Contents

Part 1

The Core of Microeconomics

1

Scarcity, Opportunity Cost, and Efficiency

Defining economics 3

The existence of scarcity and choices 4 *Forms of competition* 4

Nonprice competition 4 *Competition and prices* 5 *The "best" form of competition* 5 *Normative versus positive economics* 5 *The use of models* 6 *Problems of empirical verification* 8

Scarcity and opportunity cost 9

An example of opportunity cost: Your education 9

Even "free goods" have costs 10

Cost and the production possibility curve 11

Limits to production 11 *Graphing the production possibility curve* 12

Requirements for growth 13

Production and comparative advantage 14

Comparative advantage and efficiency 14

Comparative advantage and increasing marginal cost 15

The three basic questions of economics 16

What to produce 17 *How to produce* 17 ***Insight: The economic systems of the Soviet Union and China*** 18 *For whom to produce* 19

Looking ahead 19

Summary 20

Key terms and concepts 21

Appendix: Working with tables and graphs 21

Review questions 26

2

Exchange, Transaction Costs, and Middlemen

Paradox of value 29

Decreasing marginal value 30

The basic axiom of decreasing marginal value 31

Some examples of decreasing marginal values 31

Two party exchange 31

Choices, values, and costs 33 *Mutually beneficial exchange* 33

Basis of exchange 34 *Exchange and the convergence of values* 34

Transaction costs, exchange, and the role of money 36

Middlemen and lower transaction costs 37

A graphic presentation 38

Insight: Exchange in a prisoner-of-war camp 39

Some additional examples of middlemen 40

Allocation efficiency	41
<i>Efficiency: a new view of waste</i>	41
<i>An efficient allocation of resources</i>	42

3

Demand

Individual demand	47
<i>Marginal value and demand</i>	48
<i>Decreasing marginal value and the law of demand</i>	49
Market demand	50
<i>The market demand curve</i>	51
<i>Substitutes abound: Examples of the law of demand</i>	51
Changes in demand	52
<i>Insight: Crime and punishment—the law of demand and drunks</i>	53
<i>Factors causing changes in demand</i>	55
<i>Prices of substitutes</i>	55
<i>Prices of complements</i>	55
<i>Income</i>	56
<i>Expectations of future prices or incomes</i>	56
<i>Tastes and preferences</i>	57
<i>Changes in demand versus change in quantity demanded</i>	57
Elasticity of demand	58
<i>Measurement of price elasticity</i>	58
<i>Elasticity and total revenue</i>	59
<i>Elastic demand</i>	60
<i>Inelastic demand</i>	61
<i>Unit elasticity</i>	62
<i>Determinants of elasticity</i>	63
<i>Substitutes</i>	63
<i>Proportion of budget</i>	63
<i>Time</i>	64
<i>Some applications</i>	64
<i>Two extreme cases</i>	65
<i>Perfectly elastic</i>	65
<i>Perfectly inelastic</i>	66
<i>Other elasticity measures</i>	67
Looking ahead	67
Summary	68
Key terms and concepts	69
Review questions	69

4

Supply

Individual supply	72
Supply without production	73
<i>Individual supply from an existing stock of goods</i>	74
<i>Market supply</i>	74
<i>The number of sellers and changes in market supply</i>	76
<i>Expected future prices and changes in market supply</i>	77
Supply with production	77
<i>The law of diminishing returns</i>	78
<i>Marginal and total product curves</i>	79
<i>Rising marginal cost</i>	80
<i>A producer's supply curve</i>	81
<i>Market supply</i>	81
<i>Comparative advantage and market supply curves</i>	83
<i>Elasticity of supply</i>	85
<i>Substitutes</i>	85
<i>Time</i>	86

Changes in supply 86
Insight: Boating on troubled waters 87 *Technology* 88
Prices of inputs 89 *Alternative opportunity for profit* 89
Taxes 90
 Looking ahead 90
 Summary 90
 Key terms and concepts 91
 Appendix: A numerical example of comparative advantage 92
 Review questions 93

5

Market Equilibrium and Applications

Supply and demand: The market for snow shovelers 96
The auction 97 *Surpluses* 97 *Shortages* 99 *Equilibrium* 99
Gains to exchange at the equilibrium price 100
 Price as an allocation device 100
 Some applications of supply and demand 102
An increase in demand 102 *An increase in supply* 103 *A decrease in demand* 104 *A decrease in supply* 105 **Insight: Sugar quotas spur drug traffic** 106
 Speculation: How it affects prices 107
Allocation over time 107 *Futures markets and hedging* 110
 Looking ahead 112
 Summary 112
 Key terms and concepts 114
 Review questions 114

6

Market Intervention

Price ceilings 117
Effective price ceilings 117 *Shortages* 118 *Shortages: An alternative explanation* 119
 Price ceilings: Nonprice allocations 120
First come, first served 120 *Customer preference* 121 *Black markets* 121
Ration coupons 123 *The case of rent controls* 124
Choosing lower prices: Pricing concert tickets 125
 Price floors 126
Farm price supports 127 **Insight: Milking the subsidy cow** 128
 Looking ahead 129
 Summary 129
 Key terms and concepts 131
 Review questions 131

*The Markets
for Labor and
Capital Goods*

The demand for and supply of labor 135
Labor demand as the value of the marginal product 136 *Factors causing changes in input demand* 137 *Prices of output* 137 *Productivity* 137
Other input prices 137 *Labor supply* 138
 Labor markets: Applications of supply and demand 138
Wage differentials: The relative scarcity of ability 138 *The returns to education* 139 *Unions* 141 *Minimum wage laws* 142 *Employment effects* 143 *Effects on other workers* 144 *Minimum wage and discrimination* 144 *Unemployment compensation* 144
Insight: Discrimination and comparable worth 145
 The demand for capital goods: The use of present value 147
Present versus future consumption 147 *Insulation: An introduction to the role of present value* 147 *Determinants of present value* 149 *Other examples of determining present value* 150
 Capital goods markets: Applications of supply and demand 151
The apartment building market and interest rates 151 *Durability versus planned obsolescence* 153 *The stock market* 154
 Looking ahead 155
 Summary 155
 Key terms and concepts 157
 Appendix: How much are my loan payments? 157
 Review questions 158

Part 2

The Theory of the Firm

*Costs and
Producers'
Decision Making*

Costs: Explicit and implicit 162
Economic costs and profits 163 *My father owned a grocery store* 164
Accounting profits 164 *Opportunity costs and economic profits* 164
Psychic value 165 *Economic profit, loss and breaking even* 165
 Costs in the short run 166
Total costs 166 *Avoidable and unavoidable costs* 167 *The local tavern* 167
On the beach 168 *Sunk costs and publishing* 169
 Relating costs to output 169
Marginal cost 171 *Average cost* 172 *The Don Mattingly story* 172 *The margin is not the average* 173
 Costs in the long run 173
Insight: Accounting costs as proxies for marginal cost 174 *Changes in fixed inputs and different short-run costs* 175 *Economies of scale* 176
 Looking ahead 177
 Summary 177
 Key terms and concepts 179
 Review questions 179

*Price-Taker Markets:
The Case of
Perfect Competition*

The conditions for price taking 185
Farmers at the mercy of the market 185 *Conditions for price taking* 186
 Demand and revenue 187
 Short-run decision making for the price-taking firm 187
Two rules for profit maximization 187 *Equating marginal cost and marginal revenue* 188 *A numerical example* 188 *A graphic example* 189
 Output, price, and profit 190
Short-run profits 190 *Short-run losses* 190
 Long-run adjustment 192
Economic losses and exit 192 *Economic profits and entry* 193 **Insight:**
Profits, markups, and rates of return 196 *Some implications* 197
 Efficiency and the market 197
Price equals minimum average total cost 198 *Price equals marginal cost: Efficient allocation of resources* 199
 Looking ahead 200
 Summary 200
 Key terms and concepts 202
 Review questions 202

*Price-Searcher Markets:
The Case of
Imperfect Competition*

Monopoly, oligopoly, and monopolistic competition 207
 Demand and revenue curves for price searchers 210
Marginal revenue for the price searcher 210 *Demand and marginal revenue curves* 211 *Profit maximization for the price searcher* 212
Profits and losses 212
 Barriers to entry 213
Government barriers: Patents 214 *Government barriers: Licenses* 214
Insight: *Milking a restriction on entry* 216 *Barriers to entry and capitalized profits: Taxi medallions* 216 *Natural monopolies* 217
 Cartels 218
The prisoner's dilemma 220 *A case study of a cartel* 221
 Monopoly legislation: A historical perspective 222
The Sherman Act 222 *The Clayton Act* 223
 Mergers and antitrust activity 223
Department of Justice merger guidelines 223 *Concentration ratios* 224
The Herfindahl-Hirschman Index 224 *Entry conditions* 226
 Monopolists and price discrimination 226
The gains to price discrimination 226 *Conditions for price discrimination* 227

Part 3

Government in the Marketplace

11

Government Spending and Taxation

Receipts and expenditures 236
Federal expenditures 237 *Federal receipts* 238 *Personal income tax* 239
Payroll taxes 240 *Corporate income tax* 240 *Indirect business taxes* 241
State and local expenditures and receipts 241 *Sales and excise taxes* 241
Property tax 241
Government expenditures and public choice economics 242
Median voter model 243 *Special interests and rent seeking* 244
Insight: Government allocation of resources 246
An analysis of tax effects on supply 247
Effect on supply 247 *Resource allocation and tax incidence* 248
Supply-side economics 250
An analysis of tax effects on demand 251
Taxes and the housing market 251 *Tax-exempt bonds* 252
Employer contributions to the social security tax 253
Elasticity and the effects of taxes 254
Inelastic demand 254 *Elastic demand* 256 *A historical note* 256
Looking ahead 256
Summary 257
Key terms and concepts 258
Review questions 259

12

Property Rights, Public Goods, and Pollution

The problem of externalities 264
Externalities and supply: The case of pollution 265
Property rights: Their role in establishing exclusivity 265 *The electric utility* 266 *A general remedy* 267 *Some other examples of the absence of property rights* 268 *Difficulties in defining property rights* 269
Cost-benefit analysis 269
The optimal level of pollution: Cleaning up the pond 270 *Rising costs* 270 *Declining benefits* 271 *Optimal pollution* 271 *Optimal level of crime: Cleaning up the streets* 272
Externalities and demand 273
Concert on the commons 273 *Costs of exclusion and public goods* 275
National defense 275 *Roads* 275 *School is like the flu* 275
The overuse of public goods 276
The high school reunion 276 **Insight: An illuminating view of lighthouses as public goods** 277 *Masai tribesman* 278 *Children and treats* 278
Consumer protection 279
Protecting consumers from themselves 279 *Information and the free-rider problem* 280 *Bans* 280 *Private sector information* 281
Looking back 281
