<i>Foreword</i>	xxv
<b>I Development of high-speed rail concept in Poland</b>	<b>I</b>
1.1 Introduction	1
1.1.1 First concepts of high-speed rail construction in Poland	1
1.1.2 The concept of the Warsaw – Łódź – Poznań/Wrocław line	4
1.2 Preliminary feasibility study for the high-speed line Warsaw – Łódź – Poznań/Wrocław construction	6
1.3 Feasibility study results for the construction of Warsaw – Łódź – Poznań/Wrocław line	9
1.4 Adapting Central Trunk Line to high-speed line parameters	13
1.5 A high-speed system based on a Warsaw – Łódź – Poznań/Wrocław line and a Central Trunk Line	16
1.6 Directional high-speed rail development program in Poland	19
1.7 International high-speed connection in a TEN-T network	24
1.8 Possibilities of using high-speed lines for regional and agglomeration transport	27
1.8.1 Warszawa	27
1.8.2 Łódź	27
1.8.3 Poznań	27
1.8.4 Wrocław	28
1.8.5 Katowice and Kraków	29
1.9 Summary	32
<b>2 Development of the high-speed rail infrastructure – Polish experience</b>	<b>35</b>
2.1 Introduction	35
2.2 Upgraded high-speed lines – international experience	36
2.3 Upgraded high-speed line – the Polish case	40
2.4 Scheduled operation of high-speed trains in Poland – the first year of experience	48
2.5 Conclusions	49

<b>3</b>	<b>The view on socioeconomic aspects of high-speed system</b>	<b>53</b>
3.1	Introduction	53
3.2	Beginning of high-speed rail	53
3.2.1	Japan	54
3.2.2	France	55
3.2.3	Germany	56
3.2.4	Italy	56
3.2.5	Spain	56
3.3	High-speed rail as a means of local development	58
3.4	Socioeconomic features	62
3.4.1	Agglomerations	62
3.4.2	NUTS2 and NUTS3 – characteristics	68
3.4.2.1	Voivodeships (NUTS2) and Subregions (NUTS3)	69
3.4.2.1.1	Mazowieckie Voivodeship	69
3.4.2.1.2	Łódzkie Voivodeship	70
3.4.2.1.3	Dolnośląskie Voivodeship	71
3.4.2.1.4	Wielkopolskie Voivodeship	72
3.4.2.1.5	Małopolskie Voivodeship	73
3.4.2.1.6	Śląskie Voivodeship	74
3.4.3	Development trends in the areas of HSR impact	77
3.4.3.1	Mazowieckie Voivodeship	78
3.4.3.2	Łódzkie Voivodeship	78
3.4.3.3	Dolnośląskie Voivodeship	78
3.4.3.4	Wielkopolskie Voivodeship	78
3.4.3.5	Małopolskie Voivodeship	79
3.4.3.6	Śląskie Voivodeship	79
3.4.4	Demand for service	80
3.5	Effects for regions and the country	81
3.6	Summary	84
<b>4</b>	<b>Operational effectiveness of high-speed rails</b>	<b>89</b>
4.1	Introduction	89
4.2	Operating costs in the functioning of train speed	90
4.2.1	Methodological guidelines of estimating operating costs	90
4.2.2	Costs of train purchase	92
4.2.3	Costs arising from train possession	93
4.2.4	Rolling stock maintenance and cleaning costs	94
4.2.5	Energy costs	96
4.2.6	Train operation personnel costs	99
4.2.7	Infrastructure use charges	101
4.3	Cost-effectiveness of high-speed rails	102

4.4	Direct benefits on the passenger transport implementation with high-speed trains	107
4.5	Financial effectiveness of high-speed rails	110
4.6	Social and economic benefits of high-speed rails	111
4.7	Summary	113
<b>5</b>	<b>HSR in Poland: Demand, spatial accessibility, and local spatial planning conditions</b>	<b>117</b>
5.1	Introduction	117
5.2	Demand and gravitation	118
5.3	Spatial accessibility	122
5.4	Spatial planning at municipality (gmina) level	124
5.5	Conclusions	129
<b>6</b>	<b>Adaptation of the Łódź Agglomeration Railway node to a new role in the high-speed rail system</b>	<b>131</b>
6.1	Introduction	131
6.2	Location of Łódź within the transport network of Poland and Europe	132
6.3	Historical conditions of barriers for the development of Łódź Agglomeration Railway node	134
6.4	The process of planning and routing of the high-speed line running through Łódź	137
6.5	Description of the modern concept of restructuring of the Łódź Agglomeration Railway node	141
6.6	Implementation of the Łódź Fabryczna station as a central multimodal hub of the Łódź Agglomeration Railway node	143
6.7	Role of the Łódź Agglomeration Railway as a modern distribution system for travelers in the region	152
6.8	Targeted effects of modernization of the Łódź railway node and its surroundings	156
6.9	Summary	157
<b>7</b>	<b>European and Polish requirements for a high-speed rail system</b>	<b>161</b>
7.1	European technical requirements for HS	164
7.2	Polish technical requirements for HS	167
7.3	European rules for HS product certification	168
7.4	Polish rules for HS product certification	169
7.5	European rules for HS rail system operation	170
7.6	Polish rules for HS operation	171

<b>8</b>	<b>High-speed rail passenger services in Poland</b>	<b>175</b>
8.1	Introduction	175
8.2	Passenger transport in Poland and in Europe	176
8.3	Railway passenger services – some basic issues	179
8.3.1	Polish systematics of railway passenger services	179
8.3.2	Classification of passenger flows	180
8.3.3	Evolution and types of railway timetables	182
8.3.4	Speed of passenger trains	183
8.4	Choice of maximum train speed	185
8.4.1	General issues	185
8.4.2	Service criteria	185
8.4.3	Infrastructural criteria	187
8.4.4	Social criteria	189
8.4.5	Economic speed balance	189
8.4.6	Speed choice	190
8.5	Elements of HSR services organization	191
8.5.1	Modern transport strategies	191
8.5.2	Transport offer planning	192
8.5.3	Passenger traffic forecasts	193
8.5.4	Construction of connection network	194
8.5.5	Planning of rolling stock work and of train crews	197
8.6	Summary	200
<b>9</b>	<b>Introduction of high-speed rolling stock into operation on the Polish railway network</b>	<b>203</b>
9.1	Introduction	203
9.2	High-speed rolling stock	204
9.3	High-speed rolling stock in Poland	206
9.3.1	EU44 series locomotive	207
9.3.2	Electric multiple unit ED250	209
9.4	Vehicle dynamics tests	211
9.4.1	Experiment planning	211
9.4.2	Organization of the test runs	219
9.4.3	Test runs	221
9.5	Operation of trains with the maximum speed of 200 km/h	225
9.5.1	Speed characteristics	225
9.5.2	Speed utilization ratio	226
9.6	Conclusion	227
<b>10</b>	<b>High-speed rail power supply systems</b>	<b>229</b>
10.1	Power supply systems for electrified railway lines	229
10.1.1	Contact line supply for rail vehicles	229
10.1.2	DC power supply system	235
