

TABLE OF CONTENTS

BEFORE PHOTOGRAPHY

EFFORTS TO CREATE AND CAPTURE AN IMAGE (BEFORE 1839)	13
Efforts to create an optical image of reality	13
Attempts to permanently capture an image of reality	14
Miniatures, silhouettes, wax portraits	14

A NEW MEDIUM: ACCURATE, SHARP AND DETAILED

DAGUERREOTYPE (1839 TO THE 1850s)	17
The daguerreotype's global expansion	17
Use in portraiture	18
Perfecting the process	18
Daguerreotype cameras and supplies	20
The Petzval lens	22
Plate preparation	23
Image development after exposure	23
Characteristics of the daguerreotype image	24
Housing for the daguerreotype plate	24
European-style housing	25
American-style housing	32

THE DAGUERREOTYPE'S COMPETITORS: THE FIRST NEGATIVE-POSITIVE PROCESS

CALOTYPE AND SALTED PAPER (1841 TO THE 1850s)	35
Paper negative	35
Positives from calotype negatives	40
Salted papers	40

THE GLASS NEGATIVE: SHARP, CLEAR AND TRANSPARENT

COLLODION WET PLATE PROCESS (1851 TO THE 1890s)	45
Glass plates hand-poured with collodion	45
Copying negatives into positives (up to the end of the 19 th century)	50
Albumen papers	51
Collodion (celloidin) paper	53
Gelatin printing-out paper	54

Ambrotype and tintype – direct collodion positive techniques	63
Ambrotype.....	63
Tintype (ferrotype)	69

PROCESSES FOR PHOTOGRAPHERS WITH ARTISTIC AMBITIONS

PIGMENT-BASED PROCESSES (1860s TO 1930s).....	77
Pigment print	78
Oil print	82
Bromoil print	84
Gum bichromate.....	86
Platinotype	88

CAPTURING MOVEMENT WITH PHOTOGRAPHY

SEQUENTIAL IMAGES OF MOTION AND CHRONOPHOTOGRAPHY (1874 TO THE LATE 19TH CENTURY)	91
Photographing objects in motion	91
Eadweard Muybridge and sequential photography (1870s to 1890s).....	92
É. J. Marey and chronophotography (1880s to 1890s)	94
Fixed-plate chronophotography	95
Chronophotography on a moving film strip	96

PHOTOGRAPHY FOR THE MASSES

PHOTOGRAPHY ON DRY GELATIN PLATES (1871 TO 1940s)	103
Equipment for dry gelatin plate photography	106
Plate box cameras.....	107
Magazine cameras and detective cameras.....	109
Studio cameras	111
Field cameras from the late 19 th century	115
Design features of cameras from different European countries	115
Field cameras of the French type	116
Field cameras of the German type.....	117
Field cameras of the English type.....	119
Folding plate cameras from the late 19 th century	121
Folding-bed plate cameras	121
Strut-folding plate cameras.....	124
Technical plate cameras.....	127
Plate single-lens reflex cameras (SLRs)	128
Stereoscopic cameras	130
Stereoscopic viewers	135

Disguised and concealed plate cameras	140
Camera elements and accessories	142
Lenses	142
Shutters.....	144
Viewfinders	146
Exposure setting aids	147
Copying negatives into positives in the 20 th century.....	150
Collodion and gelatin printing-out papers (POPs).....	150
Gelatin developing-out papers (DOPs)	150
The photographic darkroom	151
Safe lighting of the photographic darkroom.....	151
Tools for developing plates.....	152
Preparation of processing baths.....	153
Retouching negatives	154
Copying negatives into positives.....	154
Daylight enlargers	155
Electric enlargers.....	155
Measuring exposure times for enlarging	156
Influencing the contrast of a positive.....	157
Drying positives in an electric print dryer	158

PHOTOGRAPHY FOR EVERYONE

PHOTOGRAPHIC FILM (1889 TO DATE).....	161
First roll films and film cameras.....	161
Celluloid film and film with a paper cover strip.....	163
Roll-film cameras	164
Roll-film box cameras	164
Panoramic cameras	168
Bellows cameras for roll film	171
Single-lens reflex cameras (SLRs) for roll film (up to the 1940s)	174
Twin-lens reflex cameras (TLRs) for roll film (up to the 1940s).....	176
Cameras for 35 mm film up to 1925 (Germany and France)	177
Leica and Contax cameras (Germany, up to the 1940s)	180
Leica cameras.....	180
Contax cameras	185
Copies of Leica and Contax cameras manufactured in the USSR.....	186
New elements in photographic techniques (1930s to 1940s)	188
Photoelectric exposure meters	188
Anti-reflective coatings on photographic lenses	190

35 mm film cameras with direct optical viewfinders (1940s to 1960s)	191
Folding bellows cameras for 35 mm film.....	191
Fixed body direct optical viewfinder cameras for 35 mm film.....	192
Single-lens reflex cameras (SLRs) for roll film (up to the 1950s).....	194
Fixed body direct optical viewfinder cameras for 35 mm film (1950s to 1990s)	197
Leica cameras in reportage photography	197
Compact 35 mm film cameras with automatic systems (1960s to 1990s).....	200
Improved twin-lens reflex cameras (TLRs) (1950s to 1980s)	202
Single-lens reflex cameras (SLRs) for roll film (1950s to 1990s)	204
Medium-format single-lens reflex cameras (SLRs) (1970s to 1990s)	208

THE EUROPEAN PHOTOGRAPHIC EQUIPMENT POWERHOUSE

PHOTOGRAPHIC TECHNOLOGY IN GERMANY (UP TO THE MID-20TH CENTURY).....	211
Up to 1918	211
1918–1940.....	214
Folding bellows cameras	214
Technical cameras	216
Twin-lens reflex cameras.....	217
Reportage photography cameras	219
Single-lens reflex (SLRs) cameras.....	219
Cameras for 35 mm film	221
1940s to 1950s	223
Improvements to reflex cameras for 35 mm film	224
The Leica M system	225
