demand: should the transit system raise or lower bus fares? 147*

APPLICATION

*The MARTA Fare Increase 147*

Determinants of Price Elasticity of Demand 148

APPLICATION

*The Price Elasticity of Demand for Alcohol 150*

EXAMPLE 5.3

*Why do National Football League games cost so much more than major league baseball games? 151*

The Dependence of Market Demand on Income 152

EXAMPLE 5.4

*How does income affect the market demand curve for food? 152*

APPLICATION

*Forecasting Economic Trends 155*

Cross-Price Elasticities of Demand 156

EXAMPLE 5.5

*Cross-price elasticity: beef vs. chicken at your neighborhood supermarket 157*

Summary 158

*APPENDIX: The Constant Elasticity Demand Curve 160*

Questions for Review 162

Problems 162

Answers to In-Chapter Exercises 164

## 6. INTERTEMPORAL CHOICE AND CHOICE UNDER UNCERTAINTY (SUPPLEMENTARY) 165

Chapter Preview 165

The Intertemporal Choice Model 165

EXAMPLE 6.1

*Will an increase in the interest rate cause you to save more? 172*

APPLICATION

*The Permanent Income and Life-Cycle Hypotheses 172*

Choice Under Uncertainty 179

EXAMPLE 6.2

*Maximizing expected utility: Smith and gambling 181*

EXAMPLE 6.3

*Will you always accept a favorable bet? 183*

EXAMPLE 6.4

*Which of two colleges should you attend? 186*

APPLICATION

*Always Self-Insure Against Small Losses 193*

Summary 194

Problems 196

Answers to In-Chapter Exercises 198

## 7. BEYOND SELF-INTEREST? (SUPPLEMENTARY) 199

The Commitment Problem 200

The Reward Mechanism 202

	The Problem of Mimicry	207
	Illustration: The Cheating Problem	208
	A Simple Thought Experiment	214
	Tastes Not Only <i>Can</i> Differ; They <i>Must</i> Differ	215
APPLICATION	<i>Altruistic Preferences</i>	216
EXAMPLE 7.1	<i>A utility-maximizing altruist: should Smith give some of his wealth to Jones?</i>	217
APPLICATION	<i>Concerns About Fairness</i>	218
EXAMPLE 7.2	<i>Will Hatfield and McCoy work together?</i>	221
	The Importance of Tastes	221
	Summary	222
	Questions for Review	223
	Problems	223
	Answers to In-Chapter Exercises	224
	<b>8. COGNITIVE LIMITATIONS AND CONSUMER BEHAVIOR</b>	
	(SUPPLEMENTARY)	226
	Chapter Preview	227
	Bounded Rationality	227
	The Asymmetric Value Function	229
	Sunk Costs	231
	Out-of-Pocket Costs Versus Opportunity Costs	232
	Hedonic Framing	233
	Choice Under Uncertainty	236
	Judgmental Heuristics and Biases	239
	The Psychophysics of Perception	244
	The Difficulty of Actually Deciding	244
	Summary	246
	Questions for Review	248
	Problems	249
	Answer to In-Chapter Exercise	250
<b>PART III</b>	<b>THE THEORY OF THE FIRM AND</b>	
	<b>MARKET STRUCTURE</b>	<b>251</b>
	<b>9. PRODUCTION</b>	<b>253</b>
	Chapter Preview	253
	The Input-Output Relationship, or Production Function	254
	Production with One Variable Input	257
	The Relationships Between Total, Marginal, and Average Product Curves	262
	The Practical Significance of the Average-Marginal Distinction	264

<b>EXAMPLE 9.1</b>	<i>Call's and McRae's ranch (I): how many cows should graze in each pasture?</i> 265
<b>EXAMPLE 9.2</b>	<i>Call's and McRae's ranch (II): now how many cows should graze in each pasture?</i> 266
<b>EXAMPLE 9.3</b>	<i>What is the optimal amount of time to spend on each exam question?</i> 267
	<b>Production with Two Variable Inputs</b> 267
	<b>Returns to Scale</b> 271
	<b>Summary</b> 274
	 <b>APPENDIX: Mathematical Extensions of Production Theory</b> 275
<b>APPLICATION</b>	<i>The Average-Marginal Distinction</i> 275
<b>EXAMPLE A.9.1</b>	<i>Is the best football coach the one who always chooses the play that will gain the most yardage?</i> 278
	<i>Isoquant Maps and the Production Mountain</i> 279
	<i>Some Examples of Production Functions</i> 280
	<i>A Mathematical Definition of Returns to Scale</i> 282
	 <b>Questions for Review</b> 284
	<b>Problems</b> 284
	<b>Answers to In-Chapter Exercises</b> 286
	 <b>10. COSTS</b> 287
	<b>Chapter Preview</b> 287
	<b>Costs in the Short Run</b> 288
<b>EXAMPLE 10.1</b>	<i>Graphing the total, variable, and fixed cost curves</i> 294
<b>EXAMPLE 10.2</b>	<i>Graphing the average and marginal cost curves</i> 301
	<b>Allocating Production Between Two Processes</b> 301
<b>EXAMPLE 10.3</b>	<i>Using marginal and average total cost curves: finding the least costly production allocation</i> 302
	<b>The Relationship Between MP, AP, MC, and AVC</b> 303
	<b>Costs in the Long Run</b> 304
<b>EXAMPLE 10.4</b>	<i>Why is gravel made by hand in Nepal, but by machine in the U.S.?</i> 307
<b>APPLICATION</b>	<i>Unions and Minimum Wages</i> 308
	<b>Long-Run Costs and the Structure of Industry</b> 315
	<b>The Relationship Between Long-Run and Short-Run Cost Curves</b> 317
	<b>Summary</b> 321
	 <b>APPENDIX: Mathematical Extensions of the Theory of Costs</b> 322
<b>EXAMPLE A.10.1</b>	<i>Minimizing costs for a specific production function</i> 323
	<b>Questions for Review</b> 324
	<b>Problems</b> 324
	<b>Answers to In-Chapter Exercises</b> 326

**11. PERFECT COMPETITION 328**

Chapter Preview 328

The Goal of Profit Maximization 329

**EXAMPLE 11.1***Should the owner of Valdosta, Georgia's miniature golf course move the operation to Manhattan? 330*

The Four Conditions for Perfect Competition 332

The Short-Run Condition for Profit Maximization 334

Short-Run Competitive Industry Supply 339

Short-Run Competitive Equilibrium 340

The Efficiency of Short-Run Competitive Equilibrium 342

Producer Surplus 343

**EXAMPLE 11.2***Should the legislature ban fireworks? 346*

Adjustments in the Long Run 347

The Invisible Hand 350

**APPLICATION***The Cost of Extraordinary Inputs 352*

The Long-Run Competitive Industry Supply Curve 354

**EXAMPLE 11.3***Why do color photographs cost less than black and white photographs? 358*

The Elasticity of Supply 358

Applying the Competitive Model 360

Summary 366

Questions for Review 367

Problems 367

Answers to In-Chapter Exercises 369

**12. MONOPOLY 370**

Chapter Preview 370

Defining Monopoly 371

Four Sources of Monopoly 372

The Profit-Maximizing Monopolist 375

**EXAMPLE 12.1***Finding a marginal revenue curve for a given demand curve 383***EXAMPLE 12.2***What is a monopolist's profit-maximizing price, and how much economic profit is earned? 384*

A Monopolist Has No Supply Curve 387

Adjustments in the Long Run 388

The Output-Maximizing Monopolist 389

Multiplant Monopoly 390

Price Discrimination 391

The Efficiency Loss from Monopoly 397

Public Policy Toward Natural Monopoly 399

Summary 409

Questions for Review	410
Problems	410
Answers to In-Chapter Exercises	412

### 13. MONOPOLISTIC COMPETITION 414

Chapter Preview	414
The Chamberlin Model	415
The Spatial Interpretation of Monopolistic Competition	421

#### EXAMPLE 13.1

*Why are there so many fewer grocery stores in most cities now than there were in 1930? Why do residential neighborhoods in New York City have more grocery stores than residential neighborhoods in Los Angeles?* 427

Paying for Variety	428
Consumer Preferences and Advertising	432
Summary	434

### APPENDIX: A Simple Model of Spatial Competition 435

Questions for Review	440
Problems	441
Answers to In-Chapter Exercises	442

### 14. OLIGOPOLY 443

Chapter Preview	444
The Cournot Model	444
Deriving the reaction functions for Cournot duopolists	447
The Bertrand Model	448
The Stackelberg Model	449
Collusion and the Theory of Games	452

#### EXAMPLE 14.1

*Deriving the reaction functions for Cournot duopolists* 447

#### APPLICATION

*The Advertising Arms Race in the Cigarette Industry* 455

#### APPLICATION

*Strategic Entry Deterrence* 462

Contestable Markets	464
Competition When There Are Increasing Returns to Scale	465
The Kinked-Demand-Curve Oligopoly Model	468
Summary	469
Questions for Review	470
Problems	471
Answers to In-Chapter Exercises	472

## PART IV FACTOR MARKETS 475

### 15. LABOR 477

Chapter Preview	478
-----------------	-----

	The Perfectly Competitive Firm's Short-Run Demand for Labor	478
	The Perfectly Competitive Firm's Long-Run Demand for Labor	480
	The Market Demand Curve for Labor	480
	An Imperfect Competitor's Demand for Labor	482
	The Supply of Labor	483
EXAMPLE 15.1	<i>The labor supply curve for someone with a target level of income</i>	486
	Is Leisure a Giffen Good?	487
	The Noneconomist's Reaction to the Labor Supply Model	487
	The Market Supply Curve	488
EXAMPLE 15.2	<i>How do rising MBA enrollments affect the salaries and employment of economists in liberal arts colleges?</i>	489
	Compensating Wage Differentials: The Case of Safety	490
	Monopsony	495
	Safety Choices and Relative Income	500
	Discrimination in the Labor Market	502
	Labor Unions	506
	Minimum Wage Laws	508
	The Internal Wage Structure	510
	The Economics of Superstars	514
	Summary	515
	Questions for Review	517
	Problems	517
	Answers to In-Chapter Exercises	519
	<b>16. THE ECONOMICS OF INFORMATION (SUPPLEMENTARY)</b>	<b>521</b>
	Chapter Preview	521
	Communication Between Potential Adversaries	522
	The Costly-to-Fake Principle	523
	The Full-Disclosure Principle	527
EXAMPLE 16.1	<i>The Lemons Principle: in a certain Eastern bloc country, what fraction of personal computers is defective?</i>	531
	Choosing a Relationship	532
	Adverse Selection	532
	Conspicuous Consumption as Ability Signaling	534
	Statistical Discrimination	535
	The Search for High Wages and Low Prices	540
EXAMPLE 16.2	<i>Search costs and finding the lowest price</i>	543
	The Winner's Curse	544
EXAMPLE 16.3	<i>The Winner's Curse: how much should you bid at an auction?</i>	546
	Summary	547
	Questions for Review	549
	Problems	549
	Answers to In-Chapter Exercises	551

**17. CAPITAL (SUPPLEMENTARY) 552**

Chapter Preview 552

Financial Capital and Real Capital 553

The Demand for Real Capital 553

The Relationship Between the Rental Rate and the Interest Rate 554

The Criterion for Buying a Capital Good 555

Interest Rate Determination 556

Real Versus Nominal Interest Rates 557

The Market for Stocks and Bonds 558

Tax Policy and the Capital Market 565

Economic Rent 567

Peak-Load Pricing 568

Natural Resources as Inputs in Production 570

Summary 574

***APPENDIX: A More Detailed Look at Exhaustible Resource Allocation 575*****EXAMPLE A.17.1***How would a breakthrough in superconductivity and a subsequent fall in the price of solar energy affect the time path of oil prices, and the point at which we switch from oil to solar power? 579*

Questions for Review 580

Problems 580

Answers to In-Chapter Exercises 581

**PART V GENERAL EQUILIBRIUM AND WELFARE 583****18. GENERAL EQUILIBRIUM AND MARKET EFFICIENCY 585**

Chapter Preview 585

A Simple Exchange Economy 586

Efficiency in Production 595

Efficiency in Product Mix 597

Gains from International Trade 601

**EXAMPLE 18.1***As president of a small island nation that has never engaged in free trade, should you retain a closed economy? 602*

Taxes in General Equilibrium 603

Other Sources of Inefficiency 605

Summary 607

Questions for Review 608

Problems 608

Answers to In-Chapter Exercises 610

**19. EXTERNALITIES, PROPERTY RIGHTS, AND THE COASE THEOREM 612**

Chapter Preview 612

The Reciprocal Nature of Externalities 613

*EXAMPLE 19.1 The confectioner and the doctor (I): making the confectioner liable for noise damage 614**EXAMPLE 19.2 The confectioner and the doctor (II): changing costs and benefits 615**EXAMPLE 19.3 The confectioner and the doctor (III): installing a soundproofing device 615**EXAMPLE 19.4 The confectioner and the doctor (IV): should the doctor rearrange his office? 616**EXAMPLE 19.5 The confectioner and the doctor (V): negotiating an agreement over noise when both parties can make changes 618**EXAMPLE 19.6 The confectioner and the doctor (VI): negotiating an agreement if only the doctor can make changes 619*

Property Rights 620

*EXAMPLE 19.7 If village residents make their investment decisions independently, how many of their steers will graze on the commons? 624*

Externalities, Efficiency, and Free Speech 626

Smoking Rules, Public and Private 627

*EXAMPLE 19.8 Should smoker Smith live with nonsmoker Jones, or find a separate apartment? 628*

Positive Externalities 629

Positional Externalities 629

Taxing Externalities 633

*EXAMPLE 19.9 The confectioner and the doctor (VII): taxing the confectioner for noise 634**EXAMPLE 19.10 What is the best way for the city council to reduce air pollution? 635*

Summary 638

Questions for Review 639

Problems 639

Answers to In-Chapter Exercises 644

**20. GOVERNMENT (SUPPLEMENTARY) 645**

Chapter Preview 646

Public Goods 646

*EXAMPLE 20.1 Should the network broadcast Geraldo Rivera or Masterpiece Theater? 652*

Public Choice 655

*EXAMPLE 20.2 If two people, one rich and one poor, have opposite views on a proposed public project, on what basis would each like to see the decision made, cost-benefit analysis or majority rule? 659**EXAMPLE 20.3 Which company will win the Cedar Rapids cable television franchise? 662*

Income Distribution	662
Summary	673
Questions for Review	675
Problems	675
Answers to In-Chapter Exercises	677

INDEX	679
