9 780195 070118
ISBN 0-19-507011-9

Contents

1. Review of Chemical Principles	3
2. Soil Solids: Composition and Structure	31
3. Ion Exchange	63
4. Chemisorption and Precipitation of Inorganic Ions	121
5. Soil Acidity	169
6. Mineral Weathering and Formation	207
7. Oxidation-Reduction Reactions	240
8. Salt-Affected and Swelling Soils	273
9. Trace and Toxic Elements in Soils	308
10. Organic Pollutants in Soils	342
Useful Constants and Unit Conversions in Chemistry	395
Index	397
