Part I Understanding Handedness: Theory and Research

1	The Emergence of Handedness	3
1.1	Introduction	3
1.2	The Evolution of Handedness	4
1.2.1	Handedness as an Inherited Evolutionary Trait	4
1.2.2	Language and Gestures as Drivers for Hemispheric Lateralisation	4
1.2.3	Task Demand, Complexity and Efficiency as Influencing Factors	4
1.2.4	The Emergence of Tool Use as a Driver for Handedness Ontogenesis	5
1.3	Development of Individual Handedness	5
1.3.1	Cascade Theory on Handedness Development	6
1.3.2	Developmental Phases of Handedness	7
1.3.3	Early Handedness Development and Related Processes	7
1.3.4	Influencing Factors on Early Handedness Development	9
1.3.5	Handedness Groups in Infants	9
1.4	Describing Handedness	10
1.4.1	Definition of Handedness	10
1.4.2	Classification of Handedness	12
1.4.3	Distribution of Handedness	13
1.5	Concluding Remarks	14
	References	15
2	Neural Asymmetries	19
2.1	Introduction	19
2.2	Structural Asymmetries	20
2.2.1	Primary Motor Cortex	20
2.2.2	Corpus Callosum	22
2.2.3	Cerebellum	24
2.2.4	Corticospinal Tract	24
2.3	Functional Asymmetries	25
2.3.1	Footedness	25
2.3.2	Sensory Dominance	26

2.3.3	Language and Handedness.....	27
2.4	Manual Asymmetries.....	27
2.4.1	Crossing the Body Midline.....	28
2.4.2	Bimanual Cooperation and Coordination.....	30
2.5	Concluding Remarks.....	33
	References.....	34
3	Co-determinants of Handedness.....	41
3.1	Introduction.....	41
3.2	Inheritance of Handedness and Motor Abilities.....	42
3.2.1	Inheritance of Handedness.....	42
3.2.2	Inheritance of Motor Abilities.....	43
3.3	Development of Motor Abilities.....	44
3.3.1	Foundations for Motor Skills.....	44
3.3.2	Motor Planning.....	44
3.4	Environmental Influences.....	45
3.4.1	Pre-, Peri- and Postnatal Circumstances.....	45
3.4.2	Sociocultural and Physical Influences with a Rightward Bias.....	47
3.5	Pathological Handedness.....	48
3.6	Developmental Delay and Disorders.....	50
3.6.1	Motor-Based Developmental Disorders.....	51
3.6.2	Sensory-Motor Abilities and Handedness.....	52
3.6.3	Crossing the Body Midline Avoidance.....	52
3.7	The Essence of Research Perspectives.....	53
3.7.1	Summarising Influencing Factors on Handedness Formation.....	53
3.7.2	Distinguishing Between Developmental Delay and Pathological Handedness.....	53
3.8	Proposing a Model of Co-determinants of Handedness.....	54
3.9	Concluding Remarks.....	55
	References.....	55
4	Left Handedness.....	61
4.1	Introduction.....	61
4.2	Familial Left Handedness.....	62
4.3	Typical Differences Between Left Handers and Right Handers.....	62
4.4	Pathological Left Handedness.....	65
4.4.1	Research on Pathological Left Handedness and Disorders.....	65
4.5	Converted Left Handers.....	66
4.5.1	Influencing Factors on Handedness Conversion.....	66
4.5.2	Comparing Converted Left Handers to Non-converted Left Handers.....	68
4.5.3	Potential Switching Repercussions.....	68
4.5.4	Comparing Converted Left Handers to Familial Left Handers and Right Handers.....	71
4.5.5	Reverting Switched Left Handedness.....	72

4.6	Identifying Subgroups of Left Handedness	74
4.7	Concluding Remarks	76
	References	76
5	Mixed Handedness	81
5.1	Introduction	81
5.2	Contextualising Mixed Handedness.	82
5.2.1	Defining Mixed Handedness and Related Terms	82
5.2.2	Reasons for Normal Handedness Variability	82
5.3	Ambidexterity	83
5.4	Analysing Research Methodology on Mixed-Handedness Studies	84
5.4.1	Criteria for Analysing Research Methodologies on Mixed Handedness	85
5.4.2	Results of Pilot Study Analysing Methodology of Studies on Mixed Handedness.	86
5.5	Research Findings on Mixed Handedness	88
5.5.1	Mixed Handedness as an “Advantage”	88
5.5.2	Mixed Handedness as a “Disadvantage”	89
5.5.3	Dealing with Contradictory Results of Studies on Mixed Handedness	91
5.6	Proposing an Explanatory Model on Mixed Handedness (D-CC Hypothesis)	92
5.7	Compiling Criteria for Differentiating Mixed Handedness . . .	94
5.8	Concluding Remarks	96
	References	97

Synopsis of Part I

Part II Assessment and Analysis: Research and Practice

6	Assessing Handedness.	105
6.1	Introduction	105
6.2	Assessing Handedness: Preference and Proficiency	106
6.2.1	Assessing Hand Preference	106
6.2.2	Assessing Hand Proficiency.	109
6.3	Measuring Handedness	110
6.3.1	Measuring Handedness on a Continuum	110
6.3.2	Measuring Handedness According to Categories	111
6.4	Overview of Commonly Used Tests and Procedures.	111
6.5	Factors Influencing Handedness Assessment.	117
6.5.1	Motor Abilities Influencing Handedness and Its Assessment.	117
6.5.2	Task Characteristics Influencing Handedness Assessments	118
6.5.3	Specific Factors Influencing Handedness Assessment Outcomes	119
6.6	A Multidimensional Approach to Assessing Handedness	120

6.6.1 Learning Lessons from the Literature 121

6.6.2 Summarising Recommendations
from the Literature 121

6.6.3 Formulating Guidelines for a Practice-Based
Handedness Assessment. 122

6.7 Concluding Remarks 123

References. 123

**7 Constructing a Multidimensional Assessment:
The Handedness Profile 2003. 127**

7.1 Introduction 127

7.2 Research Studies Developing a Multidimensional
Assessment. 127

7.2.1 Study I: Assessment of the Extent of Handedness
in 5-Year-Old Preschool Children 128

7.2.2 Study II: Comparing Handedness Variability
in Different Age Groups 129

7.2.3 Study III: Comparing Existing and Modified
Tests for Typically Developed 6-Year-Olds 132

7.2.4 Study IV: Constructing a Normative Basis
for the Handedness Profile. 134

7.2.5 Study V: Assessing Children with Unestablished
Handedness 137

7.3 Validating the Handedness Profile 141

7.3.1 Practicability Study (2010) 141

7.3.2 Reliability Study (2013). 142

7.3.3 Comparing Left- and Right-Handed
4- to 7-Year-Old Children During Simultaneous
Bimanual Circle Drawing (2013). 143

7.3.4 Features of Laterality in Preschool Children (2015) 144

7.3.5 Digitising the Handedness Profile: dig-TEMA
Project (2015). 145

7.3.6 Comparing Manual and Digital Scoring
of the Handedness Profile (2015). 145

7.3.7 Laterality Features and Handedness
in Adults (2019) 145

7.3.8 Follow-Up Digitisation Study: manDAAD
Project (2019). 146

7.4 Concluding Remarks 147

References. 147

8 Developing the Handedness Profile 2018 151

8.1 Introduction 151

8.2 Overview of the Handedness Profile 2018. 152

8.3 Multivariate Information Relating to Co-determinants
of Handedness (*Qualitative Data*) 153

8.3.1 Parent Questionnaire 153

8.3.2 Checklists on Quality of Motor Performance 154

8.3.3	General Observation Protocol	154
8.3.4	Laterality Profile	154
8.4	Multidimensional Subtests of the Handedness Profile (<i>Quantitative Data</i>)	155
8.4.1	Functional Hand Preference Test (FHPT)	155
8.4.2	Midline Crossing Test (MCT)	156
8.4.3	Trained Proficiency: Skill (Tracing and Dotting)	157
8.4.4	Untrained Proficiency: Ability (Hammering and Tapping)	158
8.4.5	Bimanual Proficiency: Bimanual Cooperation Test (BCT)	158
8.5	Tools for Analysis	160
8.5.1	Category Profile	160
8.5.2	Cluster Table with HP Stairs	161
8.6	Tools for Intervention	163
8.6.1	Differential Check	163
8.6.2	HP Axes	163
8.7	Scoring and Coding the Handedness Profile	165
8.7.1	Digitised Scoring Template	165
8.7.2	Handedness Code	165
8.8	Comparing the Handedness Profile to Other Handedness Assessments	166
8.9	Evaluation of the Handedness Profile by Trained Practitioners	169
8.9.1	Summary of Closed Questions	169
8.9.2	Perceived Benefits and Advantages of the Handedness Profile	169
8.9.3	Multidimensional Assessment, Comprehensiveness	169
8.9.4	Appropriateness for Children	171
8.9.5	Perceived Challenges and Recommendations Using the Handedness Profile	172
8.10	Concluding Remarks	174
	References	174
9	Proposing an Architecture for a Handedness Typology	175
9.1	Introduction	175
9.2	Defining Six Dimensions of Handedness	176
9.3	Combining Multidimensional Handedness with Multivariate Co-Determinants	177
9.4	Identifying Distinct Handedness Groups from the Literature	178
9.5	Constructing Handedness Types and Variations Based on the Three Co-Determinants of Handedness	179
9.6	Specifying the Variations of the Handedness Types	180
9.7	Concluding Remarks	181
	Reference	181

10 Interpreting Handedness Profiles Using the Handedness Typology..... 183

10.1 Introduction 183

10.2 Handedness Categories, Types and Variations..... 184

10.2.1 Interpreting Degree-Based Handedness Type (Inheritance) with D-Based Variations..... 184

10.2.2 D-Based Variation *Left Handedness (LH)* 186

10.2.3 D-Based Variation *Variable Left Handedness (VLH)* 186

10.2.4 D-Based Variation *Right Handedness (RH)*..... 190

10.2.5 D-Based Variation *Variable Right Handedness (VRH)*..... 190

10.2.6 D-Based Variation *Ambidextrous Handedness (AH)* 193

10.2.7 D-Based Variation *Developmentally Delayed Handedness (DDH)* 195

10.2.8 Interpreting Environment-Based Handedness Type with E-Based Variations 195

10.2.9 E-Based Variation *Converted Left Handedness (c-LH)*..... 198

10.2.10 E-Based Variation *Converted Right Handedness (c-RH)*..... 200

10.2.11 Interpreting Motor-Based Handedness Type and Variations..... 200

10.2.12 M-Based Variation *Pathological Left Handedness (p-LH)* 204

10.2.13 M-Based Variation *Pathological Right Handedness (p-RH)* 204

10.3 Comparing Similar Prototypical Category Profiles Between the Handedness Variations 207

10.4 Concluding Remarks 209

References..... 210

Synopsis of Part II

Part III Intervention and Case Studies: Implications for Practice

11 Intervention Strategies for Atypical Handedness and Related Problems 217

11.1 Introduction 217

11.2 Contextualising Guidelines for Intervention 218

11.2.1 Client-Centred Approach 218

11.2.2 Bottom-Up and Top-Down Approaches..... 219

11.2.3 Communication and Education 219

11.3 Left/Right Handedness with Motor Deficiencies (D-Based Variations) 220

11.4 Variable Left (or Right) Handedness (D-Based Variations) with Motor Deficiencies 221

11.5	Developmentally Delayed Handedness (D-Based Variation)	222
11.5.1	Bottom-Up Approach	222
11.5.2	Top-Down Approach	224
11.5.3	Leon-Leftie Weeks	225
11.5.4	The Stamina Test	226
11.6	Pathological Left or Right Handedness (M-Based Variation).	227
11.7	Reverting Converted Left Handedness (E-Based Variation)	228
11.7.1	Reverting to the Inherently Dominant Hand	228
11.7.2	Refraining from Reversion Training	231
11.8	Concluding Remarks	233
	References.	233
12	Case Studies Using the Handedness Profile	235
12.1	Introduction	235
12.2	Zelda: Variable Left Hander without Motor Deficiencies	236
12.2.1	Background Information	236
12.2.2	Results of Handedness Profile	236
12.2.3	Interpretation and Summary.	239
12.2.4	Recommendations	241
12.3	David: Pathological Right Hander	241
12.3.1	Background Information	241
12.3.2	Results of Handedness Profile	241
12.3.3	Interpretation and Summary.	245
12.3.4	Recommendations	246
12.4	Bernard: Converted Left Hander with Motor Deficiencies	247
12.4.1	Background Information	247
12.4.2	Results of Handedness Profile	248
12.4.3	Summary and Interpretation.	251
12.4.4	Recommendations	252
12.5	Hugo: Variable Left Hander with an Affected Left Side and Subsequent Handedness Reshaping	253
12.5.1	Background Information	253
12.5.2	Results of Handedness Profile	254
12.5.3	Interpretation and Summary.	255
12.5.4	Recommendations	259
12.6	Concluding Remarks	259
